New Time:

About Time Tim Aldrich, 2017-09-08 Where does all the time go Despite the burgeoning army of machines designed to save us time from cars and aeroplanes to dishwashers and microwaves we don't seem to have any more of it on our hands We simply fill the space we clear with more things to do consuming more spending more and then look around for new ways of saving time And so we spiral onwards upwards ever faster Being busy has become a habit and a habit that gives us high status busy people are important people The business of business is busy ness We are moving from a world in which the big eats the small to a world where the fast eats the slow But the fallout from a society hooked on speed is everywhere It's affecting our health 60 per cent of the adult population in the UK report that they suffer from stress and more than half of these say that this has worsened over the last 12 months It's affecting our family life with a quarter of British families sharing a meal together only once a month And it affects our environment too air travel is a major source of carbon dioxide emissions accelerating climate change as we speed around the world And the faster we live the faster we consume the faster we waste energy and the faster we pollute the planet The faster we seem to be running out of time Is there something fundamentally wrong with the structure and values of this high speed society What are we running from and what are we running towards Sustainable development is all about time It's about trying to safeguard the health of the planet and the people it supports indefinitely unconstrained by time The idea of time offers a novel perspective on what sustainable development is all about Looking at issues affecting society and the environment through the prism of time conveys the urgency of the challenge and leads us to solutions we might not have thought of before About Time edited by the think tank Forum for the Future brings together ten of the world's leading thinkers and writers including Will Hutton Baroness Mary Warnock Sir Martin Rees Ghilleen Prance Jay Griffiths the author of the bestselling Pip Pip and Jonathon Porritt from disciplines including biology business sociology ethnography astronomy philosophy politics history and sustainability in a collection of intriguing essays exploring the issue of time and how it relates to the environment economy and society The first half of this collection looks at different dimensions of time from the history of time as a social phenomenon and cultural notions of time to cosmological time and the difference between human and machine time These think pieces are followed by a series of more practical solutions oriented contributions looking at how we deal with time in different contexts from the slow food movement and time banks to long term thinking in politics and what we can individually do to cope with the speed society Contributions are liberally interspersed with boxes and brief pieces offering bite sized facts figures and insights relating to time and our everyday lives About Time is a high profile collection aimed at creating debate about where the values of our contemporary society are taking us It will foster reflective thinking about different aspects of time using the concept of time to communicate and illuminate the idea of sustainable development and question our idolatry of speed In doing so it aims to inspire and help decision makers in business government and elsewhere to appreciate the challenges of sustainable

development and inspire individuals to create change in their own lives For readers of No Logo and Longitude this book provides a thought provoking twist bringing together time and sustainability in a refreshing provocative and accessible way

Disputed Truth Hans Küng,2014-07-03 Hans Küng has been a major influence on post war Christianity by any reckoning a peritus for the second Vatican council he then went on to publish a number of controversial books including Infallible An Enquiry 1971 which enraged the Vatican and caused him to lose the ecclesiastical approval of his teaching at the university

of T bingen However he remains a respected priest in good standing with his bishop Throughout all the upheavals that the Catholic Church has undergone in recent decades K ng has been an outspoken observer turning himself from enfant terrible to b te noire However his world influence has been great Whether speaking at the United Nations or consorting with politicians and religious leaders he is always listened to with respect and enthusiasm A string of recent books has added to his reputation notably *On Being a Christian* 1974 and *Does God Exist An Answer for Today* 1980 What is not so well known is that as a young man K ng was a close friend and confidant of Joseph Ratzinger Benedict XVI Over the years however they increasingly came to represent exactly what the other most despised On being appointed to the Holy See Ratzinger had a long private meeting with K ng the consequences of which may resonate within the Catholic Church for many years In these thrilling memoirs K ng gives his personal account of all these struggles and ambitions The result is a book of major importance for any student of the church in the 20th century This second volume covers the period following the close of the Second Vatican Council right up to the present day
