Rethinking Online Education Bessie Mitsikopoulou,2015-11-17 Rethinking Online Education analyzes online educational materials on the recent Iraq war aimed to be used by U S educators in elementary and secondary schools

It is suggested that far from being ideologically neutral these educational materials weave together resources which provide a coherent view of the Iraq war theme and can thus be seen as constituting a kind of an informal curriculum Mitsikopoulou argues that the teacher resources adhere to different pedagogical discourses and constitute materializations of two broad approaches to education A number of pedagogical issues are also raised in the discussion What is the difference between critical thinking and critical pedagogy How is the genre of lesson plan realized in different teaching philosophies and how do curricular texts change when they are delivered online This important book highlights the need to explore the new forms of textuality which emerge from online curricular materials and to develop an understanding of the processes of text composition distribution and consumption *Critical Theories, Radical Pedagogies, and Global Conflicts* Gustavo Fischman, 2005 We are living in a time of resurgent global conflicts and imperialistic tensions a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education The efforts of countless teachers activists and families working and living in poor areas around the world are labeled as failures entirely discredited on the basis of their expendability in relation to capital gains or simply ignored In response to these oppressive and challenging conditions this book's contributors a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations In a clear attempt to move beyond both nostalgia and romanticism *Critical Theories Radical Pedagogies and Global Conflicts* draws from a range of viewpoints conceptual and thematic transnational and crosscultural First World and Third World to articulate new directions for teachers and activists working to demonstrate that another education and indeed another world is possible Pedagogy, Oppression and Transformation in a 'Post-Critical' Climate Andrew O'Shea, Maeve O'Brien, 2011-09-22 Provides a reflection and reevaluation on Freire's central principles of pedagogy and praxis Provided by publisher *The Post-formal Reader* Shirley R. Steinberg, Joe L. Kincheloe, Patricia H. Hinchey, 1999 This volume argues that while twentieth century educational psychology has made important advances a time for reassessment has arrived Recent years have seen the rise of neo Vygotskian analysis and situated cognition within the discipline of cognitive psychology The authors of *Post Formal Reader* have picked up where these theories leave off to more fully develop the specific connections between the social and the psychological dimensions of learning theory and educational psychology **Literacy and Motivation** Ludo Verhoeven, Catherine E. Snow, 2001-03 Focuses on how to create a society of engaged readers readers who are socially interactive strategic and motivated Provides a state of the art review of research on promoting reading in relation to reading instruction Gendered Readings of Change C. Fischer, 2014-02-20 This book develops a unique theory of change by drawing on American philosophy and contemporary feminist thought Via a select history of ancient Greek and Pragmatist

philosophies of change Fischer argues for a reconstruction of transformation that is inclusive of women's experiences and thought

Critical Pedagogy in the Twenty-First Century Curry Malott, Brad J. Porfilio, 2011-03-01 This book simultaneously provides multiple analyses of critical pedagogy in the twenty first century while showcasing the scholarship of this new generation of critical scholar educators Needless to say the writers herein represent just a small subset of a much larger movement for critical transformation and a more humane less Eurocentric less paternalistic less homophobic less patriarchal less exploitative and less violent world This volume highlights the finding that rigorous critical pedagogical approaches to education while still marginalized in many contexts are being used in increasingly more classrooms for the benefit of student learning contributing however indirectly to the larger struggle against the barbarism of industrial neoliberal militarized destructiveness The challenge for critical pedagogy in the twenty first century from this point of view includes contributing to the manifestation of a truly global critical pedagogy that is epistemologically democratic and against human suffering and capitalist exploitation These rigorous democratic critical standards for measuring the value of our scholarship including this volume of essays should be the same that we use to critique and transform the larger society in which we live and work
