globalized age China - Neighboring Asian Countries Relations Li Xiangyang, 2013-03-01 China has a myriad and diverse range of neighbours who are significant in their own right but are also of global importance Asia accounts for 25% of global GDP This book evaluates the potential for both co operation and conflict within the Asian region Border problems and historical problems are still plaguing countries in the region and are affecting the relations between them China and India have not yet resolved their land frontier issues Furthermore China has maritime disputes with Japan South Korea Vietnam and the Philippines The historical issues among China Japan and South Korea make the cooperation between them lack a basis of political mutual trust Therefore although there are close trade contacts among these countries China Japan and South Korea have not reached any FTA In South Asia because of long term India Pakistan conflicts South Asia s Association for Regional Cooperation SAARC has been useless and is unable to effectively promote regional economic cooperation which is a factor in pushing India to develop towards the East These unstable factors have not only hindered the formation of long term institutional arrangements on economic and trade cooperation within the region but have also caused various unexpected events to disrupt existing cooperation Throughout this book economic data and analysis is provided which gives an insight into the trade and financial links that bind this region together Written by experts in China it gives a fascinating view of China s approach to its neighbours China is assuming a more important role on the world stage but it is important to not forget the key role it plays in its own neighbourhood Future of Regional Cooperation in Asia and the Pacific Bambang Susantono, Cyn-Young Park, 2020-11-01 This book reviews progress with regional cooperation and integration in Asia and the Pacific and explores how it can be reshaped to achieve a more resilient sustainable and inclusive future Consisting of papers contributed by renowned scholars and Asian Development Bank staff the book covers four major areas public goods trade and investment financial cooperation and regional health cooperation The book emphasizes how the region can better leverage regional integration to realize its vast potential as well as overcome challenges such as the coronavirus disease COVID 19 pandemic World Development Report 2009 World Bank, 2008-11-04 Rising densities of human settlements migration and transport to reduce distances to market and specialization and trade facilitated by fewer international divisions are central to economic development The transformations along these three dimensions density distance and division are most noticeable in North America Western Europe and Japan but countries in Asia and Eastern Europe are changing in ways similar in scope and speed World Development Report 2009 Reshaping Economic Geography concludes that these spatial transformations are essential and should be encouraged The conclusion is not without controversy Slum dwellers now number a billion but the rush to cities continues Globalization is believed to benefit many but not the billion people living in lagging areas of developing nations High poverty and mortality persist among the world s bottom billion while others grow wealthier and live longer lives Concern for these three billion often comes with the prescription that growth must be made spatially balanced The WDR has a different message economic growth is seldom balanced and efforts

to spread it out prematurely will jeopardize progress The Report documents how production becomes more concentrated spatially as economies grow proposes economic integration as the principle for promoting successful spatial transformations revisits the debates on urbanization territorial development and regional integration and shows how today's developers can reshape economic geography *Regional Integration and Economic Development in South Asia* Sultan Hafeez Rahman, Sridhar Khatri, Hans-Peter Brunner, 2012-04-01 South Asian leaders have made it a priority to tackle key regional issues such as poverty environment degradation trade and investment barriers and food insecurity among others Energy Market Integration in East Asia Yanrui Wu, Fukunari Kimura, Xunpeng Shi, 2013-12-04 East Asian nations through the dialogue between ASEAN and its partners have been promoting energy market integration EMI for a decade The formation of the East Asian Summit EAS group in 2005 adds new momentum to the EMI course in the region The objective of this edited volume is to present new insights into the understanding of EMI in East Asia and draw implications for further development This book is the first publication of its kind exclusively focusing on EMI in East Asia The chapters are written by a distinguished group of specialists in the field of energy policy business and economics The covered topics range from the general debates about EMI to regional policy responses A variety of qualitative and quantitative methods are employed in this book For qualitative methods public goods theory and the comparative study method are two examples The quantitative methods include economic growth theory principle component approach input output table computable general equilibrium CGE models and econometric techniques Important policy implications can be drawn from the findings One clear message is that EMI should be promoted actively but in a gradual incremental manner Other policy implications are related to inter regional governance infrastructure development and gas market integration The content has not been published elsewhere and hence makes a unique contribution to the literature There are also case studies of specific energy sectors such as petroleum and natural gas Overall this book should be of interest to a wide audience such as academia business analysts and policy makers *Maghreb Regional and Global Integration* Gary Clyde Hufbauer, Claire Brunel, 2008-10-01 Increasing terrorist activity has led the Maghreb countries Morocco Algeria Tunisia Mauritania and Libya to focus on antiterrorism efforts unintentionally at the expense of full fledged economic reform These countries have tightened their border restrictions on the flow of people and goods reducing commerce and depressing economic activity In fact Maghreb has one of the lowest rates of intra regional trade in the world other factors like rigid economic structures slow productivity growth and modest investment levels continue to stymie progress toward economic integration Do these countries diverse circumstances symbolize insurmountable obstacles in achieving economic cooperation and an improved standard of living for citizens How can the United States and European Union facilitate economic progress Maghreb Regional and Global Integration A Dream to Be Fulfilled utilizes two distinct econometric tools to assess four key sectors energy banking and insurance transport and agribusiness and outlines achievable sector specific recommendations This book not only assesses the gains from economic

integration among the Maghreb countries but also focuses on the tangible benefits from enhanced economic ties between the region and the world economy With this critical analysis the authors provide an in depth look at practical measures such as bilateral trade and investment agreements regional arrangements and financial assistance that can significantly boost short term success and ensure long term gains through integration in an unstable region

Fiscal Federalism and Decentralization in Mongolia Ariunaa Lkhagvadorj, 2010 Fiscal federalism has been an important topic among public finance theorists in the last four decades There is a series of arguments that decentralization of governments enhances growth by improving allocation efficiency However the empirical studies have shown mixed results for industrialized and developing countries and some of them have demonstrated that there might be a threshold level of economic development below which decentralization is not effective Developing and transition countries have developed a variety of forms of fiscal decentralization as a possible strategy to achieve effective and efficient governmental structures A generalized principle of decentralization due to the country specific circumstances does not exist Therefore decentralization has taken place in different forms in various countries at different times and even exactly the same extent of decentralization may have had different impacts under different conditions The purpose of this study is to investigate the current state of the fiscal decentralization in Mongolia and to develop policy recommendations for the efficient and effective intergovernmental fiscal relations system for Mongolia Within this perspective the analysis concentrates on the scope and structure of the public sector the expenditure and revenue assignment as well as on the design of the intergovernmental transfer and sub national borrowing The study is based on data for twenty one provinces and the capital city of Mongolia for the period from 2000 to 2009 As a former socialist country Mongolia has had a highly centralized governmental sector The result of the analysis below revealed that the Mongolia has introduced a number of decentralization measures which followed a top down approach and were slowly implemented without any integrated decentralization strategy in the last decade As a result Mongolia became de concentrated state with fiscal centralization The revenue assignment is lacking a very important element for instance significant revenue autonomy given to sub national governments which is vital for the efficient service delivery at the local level According to the current assignments of the expenditure and revenue responsibilities most of the provinces are unable to provide a certain national standard of public goods supply Hence intergovernmental transfers from the central jurisdiction to the sub national jurisdictions play an important role for the equalization of the vertical and horizontal imbalances in Mongolia The critical problem associated with intergovernmental transfers is that there is not a stable predictable and transparent system of transfer allocation The amount of transfers to sub national governments is determined largely by political decisions on ad hoc basis and disregards local differences in needs and fiscal capacity Thus a fiscal equalization system based on the fiscal needs of the provinces should be implemented The equalization transfers will at least partly offset the regional disparities in revenues and enable the sub national governments to provide a national

minimum standard of local public goods *Scarcity, Entitlements, and the Economics of Water in Developing Countries* P. B. Anand, 2010-01-01

It will provide a fascinating and stimulating read for researchers, students and academics with an interest in water economics and public policy. Practitioners focusing on water management, sustainable development, water supply and health will also find this book invaluable. CABI Those seeking an informed overview of the social and economic aspects of water issues in developing contexts today would do well to read P. B. Anand's book. *Scarcity, Entitlements, and the Economics of Water in Developing Countries* is extensive, covering local, sub-national and international aspects of water scarcity, the human right to water, transboundary water disputes and progress on the Millennium Development Goals. It will be of interest to water resource managers, urban water and sanitation policy makers, international donors and students of environmental justice, water issues and development more broadly. Anand's book is recommended as useful and interesting reading, primarily for its broad range and interdisciplinary approach. Mark Zeitoun, *Waterlines*

In this creative study, Anand applies environmental economic tools and concepts to analyze water issues in developing countries. The author carefully integrates the poverty, inequality and development issues of water, and he meticulously discusses the intertwined rivalrous and excludable public good characteristics of water supply. Highly recommended. B. F. Hope, *Choice*

The book eloquently illustrates the economics of water and how economics can increase the understanding of topics such as water inequalities and the role of institutions. It convincingly explores and explains water scarcity, supply and demand to demystify water topics. It commendably presents different views and interpretations on contentious water topics such as large scale dams, transboundary water and privatization of household water supply. In particular, the conceptual framework is helpful in illuminating the interface between water and well-being. The book contains several case studies and water multi-sectors such as dams, water supply and sanitation and water resources, and appeals to a wide readership interested in various water topics and their implementation. H. Kan Tropp, Stockholm International Water Institute (SIWI), Sweden

The author has sought to weave diverse strands of water policy in developing countries into a coherent framework. A multi-country database is used to make the point that scarcity is not the absolute lack of water but the result of policy and management failure. The sustainable access to drinking water, one of the targets of the Millennium Development Goals, as well as consumer preferences for water supply are illustrated with data from the author's research in Chennai, a chronically water-starved Indian city. Resolution of conflict in a river basin is analysed using the case of the Cauvery, an interstate river in India. All these themes are brought together using Sen's Capability approach to highlight the fact that water policy is not a technocratic exercise but a matter of justice and entitlements. Water managers, academicians and civil society groups will benefit from reflecting on the important issues raised by Dr. Anand in this book. Paul Appasamy, Madras School of Economics

Anand's book discusses in detail the economics of water and how societies deal with this scarce resource. The complexities of water, as highlighted in his book, have previously been little explored in any standard economic development textbook. Anand presents a fascinating framework

on water and well being by linking water and the capability approach It is a must read for all those dealing with water issues in particular and development issues in general Naren Prasad United Nations Research Institute for Social Development UNRISD Switzerland This is a very thorough analysis of water s critical role as both a basic human need and an economic good It is unlikely to be surpassed for so
