Race And Practice In Archaeological Interpretation:

Race and Practice in Archaeological Interpretation Charles E. Orser, Jr., 2013-04-19 Scholars who investigate race a label based upon real or perceived physical differences realize that they face a formidable task The concept has been contested and condoned debated and denied throughout modern history Presented with the full understanding of the complexity of the issue *Race and Practice in Archaeological Interpretation* concentrates on the archaeological analysis of race and how race is determined in the archaeological record Most archaeologists even those dealing with recent history have usually avoided the subject of race yet Charles E Orser Jr contends that its study and its implications are extremely important for the science of archaeology Drawing upon his considerable experience as an archaeologist and using a combination of practice theory as interpreted by Pierre Bourdieu and spatial theory as presented by Henri Lefebvre Orser argues for an explicit archaeology of race and its interpretation The author reviews past archaeological usages of race including a case study from early nineteenth century Ireland and explores the way race was used to form ideas about the Mound Builders the Celts and Atlantis He concludes with a proposal that historical archaeology cast as modern world archaeology should take the lead in the archaeological analysis of race because its purview is the recent past that period during which our conceptions of race developed

Handbook of Postcolonial Archaeology Jane Lydon, Uzma Z Rizvi, 2016-07 The contributors to this volume themselves from six continents and many representing indigenous and minority communities and disadvantaged countries suggest strategies to strip archaeological theory and practice of its colonial heritage and create a discipline sensitive to its inherent inequalities

People and Things James M. Skibo, Michael Brian Schiffer, 2008-03-12 The study of the human made world whether it is called artifacts material culture or technology has burgeoned across the academy Archaeologists have for centuries led the way and today offer investigators myriad programs and conceptual frameworks for engaging the things ordinary and extraordinary of everyday life This book is an attempt by practitioners of one program Behavioral Archaeology to furnish between two covers some of our basic principles heuristic tools and illustrative case studies Our greater purpose however is to engage the ideas of two competing programs agency practice and evolution in hopes of initiating a dialog We are convinced that there is enough overlap in goals interests and conceptions among these programs to warrant guarded optimism that a more encompassing more coherent framework for studying the material world can result from a concerted effort to forge a higher level synthesis However in engaging agency practice and evolution in Chap 2 we are not reticent to point out conflicts between Behavioral Archaeology and these programs This book will appeal to archaeologists and anthropologists as well as historians sociologists and philosophers of technology Those who study science technology society interactions may also encounter useful ideas Finally this book is suitable for upper division and graduate courses on anthropological theory archaeological theory and the study of technology

Evidential Reasoning in Archaeology Robert Chapman, Alison Wylie, 2016-10-06 How do archaeologists work with the

data they identify as a record of the cultural past How are these data collected and construed as evidence What is the impact on archaeological practice of new techniques of data recovery and analysis especially those imported from the sciences To answer these questions the authors identify close to the ground principles of best practice based on an analysis of examples of evidential reasoning in archaeology that are widely regarded as successful contested or instructive failures They look at how archaeologists put old evidence to work in pursuit of new interpretations how they construct provisional foundations for inquiry as they go and how they navigate the multidisciplinary ties that make archaeology a productive intellectual trading zone This case based approach is predicated on a conviction that archaeological practice is a repository of considerable methodological wisdom embodied in tacit norms and skilled expertise wisdom that is rarely made explicit except when contested and is often obscured when questions about the status and reach of archaeological evidence figure in high profile crisis debates

Phillippi, 2020-11-15 In Archaeologies of Violence and Privilege archaeologists Christopher N Matthews and Bradley D Phillippi bring together a collection of authors who document the ways in which past social formations rested on violent acts and reproduced violent social and cultural structures

A Historical Archaeology of Early Spanish Colonial Urbanism in Central America William R. Fowler, 2022-01-04 In this milestone work William Fowler uses archaeology history and social theory to show that the establishment of cities was essential to Spanish colonialism Fowler draws upon decades of archaeological research on the landscape built environment and architecture of Ciudad Vieja a sixteenth century site located in present day El Salvador and

the best preserved Spanish colonial city in Latin America Fowler compares Ciudad Vieja to other urban sites in the region and to the tradition of urbanism in early modern Spain to determine how the Spanish grid plan layout was modified and implemented in the Americas Using extensive archival material Fowler describes how this layout reflected and perpetuated power structures that benefited the Spanish although the city's Indigenous population was greater in number Fowler analyzes recorded interactions between colonists Indigenous peoples and enslaved Africans to demonstrate the ways the cityscape affected the relationships among individuals and cultural groups Offering an unparalleled view into a critical moment in Latin American history this book offers new ways of looking at urbanism and colonialism as intertwined forces in the emergence of the early modern world *Anglo-Saxon Studies in Archaeology and History* 14 Sarah Semple, Howard Williams, 2007-10-10 Volume 14 of the Anglo Saxon Studies in Archaeology and History series is dedicated to the archaeology of early medieval death burial and commemoration Incorporating studies focusing upon Anglo Saxon England as well as research encompassing western Britain Continental Europe and Scandinavia this volume originated as the proceedings of a two day conference held at the University of Exeter in February 2004 It comprises of an Introduction that outlines the key debates and new approaches in early medieval mortuary archaeology followed by eighteen innovative research papers offering new interpretations of the material culture monuments and landscape context of early medieval mortuary practices Papers contribute to a variety of ongoing debates including the study of ethnicity religion ideology and social memory from burial evidence The volume also contains two cemetery reports of early Anglo Saxon cemeteries from Cambridgeshire

International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Ethnic Ambiguity and the African Past Francois G Richard, Kevin C MacDonald, 2016-07-01 The collective inquiries in this volume address ethnicity in ancient Africa as social fact and political artifact along numerous dimensions Is ethnicity a useful analytic What can archaeology say about the kinds of deeper time questions which scholars have asked of identities in Africa Eleven authors engage with contemporary anthropological historical and archaeological perspectives to examine how ideas of self understanding belonging and difference in Africa were made and unmade They examine how these intersect with other salient domains of social experience states landscapes discourses memory technology politics and power The various chapters cover broad geographic and temporal ground following an arc across Senegal Mali Nigeria Cameroon the Democratic Republic of Congo Rwanda and East Africa spanning from prehistory to the colonial period

The Oxford Handbook of the History of Archaeology Margarita Díaz-Andreu, Laura Coltofean, 2024 The Oxford Handbook of the History of Archaeology offers comprehensive perspectives on the origins and developments of the discipline of archaeology and the direction of future advances in the field Written by thirty six archaeologists and historians from all over the world it covers a wide range of themes and debates including biographical accounts of key figures scientific techniques and archaeological

fieldwork practices institutional contexts and the effects of religion nationalism and colonialism on the development of archaeology

Modes of Production and Archaeology Robert M. Rosenswig, Jerimy J. Cunningham, 2017-05-15 This volume challenges the historical materialistic non capitalist modes that are used by archaeologists as not all that useful and instead considers how social labor is organized to transform nature into culturally refined and useful resources and how this can either maintain or change a culture Rather than describe what a society is using the theoretical framework of Marx and materialism a mode of production approach explores what a society does in a more dynamic sense

Archaeologies of African American Life in the Upper Mid-Atlantic Michael J. Gall, Richard F. Veit, 2017-10-17 New scholarship provides insights into the archaeology and cultural history of African American life from a collection of sites in the Mid Atlantic

The Dead Tell Tales Maria Cecilia Lozada, Barra O'Donnabhain, 2013-12-31 Honoring Jane Buikstra's pioneering work in the development of bioarchaeological research the essays in this volume stem from a symposium held at the annual meeting of the Society for American Archaeology Multiple generations of Buikstra's former doctoral students and other colleagues gathered to discuss the impact of her mentorship The essays are remarkable for their breadth in terms of both the topics discussed and the geographical range they cover The contributions highlight the dynamism of bioarchaeology which owes so much to the strong foundations laid down over the last few decades The volume documents the degree to which bioarchaeological approaches have become normalized and integrated into anthropological research bioarchaeology has moved out of the appendix and into the interpretation of archaeological data New perspectives have emerged partly in response to theoretical changes within anthropology but also as a result of the engagement of the broader discipline with bioarchaeology

Historical Archaeology Charles E. Orser, Jr., 2016-08-05 This book provides a short readable introduction to historical archaeology which focuses on modern history in all its fascinating regional cultural and ethnic diversity Accessibly covering key methods and concepts including fundamental theories and principles the history of the field and basic definitions Historical Archaeology also includes a practical look at career prospects for interested readers Orser discusses central topics of archaeological research such as time and space survey and excavation methods and analytical techniques encouraging readers to consider the possible meanings of artifacts Drawing on the author's extensive experience as an historical archaeologist the book's perspective ranges from the local to the global in order to demonstrate the real importance of this subject to our understanding of the world in which we live today The third edition of this popular textbook has been significantly revised and expanded to reflect recent developments and discoveries in this exciting area of study Each chapter includes updated case studies which demonstrate the research conducted by professional historical archaeologists With its engaging approach to the subject Historical Archaeology continues to be an ideal resource for readers who wish to be introduced to this rapidly expanding global field

An Archaeology of the English Atlantic World, 1600 - 1700 Charles E. Orser, Jr., 2018-07-05 An Archaeology of the British Atlantic World 1600 1700 is the first book to apply the

methods of modern world archaeology to the study of the seventeenth century English colonial world Charles E Orser Jr explores a range of material evidence of daily life collected from archaeological excavations throughout the Atlantic region including England Ireland western Africa Native North America and the eastern United States He considers the archaeological record together with primary texts by contemporary writers Giving particular attention to housing fortifications delftware and stoneware Orser offers new interpretations for each type of artefact His study demonstrates how the archaeological record expands our understanding of the Atlantic world at a critical moment of its expansion as well as to the development of the modern Western world Historical Archaeology of the Delaware Valley, 1600-1850 Richard Veit, David Orr, 2014-02-01 The Delaware Valley is a distinct region situated within the Middle Atlantic states encompassing portions of Delaware Pennsylvania New Jersey and Maryland With its cultural epicenter of Philadelphia its surrounding bays and ports within Maryland and Delaware and its conglomerate population of European settlers Native Americans and enslaved Africans the Delaware Valley was one of the great cultural hearths of early America The region felt the full brunt of the American Revolution briefly served as the national capital in the post Revolutionary period and sheltered burgeoning industries amidst the growing pains of a young nation Yet despite these distinctions the Delaware Valley has received less scholarly treatment than its colonial equals in New England and the Chesapeake region In Historical Archaeology of the Delaware Valley 1600 1850 Richard Veit and David Orr bring together fifteen essays that represent the wide range of cultures experiences and industries that make this region distinctly American in its diversity From historic period American Indians living in a rapidly changing world to an archaeological portrait of Benjamin Franklin from an eighteenth century shipwreck to the archaeology of Quakerism this volume highlights the vast array of research being conducted throughout the region Many of these sites discussed are the locations of ongoing excavations and archaeologists and historians alike continue to debate the region's multifaceted identity The archaeological stories found within Historical Archeology of the Delaware Valley 1600 1850 reflect the amalgamated heritage that many American regions experienced though the Delaware Valley certainly exemplifies a richer experience than most it even boasts the palatial home of a king Joseph Bonaparte elder brother of Napoleon and former King of Naples and Spain This work thoroughly based on careful archaeological examination tells the stories of earlier generations in the Delaware Valley and makes the case that New England and the Chesapeake are not the only cultural centers of colonial America Karl Marx, Anthropologist Thomas C. Patterson, 2020-05-31 After being widely rejected in the late 20th century the work of Karl Marx is now being reassessed by many theorists and activists Karl Marx Anthropologist explores how this most influential of modern thinkers is still highly relevant for Anthropology today Marx was profoundly influenced by critical Enlightenment thought He believed that humans were social individuals that simultaneously satisfied and forged their needs in the contexts of historically particular social relations and created cultures Marx continually refined the empirical philosophical and practical dimensions of his anthropology throughout his lifetime

Assessing key concepts from the differences between class based and classless societies to the roles of exploitation alienation and domination in the making of social individuals Karl Marx Anthropologist is an essential guide to Marx s anthropological thought for the 21st century
