The Cosmic Cocktail Katherine Freese, 2016-05-17 The inside story of the epic quest to solve the mystery of dark matter The ordinary atoms that make up the known universe from our bodies and the air we breathe to the planets and stars constitute only 5 percent of all matter and energy in the cosmos The rest is known as dark matter and dark energy because their precise identities are unknown The Cosmic Cocktail is the inside story of the epic quest to solve one of the most compelling enigmas of modern science what is the universe made of told by one of today's foremost pioneers in the study of dark matter Blending cutting edge science with her own behind the scenes insights as a leading researcher in the field acclaimed theoretical physicist Katherine Freese recounts the hunt for dark matter from the discoveries of visionary scientists like Fritz Zwicky the Swiss astronomer who coined the term dark matter in 1933 to the deluge of data today from underground laboratories satellites in space and the Large Hadron Collider Theorists contend that dark matter consists of fundamental particles known as WIMPs or weakly interacting massive particles Billions of them pass through our bodies every second without us even realizing it yet their gravitational pull is capable of whirling stars and gas at breakneck speeds around the centers of galaxies and bending light from distant bright objects Freese describes the larger than life characters and clashing personalities behind the race to identify these elusive particles Many cosmologists believe we are on the verge of solving the mystery The Cosmic Cocktail provides the foundation needed to fully fathom this epochal moment in humankind's quest to understand the universe

Sylvia's Solution Caroline Brem, 2011-06-17 After losing her son and husband and moving off the family farm into the city Sylvia fills her days with visits to the local library computer classes her granddaughter and retribution Sylvia watched her own family fall apart and those of her friends not to mention the slow disintegration of her beloved hometown Boganindra in country New South Wales Sylvia begins to feel helpless and hopeless Until she has a chance meeting with a man in her computer class at the local library She learns that something can be done There are ways to stop someone from ruining people's lives From taking over the failing mum and dad businesses in small towns and incorporating them into much bigger modern mechanised businesses and then making their long serving staff redundant With an uncanny knack of fading into the shadows and being very unmemorable Sylvia not only finds it almost impossible to get any kind of service in a coffee shop but she finds that when she really needs to disappear in a crowd she has no trouble

Nature's Oracle Ullica Segerstrale, 2013-02-28 W D Hamilton 1936-2000 was responsible for a revolution in thinking about evolutionary biology a revolution that changed our understanding of life itself He played a central role in the realization that what matters in evolution is not the survival of the individual but of the survival of its genes This provided the solution to the long standing problem of animal altruism that vexed even Darwin himself and in due course resulted in terms like selfish genes kin selection and sociobiology becoming familiar to a wider public Hamilton went on to solve many more major problems and open up ever new fields he shaped much of our current understanding of central problems

including the evolution of sexual reproduction and ageing He became world famous and garnered international prizes But this is all in hindsight In fact Hamilton s recognition came late his career is a classic case of misunderstood genius In this illuminating and moving biography Ullica Segerstrale documents Hamilton s extraordinary life and work revealing a man of immense intellectual curiosity an uncompromising truth seeker a naturalist and jungle explorer a risk taker an unconventional scientist with a poet s soul and a deep concern for life on earth and mankind s future *Sylvia's Home*
