Managing Terrorism and Insurgency Cameron I. Crouch, 2009-09-10 This book examines how governments can weaken the regenerative capabilities of terrorist and insurgent groups The exploration of this question takes the form of a two tier examination of three insurgent actors whose capacity to regenerate weakened in the past the Front de lib ration du Qu bec FLQ of Canada the Movimiento de Liberaci n Nacional Tupamaros MLN T of Uruguay and the Provisional Irish Republican Army PIRA of Northern Ireland during the mid 1970s At the first level of its examination the book investigates the extent to which the regenerative capacities of the FLQ MLN T and PIRA weakened because of an increase in attrition and a decrease in recruitment The primary objectives of this analysis are to uncover whether a declining intake of recruits played a lesser equal or greater role than a burgeoning loss of personnel in weakening the capacities to regenerate of the three insurgent actors and in turn to shed greater light on the broader validity of the prevailing view in conflict studies that a decrease in recruitment is more important than an increase in attrition in effecting the corrosion of an insurgent actor's capacity to regenerate At the second level of its exploration the book assesses the effectiveness of five of the most prominent policy prescriptions in the literature and insurgent recruitment and attrition ameliorating grievances selective repression discrediting insurgent ideology improving intelligence collection and restricting civil liberties This book will be of much

interest to students of terrorism and counter terrorism conflict studies strategic studies and security studies in general
