Technical and Military Imperatives A Radar History of World War II is a coherent account of the history of radar in the second World War Although many books have been written on the early days of radar and its role in the war this book is by far the most comprehensive covering ground air and sea operations in all theatres of World War II The author manages to synthesize a vast amount of material in a highly readable informative and enjoyable way Of special interest is extensive new material about the development and use of radar by Germany Japan Russia and Great British The story is told without undue technical complexity so that the book is accessible to specialists and nonspecialists alike

Secret Weapons and World War II Walter E. Grunden, 2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East

Deflating British Radar Myths Of World War II Major Gregory C. Clark,2014-08-15 British and Allied memoirs and histories have contributed to the rise of three myths concerning the discovery and employment of radar These myths are as follows The first myth is that Sir Robert Watson Watt is the father and sole inventor of radar The second is that Germany's discovery and realization of radar's military worth occurred after 1940 following exposure to British systems The third myth gives radar the pivotal role in the defeat of the Luftwaffe in the Battle of Britain To deflate these myths the origin of radar is traced from James Maxwell's discovery of radio waves to early radar theorists and inventors Their role in the story of radar illuminates and contributes to the deflation of the radar myths Both the rebirth of the Luftwaffe and evolution of the R A F during the 1920's and 1930's shows how each service independently arrived at the development of radar technology for different reasons In 1939 Germany possessed some of the world's best and most enduring radar designs as well as essential navigation and bombing aids England's Chain Home radar was a dead end technology with serious shortcomings but was skillfully melded to an innovative command and control system The illumination of German radar achievements and a balanced analysis of British defensive systems essentially deflates the radar myths [The Encyclopedia of Weapons of World War II](#) Chris Bishop,2002 The encyclopedia of weapons of world war II is the most detailed and authoritative
