New Directions in Race, Ethnicity and Crime Coretta Phillips, Colin Webster, 2013-10-08 The disproportionate criminalisation and incarceration of particular minority ethnic groups has long been observed though much of the work in criminology has been dominated by a somewhat narrow debate This debate has concerned itself with explaining this disproportionality in terms of structural inequalities and socio economic disadvantage or discriminatory criminal justice processing This book offers an accessible and innovative approach including chapters on anti-Semitism social cohesion in London Bradford and Glasgow as well as an exploration of policing Traveller communities Incorporating current empirical research and new departures in methodology and theory this book also draws on a range of contemporary issues such as policing terrorism immigration detention and youth gangs In offering minority perspectives on race crime and justice and white inmate perspectives from the multicultural prison the book emphasises contrasting and distinctive influences on constructing ethnic identities It will be of interest to students studying courses in ethnicity crime and justice

The Limits of Marriage Gary R. Lee, 2015-04-08 This book documents and explains the remarkable decline in the American marriage rate that began about 1970 This decline has occurred in spite of the fact that married people are better off than unmarried people in many ways Many other attempts to explain the retreat from marriage blame it on culture change involving a devaluation of marriage and or on ignorance of the benefits of marriage among the unmarried population In turn because unmarried adults and single parent families are poorer than others poverty and its associated problems are attributed to the failure to marry The argument presented here is that the declining marriage rate is due to the deteriorating position of workers particularly men in the American economy Not only have jobs disappeared and wages decreased especially for the less educated but existing jobs have become more precarious Less educated workers can t count on having jobs in the future and can t count on earning enough to support families if they have jobs because their wages have stagnated In this economic environment the flexibility to change partners becomes a survival strategy for the economically marginalized population which has been increasing in size for the past four decades Arrangements such as cohabitation allow for this flexibility marriage does not

This argument implies that marriage is not a realistic choice for many Americans. In fact, it is a choice that many people don't actually have. Marriages between economically marginal men and women would not eventuate in the benefits that middle class people experience when they marry and would eliminate an option they may need to survive in the face of unrelenting poverty. We won't convince these people that marriage would improve their lives because in most cases it wouldn't be true. To return the marriage rate to its pre 1970 level, we need to address the economic factors that have caused the decline.

Puerto Rican Diaspora Carmen Whalen, 2008. *Histories of the Puerto Rican experience*. **Where We Live Now** John Iceland, 2009-03-04. In *Where We Live Now*, John Iceland documents the levels and changes in residential segregation of African Americans, Hispanics, and Asian Americans from Census 2000. Although the concentration of new immigrants in neighborhoods with more co-ethnics temporarily increases segregation, there is a clear trend toward lowered residential segregation of native born Hispanics and Asians, especially for those with higher socioeconomic status. There has been a modest decrease in black-white segregation, especially in multi-ethnic cities, but African Americans, including black immigrants, continue to experience much higher levels of housing discrimination than any other group. These important findings are clearly explained in a well-written story of the continuing American struggle to live the promise of *E Pluribus Unum*. Charles Hirschman, University of Washington. *Where We Live Now* puts on a dazzling display of all the virtues of rigorous social science to go beyond mere headlines about contemporary American neighborhoods. Iceland's book reveals much more complex developments than can be summarized in a simple storyline and dissects them with admirable precision to identify their dynamics and implications. The reader comes away with a more sophisticated understanding of the ways in which residential patterns are moving in the direction of the American ideal of integration and the ways in which they come grossly short of it. Richard Alba, co-author of *Remaking the American Mainstream*. A unique work that takes on immigration, race, and ethnicity in a novel way. It presents cutting-edge research and scholarship in a manner that policy makers and other nonspecialist social scientists can easily see how the trends he examines are reshaping American life. Andrew A. Beveridge, Queens College and the Graduate Center of City University of New York. This is the new major book about racial residential segregation, one that will influence research in this field for several decades. Using new measures, John Iceland convincingly shows that the Asian and Hispanic immigrants who are arriving in large numbers gradually adopt the residential patterns of whites. The presence of many immigrants, he demonstrates, is also linked to declining black-white segregation. His analysis shows that the era of white flight has ended since many racially mixed neighborhoods now are stable over time. This careful analysis cogently explains how race, economic status, nativity, and length of residence in the United States contribute to declining residential segregation. Future investigators who conduct research about racial and ethnic residential patterns will begin by citing Iceland's *Where We Live Now*. Reynolds Farley, Research Scientist, University of Michigan Population Studies Center. *Where We Live Now* is both a very timely and highly significant study of changes in living patterns among racial

ethnic groups in the United States showing how such groups are being affected by immigration and what this means for racial ethnic relations today and tomorrow This book is a must read for all persons interested in the country s new diversity Frank D Bean Director Center for Research on Immigration In Where We Live Now John Iceland paints a clear yet nuanced picture of the complex racial and ethnic residential landscape that characterizes contemporary metropolitan America No other book of which I am aware places residential segregation so squarely or effectively in the context of immigration fueled diversity Thanks to its rare blend of theoretical insight empirical rigor and readability Where We Live Now should appeal to audiences ranging from research and policy experts to undergraduate students Barrett Lee Professor of Sociology and Demography Pennsylvania State University Civilization: Contents, Discontents, and Malcontents and Other Essays (c) Stanford M. Chung,2007 Since the 1992 Los Angeles riots Koreatown has become increasingly fractured by intergenerational conflict class polarization and suburban flight In the face of these struggles community organizations can provide centralized resources and infrastructure to foster an ethnic consciousness and political solidarity among Korean Americans This book analyzes the role of ethnic community based organizations and the dynamics of contemporary Korean American politics Drawing on two case studies the author identifies diverse ways in which community based organizations negotiate their political agendas and mainstream ties within the traditional ethnic power structures One organization promotes middle class ethnic goals through accommodation to immigrant leaders while the other emphasizes social justice through alliances with outside interest groups Both cases challenge the traditional assumption that assimilation undermines ethnicity as a meaningful framework for political identity and solidarity in immigrant groups *Legacies of Struggle* reveals how community based organizations create innovative spaces for political participation among new generations of Korean Americans

The Oxford Handbook of Social Exclusion offers the most comprehensive body of social exclusion research ever assembled and addresses the fundamental questions on why people have a need to belong why people exclude others and how people respond to various forms of social exclusion **Navigating the Future** Geraldine Downey,Jacquelynne Eccles,Celina Chatman,2006-01-12 Psychologists now understand that identity is not fixed but fluid and highly dependent on environment In times of stress conflict or change people often adapt by presenting themselves in different ways and emphasizing different social affiliations With changing demographics creating more complex social groupings it is important to understand the

costs and benefits of the way social groups are categorized and the way individuals understand cope with and employ their varied social identities Navigating the Future edited by Geraldine Downey Jacquelynne Eccles and Celina Chatman answers that call with a wealth of empirical data and expert analysis Navigating the Future focuses on the roles that social identities play in stressful challenging and transitional situations Jason Lawrence Jennifer Crocker and Carol Dweck show how the prospect of being negatively stereotyped can affect the educational success of girls and African Americans making them more cynical about school and less likely to seek help The authors argue that these issues can be mitigated by challenging these students educationally expressing optimism in their abilities and emphasizing that intelligence is not fixed but can be developed The book also looks at the ways in which people employ social identity to their advantage J Nicole Shelton and her co authors use extensive research on adolescents and college students to argue that individuals with strong positive connections to their ethnic group exhibit greater well being and are better able to cope with the negative impact of discrimination Navigating the Future also discusses how the importance and value of social identity depends on context LaRue Allen Yael Bat Chava J Lawrence Aber and Edward Seidman find that the emotional benefit of racial pride for black adolescents is higher in predominantly black neighborhoods than in racially mixed environments Because most people identify with more than one group they must grapple with varied social identities using them to make connections with others overcome adversity and understand themselves Navigating the Future brings together leading researchers in social psychology to understand the complexities of identity in a diverse social world Perspectives on Las Américas Mathew C.
