Race Politics:

Race, Politics, and Reconstruction Rory McGovern, Ronald G. Machoian, 2024-10-11 The first in depth study of racial integration at West Point after the Civil War Race Politics and Reconstruction tells the story of racial integration at the United States Military Academy after the Civil War and spotlights the social environment and cultural currents that led to its failure The first attempt to racially integrate West Point proved not simply a lost opportunity but an opportunity sabotaged with shocking degrees of forethought and deliberation By investigating West Point's experience with race from varied and nuanced perspectives including those of the first Black cadets the US Army officer corps white cadets the Academy s faculty and staff and the Black and white American publics the contributors to this volume cast both the promise and the failure of integration at West Point as an illuminating microcosm of Reconstruction itself Contributors Jonathan D Bratten Army National Guard Makonen A Campbell United States Military Academy Adam H Domby Auburn University Le Trice Donaldson Auburn University Louisa Koebrich US Army North Ronald G Machoian University of Wisconsin Madison Cameron McCoy US Naval War College Rory McGovern United States Military Academy Amanda M Nagel US Army Command and General Staff College Race, Politics, and Memory Catherine M. Lewis, J. Richard Lewis, 2007-10-01 Catherine M Lewis is an associate professor of history and women's studies at Kennesaw State University and special projects coordinator for the Atlanta History Center She is the author of a number of books most recently Don t Ask What I Shot How Eisenhower's Love of Golf Helped Shape 1950s America Race, Politics and Social Change Les Back, John Solomos, 2002-01-31 Drawing on a wealth of original sources including interviews with politicians and activists this book explores the changing contours of the politics of race in the present social and political environment The volume seeks to go beyond abstract generalisations in order to develop an account which takes seriously the everyday processes that have shaped social understandings of race and politics in British society At the same time it links up to the broader debates about the impact of multiculturalism on contemporary politics the role of minorities in political life and the limits of democratic government Its account of the role of black politicians within the context of party politics will be of particular appeal to those interested in the interplay between mobilisation and the development of racial justice and equality Race Politics and Social Change will appeal to students of British Politics and Society and to all those with interests in the politics of race **Race Politics in Britain and France** Erik Bleich, 2003-05-26 Britain and France have developed substantially different policies to manage racial tensions since the 1960s in spite of having similar numbers of post war ethnic minority immigrants This book provides the first detailed historical exploration of race policy development in these two countries In this path breaking work Bleich argues against common wisdom that attributes policy outcomes to the role of powerful interest groups or to the constraints of existing institutions instead emphasizing the importance of frames as widely held ideas that propelled policymaking in different directions British policymakers framing of race and racism principally in North American terms of color discrimination

encouraged them to import many policies from across the Atlantic For decades after WWII by contrast French policy leaders framed racism in terms influenced largely by their Vichy past which encouraged policies designed primarily to counter hate speech while avoiding the recognition of race found across the English Channel Race, Politics, and Education in Brazil Rosana Heringer, Ollie Johnson, Ollie A. Johnson III, 2016-04-29 Brazil has undertaken affirmative action in its universities on an unprecedented scale An expert group of international scholars puts the new policies in historical political and legal context evaluates their outcomes for students and universities and demonstrates that the policies have been successful in The Collected Works of Langston Hughes: Essays on art, race, politics, and world addressing racial inequality affairs Langston Hughes, Dolan Hubbard, Leslie Catherine Sanders, 2001 The sixteen volumes are published with the goal that Hughes pursued throughout his lifetime making his books available to the people Each volume will include a biographical and literary chronology by Arnold Rampersad as well as an introduction by a Hughes scholar lume introductions will provide contextual and historical information on the particular work *In the Shadow of Race* Victoria Hattam, 2007-09-15 Race in the United States has long been associated with heredity and inequality while ethnicity has been linked to language and culture In the Shadow of Race recovers the history of this entrenched distinction and the divisive politics it engenders Victoria Hattam locates the origins of ethnicity in the New York Zionist movement of the early 1900s In a major revision of widely held assumptions she argues that Jewish activists identified as ethnics not as a means of assimilating and becoming white but rather as a way of defending immigrant difference as distinct from race rooted in culture rather than body and blood Eventually Hattam shows the Immigration and Naturalization Service and the Census Bureau institutionalized this distinction by classifying Latinos as an ethnic group and not a race But immigration and the resulting population shifts of the last half century have created a political opening for reimagining the relationship between immigration and race How to do so is the question at hand In the Shadow of Race concludes by examining the recent New York and Los Angeles elections and the 2006 immigrant rallies across the country to assess the possibilities of forging a more robust alliance between immigrants and African Americans Such an alliance is needed Hattam argues to more effectively redress the persistent inequalities in American life African American Perspectives on Political Science Wilbur C. Race, Power, and Political Emergence in Memphis Sharon D. Wright, 2021-12-12 Race Power and Political Emergence in Memphis examines black political behavior and empowerment

strategies in the city of Memphis Each chapter of the text focuses on three themes mobilization emergence and incorporation By analyzing the effects of race on black political development in Memphis scholars will be able to examine broader questions about its effects in other cities How do political machines use substantial black electorates to their advantage What forms of protest do black communities conduct to rebel against machine rule What primary mobilization tactics have black citizens used during the different periods of their political development Why do blacks mobilize more quickly in some cities In cities with large and predominantly black populations what elements prevent black candidates from winning citywide races What constraints do newly elected black mayors face What benefits do black citizens gain from their representation After a predominantly black governing coalition is elected what obstacles remain Can black citizens translate proportional representation into strong political incorporation How much power can African Americans realistic expect to gain in cities This book is the most comprehensive case study of the city's political scene written to date The text primarily shows that white racism is not the only obstacle to black political development Black citizens can have population majorities but lose elections for other reasons Their ability to win elections and gain full incorporation depends heavily on whether they minimize internal conflict and establish coalitions with middle class citizens and the business establishment Race Policy Robert Lieberman, 2011-06-27 Shaping Race Policy investigates one of the most serious policy challenges facing the United States today the stubborn persistence of racial inequality in the post civil rights era Unlike other books on the topic it is comparative examining American developments alongside parallel histories of race policy in Great Britain and France Focusing on on two key policy areas welfare and employment the book asks why America has had such uneven success at incorporating African Americans and other minorities into the full benefits of citizenship Robert Lieberman explores the historical roots of racial incorporation in these policy areas over the course of the twentieth century and explains both the relative success of antidiscrimination policy and the failure of the American welfare state to address racial inequality He chronicles the rise and resilience of affirmative action including commentary on the recent University of Michigan affirmative action cases decided by the Supreme Court He also shows how nominally color blind policies can have racially biased effects and challenges the common wisdom that color blind policies are morally and politically superior and that race conscious policies are merely second best Shaping Race Policy has two innovative features that distinguish it from other works in the area First it is comparative examining American developments alongside parallel histories of race policy in Great Britain and France Second its argument merges ideas and institutions which are usually considered separate and competing factors into a comprehensive and integrated explanatory approach The book highlights the importance of two factors America's distinctive political institutions and the characteristic American tension between race consciousness and color blindness in accounting for the curious pattern of success and failure in American race policy Whiteness of a <u>Different Color</u> Matthew Frye Jacobson, 1999-09-01 America's racial odyssey is the subject of this remarkable work of

historical imagination Matthew Frye Jacobson argues that race resides not in nature but in the contingencies of politics and culture In ever changing racial categories we glimpse the competing theories of history and collective destiny by which power has been organized and contested in the United States Capturing the excitement of the new field of whiteness studies and linking it to traditional historical inquiry Jacobson shows that in this nation of immigrants race has been at the core of civic assimilation ethnic minorities in becoming American were re racialized to become Caucasian Double Cross Iacalyn Neoliberal Democratization and New Authoritarianism Dennis C.
