Racial Economy Of Science Toward A Democratic Future:

The "Racial" Economy of Science Sandra Harding, 1993-10-22 The classic and recent essays gathered here will challenge scholars in the natural sciences philosophy sociology anthropology and women's studies to examine the role of racism in the construction and application of the sciences Harding has also created a useful text for diverse classroom settings Library Journal A rich lode of readily accessible thought on the nature and practice of science in society Highly recommended Choice This is an excellent collection of essays that should prove useful in a wide range of STS courses Science Technology and Society important and provocative The Women's Review of Books The timeliness and utility of this large interdisciplinary reader on the relation of Western science to other cultures and to world history can hardly be overemphasized It provides a tremendous resource for teaching and for research Ethics Excellent The Reader's Review Sandra Harding is an intellectually fearless scholar She has assembled a bold impressive collection of essays to make a volume of illuminating power This brilliantly edited book is essential reading for all who seek understanding of the multicultural debates of our age Never has a book been more timely Darlene Clark Hine These authors dispute science's legitimization of culturally approved definitions of race difference including craniology and the measurement of IQ the notorious Tuskegee syphilis experiments and the dependence of Third World research on First World agendas **Toward a Global Science** Susantha Goonatilake, 1998 Asian science such as mathematics Chinese printing gunpowder and the compass all contributed to the development of European science During the last few centuries however scientific contributions with Asian roots have diminished and been marginalized and deligitimised Yet the center of the world economy today is shifting to Asia with shifts in science and technology bound to follow Toward a Global Science is driven by the proposition that pre Renaissance acquisition of Asian knowledge did not exhaust Asian civilization's potential contribution There are many useful elements to modern science still lying hidden in Asian civilizational stores waiting to be mined The author gives details of recent contributions from South Asian medicine mathematics and psychology and explores how South Asian inputs can be useful in navigating the philosophical and ethical problems raised by two dominant technologies of the future namely biotechnology and information technology As an illustrative example it describes how a fruitful marriage of one technology virtual reality with South Asian philosophy can enliven both the technology as well as philosophy It also examines how Asian positions could be used to feed some key contemporary philosophical discussions on science Using a model of the civilizational construction of science the book views science without Eurocentric blinders It documents how science was built initially by transfers from non European civilizations and why the given historiography of science has to be rethought Throughout the book the author gives examples of parallels and antecedents between East and West in science and estimates the potential reservoir of Asian knowledge in each field The book also deals with the many knotty problems in recovering science from past traditions The author distinguishes between his secular efforts from religious and other

attempts that claim the equivalence of all knowledge systems **Beyond Separateness** Richard Schmitt, 2018-02-19 This book examines in great detail the different aspects of dominant individualistic ideas about persons It argues that an alternative conception of persons favored by many feminist thinkers is more complicated than is often thought but can be shown to be a reasonable and plausible conception **Reproducing Racism** Wendy Leo Moore, 2008 Law schools serve as gateway institutions into one of the most politically powerful social fields the profession of law Reproducing Racism is an examination of white privilege and power in two elite United States law schools Moore examines how racial structures racialized everyday practices and racial discourses function in law schools Utilizing an ethnographic lens Moore explores the historical construction of elite law schools as institutions that reinforce white privilege and therefore naturalize white political social and economic power *Materialist Feminism* Rosemary Hennessy, Chrys Ingraham, 1997 During the 1980s capitalism triumphantly secured its global reach anti communist ideologies hammered home socialism's inherent failure the New Left increasingly moved into the professional middle class and many of feminism's earlier priorities were marginalized Identity politics often formulated in terms of social reconstructionism or multiculturalism has increasingly suppressed materialist feminism's systematic perspective replacing it with discourse analysis or cultural politics Materialist Feminism A Reader argues against the retreat to multiculturalism for keeping invisible the material links among the explosion of meaning making practices in highly industrialized social sectors the exploitation of women's labor and the appropriation of women's bodies that continues to undergird the scramble for profits and state power in multinational capitalism *Jesus: Miriam's Child, Sophia's Prophet* Elisabeth Schüssler Fiorenza, 2015-11-19 In *Jesus: Miriam's Child Sophia's Prophet* Elisabeth Schüssler Fiorenza makes a unique contribution to two quite different discussions of Jesus the Christ On the one hand she looks at biblical christology from a critical feminist perspective in the tradition of liberation theology On the other she examines the feasibility of a feminine christology by considering such problems as Christian anti Judaism ideological justification of domination religious exclusivism and the formation of patriarchal identity Reimagining the Jesus movement in a feminist key transcends the boundaries set by history gender and doctrine By assessing various Jesus traditions and interpretations in terms of whether they can engender liberating visions for today Schüssler Fiorenza seeks to challenge and transform a Christianity dominated by masculinity and exclusivist theological frameworks so that it offers a vision of justice and well being for all the central image in which is the reign the coming world of God This Cornerstones edition features a new extended introduction which takes into account the developments in the field since the work was originally published in 1994 *Treating AIDS* Thurka Sangaramoorthy, 2014-03-26 There is an inherently powerful and complex paradox underlying HIV AIDS prevention between the focus on collective advocacy mobilized to combat global HIV AIDS and the staggeringly disproportionate rates of HIV AIDS in many places In *Treating AIDS* Thurka Sangaramoorthy examines the everyday practices of HIV AIDS prevention in the United States from the perspective of AIDS experts and Haitian immigrants in South

Florida Although there is worldwide emphasis on the universality of HIV AIDS as a social political economic and biomedical problem developments in HIV AIDS prevention are rooted in and focused exclusively on disparities in HIV AIDS morbidity and mortality framed through the rubric of race ethnicity and nationality Everyone is at equal risk for contracting HIV AIDS Sangaramoorthy notes but the ways in which people experience and manage that risk and the disease itself is highly dependent on race ethnic identity sexuality gender immigration status and other notions of difference Sangaramoorthy documents in detail the work of AIDS prevention programs and their effect on the health and well being of Haitians a transnational community long plagued by the stigma of being stereotyped in public discourse as disease carriers By tracing the ways in which public knowledge of AIDS prevention science circulates from sites of surveillance and regulation to various clinics and hospitals to the social worlds embraced by this immigrant community she ultimately demonstrates the ways in which AIDS prevention programs help to reinforce categories of individual and collective difference and how they continue to sustain the persistent and pernicious idea of race and ethnicity as risk factors for the disease Is Science Value Free?

Hugh Lacey,2005-06-23 Exploring the role of values in scientific inquiry Hugh Lacey examines the nature and meaning of values and looks at challenges to the view posed by postmodernists feminists radical ecologists Third World advocates and religious fundamentalists that science is value free He also focuses on discussions of development especially in Third World countries This paperback edition includes a new preface **Women, Science, and Technology** Mary Wyer,Mary Barbercheck,Donna Cookmeyer,Hatice Ozturk,Marta Wayne,2013-09-11 Women Science and Technology is an ideal reader for courses in feminist science studies This third edition fully updates its predecessor with a new introduction and twenty eight new readings that explore social constructions mediated by technologies expand the scope of feminist technoscience studies and move beyond the nature culture paradigm

African American Literature in Transition, 1850-1865: Volume 4, 1850-1865 Teresa Zackodnik,2021-05-13 The period of 1850 1865 consisted of violent struggle and crisis as the United States underwent the prodigious transition from slaveholding to ostensibly free nation This volume reframes mid century African American literature and challenges our current understandings of both African American and American literature It presents a fluid tradition that includes history science politics economics space and movement the visual and the sonic Black writing was highly conscious of transnational and international politics textual circulation and revolutionary imaginaries Chapters explore how Black literature was being produced and circulated how and why it marked its relation to other literary and expressive traditions what geopolitical imaginaries it facilitated through representation and what technologies including print enabled African Americans to pursue such a complex and ongoing aesthetic and political project

Race Unmasked Michael Yudell,2014-09-09 *Race* while drawn from the visual cues of human diversity is an idea with a measurable past an identifiable present and an uncertain future The concept of race has been at the center of both triumphs and tragedies in American history and has had a profound effect on the human experience *Race Unmasked* revisits the origins of commonly held beliefs about the scientific nature of racial differences examines the roots of the modern idea of race and explains why race continues to generate controversy as a tool of classification even in our genomic age Surveying the work of some of the twentieth century s most notable scientists *Race Unmasked* reveals how genetics and related biological disciplines formed

and preserved ideas of race and at times racism A gripping history of science and scientists *Race Unmasked* elucidates the limitations of a racial worldview and throws the contours of our current and evolving understanding of human diversity into sharp relief

Civility, Free Speech, and Academic Freedom in Higher Education Reshmi Dutt-Ballerstadt, Kakali Bhattacharya, 2021-05-16 *Civility Free Speech and Academic Freedom in Higher Education* Faculty on the Margins represents a multidisciplinary approach deploying different theoretical methodological sociological political and creative perspectives to articulate the stakes of civility for marginalized faculty within the landscape of higher education How has the discourse on civility and free speech within academia become a systemic and oppressive form of silencing suppressing or eradicating marginal voices What are some overt and covert ways in which institutions are using the logic of civility to control faculty uprising against the increasingly corporate controlled landscape of higher education This collection of essays examines the continuum between the post 9 11 and the post Trump era backlashes It details the organized retaliations against those in academia whose views and scholarships articulate their discontents against the U S led War on Terror It contests the rise of White supremacy Trump s Muslim ban anti immigrant and racist government policies and rhetoric and those who support the Boycott and Divestment Sanctions movements within the corporatized universities All of these new and original essays shed light and further the debate on the various modes of civility that have become politicized within the U S academy It will have a broad appeal to a cross section of national and international academics activist scholars social justice educators and researchers in the field of higher education

Fighting Words Patricia Hill Collins, 1998 A professor of sociology explores how black feminist thought confronts the injustices of poverty and white supremacy and argues that those operating outside the mainstream emphasize sociological themes based on assumptions different than those commonly accepted Original UP

Feminist Interpretations of Aristotle Cynthia A. Freeland, 2010-11-01 Aristotle still influences our abstract thinking our search for principles and our reflections on virtue nature essence and sexual difference Feminists here concede that they too philosophize within the tradition founded by the ancient Greeks The contributors to this volume enter into new creative and subtle dimensions of inquiry about Aristotle from a broader feminist perspective

Heresy in the University Jacques Berlinerblau, 1999 One of the most controversial books to come out of the academy in the last fifteen years is Martin Bernal s *Black Athena* It has been a true cause celebre Afrocentrists have both praised the book and claimed that Bernal stole from the work of black scholars to create his study of the Afroasiatic roots of classical civilization Classicists feel passionately about what they perceive as an attack from an outsider on the origins not only of ancient Greece but of their own discipline It seems that everyone has something to say about the book the question is how many really understand it In *Heresy in the University* Jacques Berlinerblau provides an exegesis of the contents of *Black Athena* making it accessible to a wider audience As he clarifies and restates Bernal s opus Berlinerblau identifies Bernal s flaws in reasoning and gaps in evidence He cuts to the heart of Bernal s prose singling out the key points of Bernal s argument explaining and

arranging them in a cogent manner Berlinerblau addresses the critics really important objections including his own and links each of them to the appropriate substantive argument in *Black Athena*. He goes beyond simple summary and exposition to present the underlying stated and unstated agendas of Bernal and his critics. Ultimately he exposes both sides and asks what the flawed reasoning from all concerned reveals about the stakes in this key academic dispute and what that in turn says about the modern academy. Jacques Berlinerblau is an assistant professor and director of Judaic studies at Hofstra University.

The Right to Science Helle Porsdam, Sebastian Porsdam Mann, 2021-12-02 That everyone has a human right to enjoy the benefits of the progress of science and its applications comes as a surprise to many. Nevertheless this right is pertinent to numerous issues at the intersection of science and society: open access, dual use, science access to ownership and dissemination of data, knowledge, methods and the affordances and applications thereof as well as the role of international cooperation, human dignity and other human rights in relation to science and its products. As we advance towards superintelligence, quantum computing, drone swarms and life extension technology, serious policy decisions will be made at the national and international levels. The human right to science provides an ideal tool to do so, backed up as it is by international law, political heft and normative weight. This book is the first sustained attempt at turning this wonder of foresight into an actionable and justiciable right. This title is also available as Open Access on Cambridge Core. *Black Reflective Sociology* John H. Stanfield, 2011-09-15 John H. Stanfield II, the leading contemporary Black sociologist of knowledge, distills decades of his research and thinking in a set of articles, some original to the volume, others from fugitive sources that address race in the formation of epistemologies, theories and methodologies in social science. Stanfield's contributions to the discipline, such as the adoption of restorative justice as an anti-racism solution in multiracial societies and the development of African diasporic sociological reasoning, are highlighted here. Ranging widely across theoretical, methodological and substantive topics, Stanfield creates a reflective sociology viewed through an African diasporic lens that enriches the thinking and practice of social science.
