## **Race And Ideology:**

**Race, Ideology, and the Decline of Caribbean Marxism** Anthony P. Maingot, 2015-08-25 In this book Anthony Maingot examines the contemporary intellectual social economic and cultural trajectories of Caribbean nations in light of the challenges the region as a whole has faced in the postcolonial era By focusing on changes since the 1990s in the context of intellectual roots and movements of the past this manuscript helps define the future course of studies in the field with regard to an empirically valid coherent assessment of a complex region

**Race and Ideology** Arthur Kean Spears, 1999 Race and Ideology proposes an understanding of racism as a divide and conquer mechanism Race and Ideology reveals how various strands of racial thinking and behavior are crucial for maintaining the unequal distribution of wealth that is more pronounced in the U S than in any other advanced industrial country Though primarily concerned with the U S this collection contains chapters on other societies in order to highlight commonalities and the global nature of the race color problem This book proposes a new understanding of racism by examining a variety of issues that show how racism and colorism along with other forms of oppression are interconnected and maintained by language symbolism and popular culture It includes such topics as how blackness is the symbolic bottom of the U S social structure how the teaching of language and culture can be a tool for understanding inequality and how the media contribute to the dissemination of stereotypes of people of color Race and Ideology offers provocative ideas that must be confronted if we are to construct an understanding of racism that can be useful for social change

Race, Identity, and Representation in Education Cameron McCarthy, 1993 Despite differing orientations the contributors here all share a common concern for stressing the importance of social context nuance and language in understanding the dynamics of race relations

**Decoding Racial Ideology in Genomics** Johnny E. Williams, 2016-05-27 Although the human genome exists apart from society knowledge about it is produced through socially created language and interactions As such genomicists thinking is informed by their inability to escape the wake of the race concept This book investigates how racism makes genomics and how genomics makes racism and race and the consequences of these constructions Specifically Williams explores how racial ideology works in genomics The simple assumption that frames the book is that race as an ideology justifying a system of oppression is persistently recreated as a practical and familiar way to understand biological reality This book reveals that genomicists preoccupation with race regardless of good or ill intent contributes to its perception as a category of differences that is scientifically rigorous

Race, Ideology and the University - PULP FICTIONS No.8 Karin van Marle, Joel Modiri, Terblanche Delpont, 2014-01-01 Race Ideology and the University PULP FICTIONS No 8 Edited by Karin van Marle Joel Modiri and Terblanche Delpont 2014 ISSN 1992 5174 Pages 49 Print version Available Electronic version Free PDF available About the publication Keeping with its robust dialogic spirit this edition of Pulp Fictions plays host to a diverse range of voices and perspectives Responding to the events surrounding the publication of a controversial article by Louise Mabile four authors from diverse subject positions in and outside of the

University Alfred Moraka Gillian Schutte Quaraysha Ishmail Sooliman and Jaco Oelofse focus on the issue of race and racial ideology in the University space While Moraka engages with selected theories on the meaning and conceptualisation of racism and its relation to power history and subject formation Oelofse attends to the racially structured nature of knowledge and its perpetuation of white cultural domination Schutte offers a searing reflection on whiteness in the new South Africa and Sooliman amplifies the problem of Islamophobia and seeks to draw out its association to and as racism This edition of the Pulp Fictions after a long hiatus is a timely one in that it coincides with and critically challenges the central theme of what is called 20 years of freedom in post apartheid South Africa In recounting the continuation of racism the incompleteness of transformation the still dominant nature of whiteness and the emergence of new modes of racial power the authors problematize the easy conceit that the nation is free of the vestiges of colonial racism and may now move on That this also takes place a year after the passing of Nelson Mandela in the shadow of events such as the Marikana massacre and in the context of the emergence of movements such as the Economic Freedom Fighters further augments the relevance and political acuity of the papers here The contributions contained in this edition also contend directly and indirectly with the University's own historical participation in and complicity with racism Universities in South Africa and in all other settler colonies have always been instrumental in the development of an ideological and theoretical apparatus for oppression through constructing for example scientific experiments and sociological knowledge that rationalises the enslavement exploitation colonisation of the indigenous Black population In addition South African universities appear to exhibit an ongoing epistemological and cultural unwillingness to be truly South African For one thing a predominantly Anglo European intellectual tradition still frames much of the content being taught to students African history politics philosophy jurisprudence etc are continuously relegated to electives or moved out of departments into Institutes or Centres of African Studies This reflects we think that a certain Hegelian doubt about whether Africa has a history and indeed an intellectual life remains current in institutions of higher learning in this country Indeed it remains a stark irony and injustice that the thought and history of and from Africa rather than being the norm of intellectual and theoretical discourse functions for many as an extra option or hobby to be pursued in leisurely time to be found only in the ghettos and margins of universities The papers collected in this edition then should also be read as raising serious questions about South African universities continued complicity in the relegation of the African in Africa to the other also at the level of epistemology and knowledge production Given the context a particular and direct focus on the University of Pretoria is warranted It is clear from public discourse that these conversations about racism economic power and liberation are taking place in South African society This publication is but one attempt to intervene and participate in those conversations and adds to the growing voice calling for a socially responsive and historically grounded intellectual tradition in South Africa About the Editor Karin van Marle is a Professor at the Department of Legal History Comparative Law and Jurisprudence at the Faculty of Law University of Pretoria Joel Modiri

*Race, Ideology, and the Polarization of America in the Age of the Obama Presidency* Blanchard Onanga Ndjila, 2024-07-05 The author contends that the 2008 election of President Barack Obama and his subsequent 2012 re election were viewed as transformative events that should lead America into a post modern post racial and post ideological America That idealized vision of America turned out to be the incorrect With the shift in demography coupled with white American conservatives and Republicans fear of losing America to minorities especially to Blacks Obama s presidency failed to transform America into a post racial nation The author argues that America became more rather than less racially and ideologically polarized exacerbated by identity politics between Liberals and Conservatives as well as between Democrats and Republicans The incompatible and ultimately unreconcilable perception of America made no room for effective collaboration between Obama and Republicans and has led to subsequent problems and tensions

*Race in North America* Audrey Smedley, 2018-04-20 This sweeping work traces the idea of race for more than three centuries to show that race is not a product of science but a cultural invention that has been used variously and opportunistically since the eighteenth century Updated throughout the fourth edition of this renowned text includes a compelling new chapter on the health impacts of the racial worldview as well as a thoroughly rewritten chapter that explores the election of Barack Obama and its implications for the meaning of race in America and the future of our racial ideology
