countrysides Jeremy Macclancy, 2015-06-01 This electronic version has been made available under a Creative Commons BY NC ND open access license A fresh anthropological look at a central but neglected topic the profound changes in rural life throughout Western Europe today As locals leave for jobs in cities they are replaced by neo hippies lifestyle seekers eco activists and labour migrants from beyond the EU With detailed ethnographic examples contributors analyse new modes of living rurally and emerging forms of social organisation As incomers dreams come up against residents realities they detail the clashes and the cooperations between old and new residents They make us rethink the rural urban divide investigate regionalists politicisation of rural life and heritage and reveal how locals use EU monies to prop up or challenge existing hierarchies They expose the consequences of and reactions to grand EU restructuring policies which at times threaten to turn the countryside into a manicured playground for escapee urbanites This book will appeal to anyone seriously interested in the realities of rural life today Culture & Agriculture ,2007 **Companies, Cultures, and the Region** Nick Clifton, Stefan Gartner, Dieter Rehfeld, 2016-04-08 Europe has its strength in regional cultural diversity However current debates surrounding globalisation and the integration of markets tend to focus on the homogenisation of cultures whilst the emergence of vital and innovative regional cultures has typically been neglected This edited collection addresses this gap considering relevant questions such as how strategies orientations values and symbols help a company to become aware of its location and how different regional cultures are of interest to particular types of companies The book s central focus is the interaction of regional and corporate cultures how different cultures come together shape each other and change The volume takes an interdisciplinary approach bringing together research from cultural science regional science social science and economics This book was originally published as a special issue of the journal European Planning Studies Regional Culture and Economic Development Ullrich Kockel, 2002 *Everyday Culture in Europe* Máiréad Nic Craith, 2016-04-15 This book discusses the history and contemporary practice of studying cultures at home by examining Europe s regional or small ethnologies of the past present and future With the rise of nationalism and independence in Europe ethnologies have often played a major role in the nation building process The contributors to this book offer case studies of ethnologies as methodologies showing how they can address key questions concerning everyday life in Europe They also explore issues of European integration and the transnational dimension of culture in Europe today and examine how regional ethnologies can play a crucial part in forming a wider European ethnology as local participants have experience of combining identities within larger regions or nations *The European Puzzle* Marion Demossier, 2007 The twin concepts of Culture and Identity are inescapable in any discussion of European Integration and yet over the last ten years their meaning has become increasingly contested By combining an anthropological and political perspective the authors challenge the traditional boundaries within the issue of the construction of Europe In the first part historians and anthropologists from various

national traditions discuss the process of the construction of Europe and its implications for cultural identities The second section examines a number of topics at the core of the process of Europeanization and presents up to date information on each of these issues political parties regions football cities the Euro ethnicity heritage and European cinema Emphasis is placed on the political structuring of cultural identities by contrasting top down and bottom up processes that define the tensions between the unity and diversity of the European Community *Culture and Economy* Ullrich Kockel, 2019-07-17

This title was first published in 2002 For many regions culture is considered the only viable resource they have for economic development Neo liberalist economics has become the dominant paradigm across a wide range of cultural contexts while the cultural contingency of this paradigm itself has been obscured In offering an empirically grounded anthropological critique of these issues the volume makes an original contribution to the international debate on culture and economy The case studies shed light on everyday practices used to establish culture s economic value and concepts of culture and economy employed by policy decision makers are scrutinized through studies of strategies and policies at various levels Aspects of economy such as the market are examined as cultural constructs in a historical context Illustrated by international case studies the volume provides a compelling and insightful survey of the theories and practices that shape the polyvalent relationships between culture and economy in the twenty first century
