Race To The Bottom:

Race to the Bottom Azfar Shafi,Ilyas Nagdee,2022-06-20 Antiracist movements are more mainstream than ever before Liberal democracies boast of their policies designed to stamp out racism in all walks of life Why then is racism still ever present in our society This is not an accident but by design Capitalism is structured by racism and has relentlessly attacked powerful movements Race to the Bottom traces our current crisis back decades to the fragmentation of Britain s Black Power movements and their absorption into NGOs and the Labour Party The authors call for recovering radical histories of antiracist struggle championing modern activism and infusing them with the urgency of our times replacing anxieties over unconscious bias and rival claims for representation with the struggle for a new socialist multi racial organising from below

Race to the Bottom LaFleur Stephens-Dougan,2020-07-31 African American voters are a key demographic to the modern Democratic base and conventional wisdom has it that there is political cost to racialized dog whistles especially for Democratic candidates However politicians from both parties and from all racial backgrounds continually appeal to negative racial attitudes for political gain Challenging what we think we know about race and politics LaFleur Stephens Dougan argues that candidates across the racial and political spectrum engage in racial distancing or using negative racial appeals to communicate to racially moderate and conservative whites the overwhelming majority of whites that they will not disrupt the racial status quo Race to the Bottom closely examines empirical data on racialized partisan stereotypes to show that engaging in racial distancing through political platforms that do not address the needs of nonwhite communities and charged rhetoric that targets African Americans immigrants and others can be politically advantageous Racialized communication persists as a well worn campaign strategy because it has real electoral value for both white and black politicians seeking to broaden their coalitions Stephens Dougan reveals that claims of racial progress have been overstated as our politicians are incentivized to employ racial prejudices at the expense of the most marginalized in our society

Race to the Bottom of the Earth Rebecca E. F. Barone,2021-01-05 Equal parts adventure and STEM Rebecca E F Barone s Race to the Bottom of the Earth Surviving Antarctica is a thrilling nonfiction book for young readers chronicling two treacherous groundbreaking expeditions to the South Pole and includes eye catching photos of the Antarctic landscape Riveting I raced to the end of this book Alan Gratz New York Times bestselling author of Refugee In 1910 Captain Robert Scott prepared his crew for a trip that no one had ever completed a journey to the South Pole He vowed to get there any way he could even if it meant looking death in the eye Then not long before he set out another intrepid explorer Roald Amundsen set his sights on the same goal Suddenly two teams were vying to be the first to make history what was to be an expedition had become a perilous race In 2018 Captain Louis Rudd readied himself for a similarly grueling task the first unaided unsupported solo crossing of treacherous Antarctica But little did he know that athlete Colin O Brady was training for the same trek and he was determined to beat Louis to the finish line For fans of Michael Tougias The Finest Hours this gripping account of two history

making moments of exploration and competition is perfect for budding scientists survivalists and thrill seekers A nail biting tale of adventure tragedy and superhuman determination and also a luminous example of how our present lives are shaped by our immeasurably deep connection to our past Elizabeth Wein 1 New York Times bestselling author of Code Name Verity A huge treat for adventure story fans not one but two incredible races across the fearsome and fascinating Antarctic Steve Sheinkin New York Times bestselling author of Bomb and Undeclared Race to the Top and Race to the Bottom: Tax Competition in Rural China Xiaobo Zhang, 2008 **A Race to the Bottom of Crazy** Richard Grant, 2025-09-30 Bestselling author Richard Grant delves into the heart of Arizona exploring its complex political issues climate change challenges and immigration dynamics to reveal the intricate forces shaping its identity and future When Richard Grant and his wife moved with their four year old daughter back to Tucson Arizona where the couple first met he expected to easily rekindle his love of the region Instead he found a housing market gone haywire rampant election conspiracies and right wing political violence alarmingly close to his home and family Undocumented immigration was surging and the state was also on the front lines of climate change breaking heat and drought records and running out of long term water supplies Under these circumstances Grant wondered how he might raise a happy well adjusted child who believes in the future Yet these concerns weren't keeping people away Arizona was simultaneously experiencing some of the nation's highest population growth In **A Race to the Bottom of Crazy** Grant mixes memoir research and reporting in a quest to understand what makes Arizona such a confounding and irresistible place He visits the world's largest machine gun shoot takes a sunset boat cruise with a US Congressman and a group of far right patriots rides through the desert with a Border Patrol agent and goes camping with his family in breathtaking mountain ranges that rise out of the desert like islands in the sky Interspersed with these adventures are recollections of his previous stint in the state including his friendship with cult writer Charles Bowden and years living off the grid with smugglers dope farmers and outlaws on the Mexican border Ultimately Grant arrives at the conclusion that Arizona has always been a scattershot improvisation with bizarre and extreme behavior in its DNA This book is an entertaining illuminating and essential guide to understanding modern America at its most overheated **Racing to the Bottom?** Kathryn Harrison, 2011-11-01 The spectre of a race to the bottom is increasingly prominent in debates about globalization and also within federal systems where the mobility of both capital and individuals prompts fears of interjurisdictional competition with respect to taxes and environmental and welfare standards While there has been no shortage of either political rhetoric or academic theorizing on this subject empirical studies have been in shorter supply This volume seeks to fill that gap by asking Are Canadian provinces engaged in a race to the bottom and if so what are the consequences The contributors apply insights from economics and political science to several policy fields What emerges is a theoretical and empirical picture of interprovincial competition that shows it to be more complex than the popular image of a race to the bottom and that also contradicts predictions of an inexorable downward spiral This timely practical volume will be

of interest to public policy practitioners as well as to students and scholars of economics and political science

Racing to the Bottom? David Wheeler, 2001 Critics of free trade have raised the specter of a race to the bottom in which environmental standards collapse because polluters threaten to relocate to pollution havens in the developing world The flaw in the race to the bottom model is that its basic assumptions misrepresent the political economy of pollution control in developing countries

Green Leviathan Inger Weibust, 2016-04-22 The US Switzerland and Canada are wealthy democracies that should be conducive to effective decentralized or cooperative environmental policy making However a closer examination of their environmental policy over many decades finds no evidence that these approaches have worked So does it matter which level of government makes policy Can cooperation between sub national governments protect the environment Building on comparative case studies on air and water pollution and making use of extensive historical material Inger Weibust questions how governance structure affects environmental

policy performance in the US Switzerland Canada and the European Union The research breaks new ground by studying formal and informal environmental cooperation It analyzes whether federal systems with more centralized policy making produce stricter environmental policies and debates whether devolution and the establishment of subsidiaries will lead to less environmental protection An essential insight into the complexities of policy making and governance structures this book is an important contribution to the growing debates surrounding comparative federalism and multi level governance

contemporary welfare policies reflect the realities of the economy and the needs of those in need of public assistance or are they based on outdated and idealized notions of work and family life Are we are moving from a war on poverty to a war against the poor In this critique of American social welfare policy Sanford F Schram explores the cultural anxieties over the putatively deteriorating American work ethic and the class race sexual and gender biases at the root of current policy and debates Schram goes beyond analyzing the current state of affairs to offer a progressive alternative he calls radical incrementalism whereby activists would recreate a social safety net tailored to the specific life circumstances of those in need His provocative recommendations include a series of programs aimed at transcending the prevailing pernicious distinction between social insurance and public assistance so as to better address the needs of single mothers with children Such programs could include divorce insurance or even some form of pregnancy insurance for women with no means of economic support By pushing for such programs Schram argues activists could make great strides towards achieving social justice even in today s reactionary climate
