

Rachel's Promise

A photograph of a cobblestone path leading through a tunnel towards a bright exit, with two figures walking away in the distance. The path is made of dark, irregular stones and is flanked by low walls. The tunnel's interior is dark, while the exit is a bright, circular opening. Two small figures are visible at the end of the path, walking away from the viewer. The overall mood is mysterious and hopeful.

Word of Promise: a Hand-book to the Promises of Scripture Horatius Bonar,1864 Liberalism and Affirmative Obligation Patricia Smith,1998-11-26 The scope of affirmative obligation is a point of contention among liberals Some see affirmative obligations required by social justice as incompatible with a strong commitment to individual freedom The task before the moderate liberal is then to consider what a consistently liberal view of affirmative obligation would have to be in

order to accommodate liberal commitments to freedom and justice and also account for long standing institutions that are central to liberal democratic society In this book Patricia Smith argues that this can be achieved by reconstructing the liberal doctrine of positive and negative duty She offers a careful consideration of these elements of liberal principles as they relate to affirmative obligation Through an innovative analysis of the institutions of family and contract Smith develops the idea of duties of membership as preferable to natural duties to explain family obligation and as needed to supplement contractual duties to explain professional obligation This idea is then applied to the problem of justifying political obligation She argues that membership obligations implied in cooperative endeavor must supplement obligations of consent that are central to liberal theory This is deftly illustrated through a state of nature theory that includes community membership eliminating atomistic individualism while maintaining consonance with what Smith calls cooperative individualism The resulting view of liberal individualism is consistent complete and capable of handling long standing liberal institutions while taking seriously the demands of affirmative obligations Smiths clear articulation of a liberal view of affirmative obligation finds a middle ground on this polarized topic with compelling and reasoned implications for liberal political philosophy Her discussion will interest students and scholars of legal and political philosophy and political science
