 BLUE ECONOMY AND BLUE GROWTH FORA A PRELUDE Melih Ba *Winning the Peace* Andrew Carr,2015-01-05
Winning the Peace seeks to explore and explain how Australian governments during the modern period of Australia s
 engagement with Asia from 1983 till today have attempted to use their defence and foreign policies to shape the region While
 there were certainly times of tension during this period such as the spikes around the end of the Cold War and during the
 early years of the War on Terror the region has been largely defined by peace Because of this peace and thanks to Australia s
 relative size as a middle power the government s attempt to change how other states act and think was not sought through
 the deployment or use of force but through military and diplomatic engagement and persuasion Australia s smaller size also
 meant it had to be strategic in its efforts It had to determine which changes were priorities it had to re organise and develop
 its resources it had to deploy them effectively and efficiently and it had to be able to sustain the effort in the face of
 competition and rejection This book focuses on the three main campaigns the Australian government has undertaken since
 the early 1980s to reshape the Asia Pacific in pursuit of its national interests *Towards A Nuclear-weapon-free World -*

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley, Mitsuru Kurosawa, Kazumi Mizumoto, 2005-03-06 This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new disarmament initiatives in the next decade Taken together the contributions to this volume suggest that contrary to current conventional wisdom the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era Rather by examining the new conditions that have emerged at the dawn of the 21st century through both national and issue based perspectives this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament

International Cooperation on WMD Nonproliferation Jeffrey W. Knopf, 2016-02-15 International efforts to prevent the spread of weapons of mass destruction WMD including nuclear biological and chemical weapons rest upon foundations provided by global treaties such as the Nuclear Non Proliferation Treaty NPT and the Chemical Weapons Convention CWC Over time however states have created a number of other mechanisms for organizing international cooperation to promote nonproliferation Examples range from regional efforts to various worldwide export control regimes and nuclear security summit meetings initiated by U S president Barack Obama Many of these additional nonproliferation arrangements are less formal and have fewer members than the global treaties International Cooperation on WMD Nonproliferation calls attention to the emergence of international cooperation beyond the core global nonproliferation treaties The contributors examine why these other cooperative nonproliferation mechanisms have emerged assess their effectiveness and ask how well the different pieces of the global nonproliferation regime complex fit together Collectively the essayists show that states have added new forms of international cooperation to combat WMD proliferation for multiple reasons including the need to address new problems and the entrepreneurial activities of key state leaders Despite the complications created by the existence of so many different cooperative arrangements this collection shows the world is witnessing a process of building cooperation that is leading to greater levels of activity in support of norms against WMD and terrorism
