Warship Pictorial Steve Wiper,2000-04 **Naval Firepower** Norman Friedman,2013-08-20 For more than half a century the big gun was the arbiter of naval power but it was useless if it could not hit the target fast and hard enough to prevent the enemy doing the same Because the naval gun platform was itself in motion finding a firing solution was a significant problem made all the more difficult when gun sizes increased and fighting ranges lengthened and seemingly minor issues like wind velocity had to be factored in To speed up the process and eliminate human error navies sought a reliable mechanical calculation This heavily illustrated book outlines for the first time in layman s terms the complex subject of fire control as it dominated battleship and cruiser design from before World War I to the end of the dreadnought era Covering the directors range finders and electro mechanical computers invented to solve the problems America s leading naval analyst explains not only how the technology shaped and was shaped by the tactics involved but analyses their effectiveness in battle His examination of the controversy surrounding Jutland and the relative merits of competing fire control systems draws conclusions that will surprise many readers He also reassesses many other major gun actions such as the battles between the Royal Navy and the Bismarck and the US Navy actions in the Solomons and at Surigao Strait All major navies are covered and the story concludes at the end of World War II with the impact of radar This is a book that everyone with a more than passing interest in twentieth century warships will want to read and nobody professionally involved with naval history can afford to miss **Ships Monthly** ,2005 Pictorial Atlas Illustrating the Spanish-American War Le Roy Armstrong,1899 **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004 **The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces** ,1913 **The Sun Almanac for ...** ,1907

history of the U S Navy s mothball fleet this handsome book takes a rare look at the so called fleet behind the fleet from the end of World War II to the present Through photographs of the ships and shipyards where they were laid up and brief ship histories it tells the story of how these ships were paid off and preserved how some were reactivated and how most left the reserve fleet to be broken up Additional photos of the ships in action remind readers that forgotten though they were while in mothballs many made their marks on history Year after year the warships lay quiet and lifeless like boarded up old houses once full of activity that had outlived their usefulness The row upon row of mostly now anonymous vessels hatches sealed shut offer a bleak contrast to the drama of their wartime operations You can almost hear the wind whistling through the masts and superstructures stripped of radars Below decks there is only the sound of the dehumidifiers removing moisture from the air retarding the buildup of rust and deterioration Berthing areas repair shops and radio rooms have been frozen in time looking exactly as they did when sealed decades before Among them are such well known ships as the Enterprise and the Midway as well as little known ones like the Fall River and some that were laid up almost as soon as they were completed like the Oregon City Here too are the frigates and nuclear submarines of a later age These are the ships of the forgotten fleet built for war but resting at peace in coastal parking lots on both sides of the country their story told for the first time
