Con el rigor científico que merece cada capítulo refleja una estrecha sinergia entre profesionales de la medicina, la dietética y nutrición, las ciencias básicas y otros expertos. Se han actualizado todas las secciones que atienden a los ajustes de la dieta según la composición de macro y micronutrientes. Buen ejemplo de ello es la sección 5 dedicada a las dietas controladas en hidratos de carbono y que actualiza el papel de este macronutriente en el manejo fisiopatológico de varias patologías. Una importante novedad en esta edición es la introducción de un capítulo sobre trastornos de la conducta alimentaria en que se reconoce la necesidad de abordar estos trastornos de base psicológica desde una perspectiva multidisciplinaria destacando la intervención dietética y nutricional en el manejo de los pacientes que los padecen, así como la introducción de un nuevo anexo sobre nombres de alimentos en Hispanoamérica que sin duda apoya la consolidación de la proyección internacional de este consagrado texto especialmente en países de América Latina respetando la diversidad cultural y lingüística utilizando los términos propios de cada región para facilitar la comprensión global.
