United States. Congress. House. Committee on Armed Services. Subcommittee on Military Procurement,2000 Sparks Over Vietnam Gilles Van Nederveen,2000 This study underscores the important use of electronic intelligence and jamming as an electronic countermeasure Three decades ago the USAF faced a North Vietnamese electronic air defense threat about which little was known Through some extraordinary efforts the USAF ably countered that threat employing an obsolete aircraft the EB 66 only refitted and upgraded for mid 1960s missions Since the aircraft was at the end of its projected lifecycle and a new jammer was on the drawing board the air staff would not fund additional EB 66 modifications and maintenance requirements Parallels are easy to draw with today s jammers as essentially the same situation exists with the EA 6B The number of EB 66 aircraft during the Vietnam War was inadequate to meet both operational and training requirements Thus crews were trained on the job often during combat operations and the boneyard at Davis Monthan was often the site of scavenger hunts for repair parts needed to keep the aircraft aloft The advent of the Pueblo crisis created an additional demand for the EB 66 forcing a partial redeployment of the fleet from Thailand to Korea Training assets were also flown from Shaw to Germany during the same period to monitor the escalating air defense threat in the Warsaw Pact nations Missions and employment doctrine had to change to match electronic counters by adversaries from all directions **U.S. News & World Report** ,1998 Stealth Bombers Bill Sweetman,2001 These books on military aircraft are ideal for students in accelerated reader programs Each book contains full color and historical photos glossary and bibliography Enhanced features include photodiagrams contextual definitions of unfamiliar words and Internet sites for further research
