Rudas, János Fodor, 2010-10-08 The International

Symposium of Hungarian Researchers on Computational Intelligence and Informatics celebrated its 10 edition in 2009 This volume contains a careful selection of papers that are based on and are extensions of corresponding lectures presented at the jubilee conference This annual Symposium was launched by Budapest Tech previously Budapest Polytechnic and by the

Hungarian Fuzzy Association in 2000 with the aim to bring together Hungarian speaking researchers working on computational intelligence and related topics from all over the world but with special emphasis on the Central European Region. The Symposium of the 10 jubilee anniversary contained 70 reviewed papers. The growing interests and the enthusiasm of the participants have proved that the Symposium has become an internationally recognized scientific event providing a good platform for the annual meeting of Hungarian researchers. The main subject area called Computational Intelligence includes diverse topics. Therefore we offer snapshots rather than a full coverage of a small particular subject to the interested reader. This principle is also supported by the common national root of the authors. The book begins with Information Systems and Communication. This part contains papers on graphs of grammars, software and hardware solution for Mojette transformation, statistical intrusion detection, congestion forecast and 3D based internet communication and control.

Reproduction by Design Angus McLaren, 2012-03-09 Drawing on novels, plays, science fiction and films of the 1920s and 1930s, this book examines modern science's place in reproduction in British and American cultural history.

Jewish Science Fiction and Fantasy through 1945 Valerie Estelle Frankel, 2021-06-17 Science fiction first emerged in the Industrial Age and continued to develop into its current form during the twentieth century. This book analyses the role Jewish writers played in the process of its creation and development. The author provides a comprehensive overview bridging such seemingly disparate themes and figures as the ghetto legends of the golem and their influence on both Frankenstein and robots; the role of Jewish authors and publishers in developing the first science fiction magazine in New York in the 1930s; and their later contributions to new and developing media forms like comics and film. Drawing on the historical context and the positions Jews held in the larger cultural environment, the author illustrates how themes and tropes in science fiction and fantasy relate back to the realities of Jewish life in the face of global anti-Semitism, the struggle to assimilate in America, and the hope that was inspired by the founding of Israel.

From Lowbrow to Nobrow Peter Swirski, 2005-10-24 Swirski begins with a series of groundbreaking questions about the nature of popular fiction, vindicating it as an artform that expresses and reflects the aesthetic and social values of its readers. He follows his insightful introduction to the socio-aesthetics of genre literature with a synthesis of the century-long debate on the merits of popular fiction and a study of genre informed by analytic aesthetics and game theory. Swirski then turns to three nobrow novels that have been largely ignored by critics: Examining the aesthetics of entertainment in Karel Capek's *War with the Newts*, Raymond Chandler's *Playback*, and Stanislaw Lem's *Chain of Chance*, *crossover* tours de force. *From Lowbrow to Nobrow* throws new light on the hazards and rewards of nobrow traffic between popular forms and highbrow aesthetics.

British Future Fiction, 1700-1914, Volume 8 I F Clarke, 2017-09-29 This set of eight volumes presents the reader with selected primary texts in the genre now generally known as future fiction. The chosen texts are designed to explore the dominant characteristics of the genre and examine how it changed over the 18th and 19th centuries.
