Law and Society Approaches to Cyberspace Paul Schiff Berman, 2017-11-28 During the past decade the rise of online communication has proven to be particularly fertile ground for academic exploration at the intersection of law and society Scholars have considered how best to apply existing law to new technological problems but they also have returned to first principles considering fundamental questions about what law is how it is formed and its relation to cultural and technological change This collection brings together many of these seminal works which variously seek to interrogate assumptions about the nature of communication knowledge invention information sovereignty identity and community From the use of metaphor in legal opinions about the internet to the challenges posed by globalization and deterritorialization to the potential utility of online governance models to debates about copyright free expression and privacy this collection offers an invaluable introduction to cutting edge ideas about law and society in an online era In addition the introductory essay both situates this work within the trajectory of law and society scholarship and summarizes the major fault lines in ongoing policy debates about the regulation of online activity

Artificial Intelligence and International Conflict in Cyberspace Fabio Cristiano, Dennis Broeders, François Delerue, Frédérick Douzet, Aude Géry, 2023-05-11 This edited volume explores how artificial intelligence AI is transforming international conflict in cyberspace Over the past three decades cyberspace developed into a crucial frontier and issue of international conflict However scholarly work on the relationship between AI and conflict in cyberspace has been produced along somewhat rigid disciplinary boundaries and an even more rigid sociotechnical divide wherein technical and social scholarship are seldomly brought into a conversation This is the first volume to address these themes through a comprehensive and cross disciplinary approach With the intent of exploring the question what is at stake with the use of automation in international conflict in cyberspace through AI the chapters in the volume focus on three broad themes namely 1 technical and operational 2 strategic and geopolitical and 3 normative and legal These also constitute the three parts in which the chapters of this volume are organised although these thematic sections should not be considered as an analytical or a disciplinary

The Oxford Handbook of Feminist Theory Lisa Disch, Mary Hawkesworth, 2018-02-01 The Oxford Handbook of Feminist Theory provides a rich overview of the analytical frameworks and theoretical concepts that feminist theorists have developed to analyze the known world. Featuring leading feminist theorists from diverse regions of the globe, this collection delves into forty-nine subject areas demonstrating the complexity of feminist challenges to established knowledge while also engaging areas of contestation within feminist theory. Demonstrating the interdisciplinary nature of feminist theory, the chapters offer innovative analyses of topics central to social and political science, cultural studies, and humanities discourses associated with medicine and science and issues in contemporary critical theory that have been transformed through feminist theorization. The handbook identifies limitations of key epistemic assumptions that inform traditional scholarship and shows how theorizing from women's and men's lives has profound effects on the conceptualization of central categories, whether the field of analysis is aesthetics, biology, cultural studies, development, economics, film studies, health, history, literature, politics, religion, science studies, sexualities, violence, or war.

LIFE LINES Gongle Shanks, 2013-07-24 Gongle Shanks always stood on his head. He slept that way, never went to bed. He did not like to stand on his feet. Or sit on a stool or a comfy seat. His behaviour was odd, and some did say, 'Why stand on your head all night and all day?' Gongle's answer was simple and not that profound: 'The world looks better upside down. I've seen this place from top to bottom. But upside down it's not so rotten. I dislike this land; it's in a tangle. It looks so much better from this angle. But people simply passed him by. Looked on in wonder and did not try to stop him from his strange behaviour. After all, it was a sight to savour.'

Racing Cyberculture Christopher L. McGahan, 2013-10-31 Racing Cyberculture explores new media art that challenges the race-blind myth of cyberspace. The particular cultural workers whose productions are addressed are the performance and installation artist Guillermo Gomez-Pena and Roberto Sifuentes, the UK new media arts collective Mongrel, the conceptual artists and composer Keith Obadike, and the multimedia artist Prema Murthy. The author looks at how works by these artists bring forward questions of racial and cultural identity as they intersect with information technology.

Cyber Environment and International Politics Hasret Çomak, Burak Şakir Şeker, Yaprak Civelek, Çağla Arslan Bozkuş, 2022-11-27 Actors in the cyber sphere include countries, armed forces, intelligence organizations, legal authorities, and natural and legal persons. Cyber War is defined as the intrusion by one state to destroy or disrupt the computer systems or networks of another state. It is defined as the sort of warfare in which computer systems are employed to damage or destroy adversary systems. In the United Nations Glossary, in the same way as information warfare, cyber warfare moves at a breakneck speed. It's a global phenomenon that occurs before the traditional battleground. In order to counter cyber crimes and related issues, more studies are needed to

improve our understanding inform policies and develop and strengthen cooperation between individuals institutions and countries All states need to take constitutional legal technical and administrative measures on cybersecurity For this purpose national virtual environment security policies should be developed and constantly updated National information security should be given utmost importance A cyber security awareness culture should be established and supported by regional and global international institutions and organizations A common understanding on cyber security needs to be adopted at all levels
