Race For The Rhine:

The Race for the Rhine Alexander McKee, 1979 The Race for the Rhine Bridges: 1940, 1944, 1945 Alexander McKee, 1971 The Rhine is Germany's main commercial highway containing many of its major ports. In war it is vital for the Germans to push an enemy to outflank the entire river barrier preparatory to taking the industrial target. During World War II there were three great Rhine campaigns the last which was the Allies' final push for the victory and the Germans' last hope of resistance. The soldiers who went forward to the attack or counterattack or who dropped from the skies were of many nationalities: Dutch, French, German, British, Canadian, and American. As the Germans lost ground the inevitable order to blow the bridges behind them came. Hitler ordered that any officer who failed to blow a bridge in time was to be shot. But he complicated the difficult decision by adding that anyone who blew a Rhine bridge too early was also to be shot. Taken from dust jacket **The Race for the Rhine** Alexander McKee, 1979-03 *The Races of Men: a Philosophical Enquiry Into the Influence of Race Over the Destinies of Nations* Robert Knox, 1862 Patton's Forward Observers John K. Rieth, 2004-06 Patton's Forward Observers is a story told by a unique collection of highly trained artillery observers who fought every step of the war with Patton's famed Third Army. We remember Patton today only through the service of men like these. This is a soldier's story. Derived from wartime letters and oral histories told by the veterans themselves, we see the classic American Army experience of World War II: the friendships, courage, terror, carnage, humor, and ultimate victory that all part of the Patton legend, a legend built by soldiers. **Race, Ethnicity and Applied Bioanthropology**, 2009-04-20 NAPA Bulletin is a peer-reviewed occasional publication of the National Association for the Practice of Anthropology dedicated to the practical problem solving and policy applications of anthropological knowledge and methods. peer-reviewed publication of the National Association for the Practice of Anthropology dedicated to the practical problem solving and policy applications of anthropological knowledge and methods. most editions available for course adoption Race to the Rhine Leo Marriott, Simon Forty, 2015-03-19 The speed of the German Blitzkrieg in 1940 and the relative ease with which they brushed aside Allied defenses meant four years of occupation. But in June 1944 this time with American forces the Allies finally returned for a rematch. *Race to the Rhine* a companion volume to *The Normandy Battlefields* links modern aerial photography with contemporaries. *Race, Nation, History* Oded Y. Steinberg, 2019-08-02 In *Race, Nation, History* Oded Y. Steinberg examines the way a series of nineteenth-century scholars in England and Germany first constructed and then questioned the periodization of history into ancient, medieval, and modern eras, shaping the way we continue to think about the past and present of Western civilization at a fundamental level. Steinberg explores this topic by tracing the deep connections between the idea of epochal periodization and concepts of race and nation that were prevalent at the time, especially the role that Germanic or Teutonic tribes were assumed to play in the unfolding of Western history. Steinberg shows how English scholars such as Thomas Arnold, William Stubbs, and John Richard Green and German scholars such as Christian Karl Josias von

Bunsen Max Müller and Reinhold Pauli built on the notion of a shared Teutonic kinship to establish a correlation between the division of time and the ascent or descent of races or nations For example although they viewed the Germanic tribes conquest of the Roman Empire in A D 476 as a formative event that symbolized the transformation from antiquity to the Middle Ages they did so by highlighting the injection of a new and dominant ethnoracial character into the decaying empire But they also rejected the idea that the fifth century A D was the most decisive era in historical periodization advocating instead for a historical continuity that emphasized the significance of the Germanic tribes influence on the making of the nations of modern Europe Concluding with character studies of E A Freeman James Bryce and J B Bury Steinberg demonstrates the ways in which the innovative schemes devised by this community of Victorian historians for the division of historical time relied on the cornerstone of race
