Mexico and its Diaspora in the United States Alexandra Délano, 2011-06-06 In the past two decades changes in the Mexican government's policies toward the 30 million Mexican migrants living in the US highlight the importance of the Mexican diaspora in both countries given its size its economic power and its growing political participation across borders This work examines how the Mexican government's assessment of the possibilities and consequences of implementing certain emigration policies from 1848 to 2010 has been tied to changes in the bilateral relationship which remains a key factor in Mexico's current development of strategies and policies in relation to migrants in the United States Understanding this dynamic gives an insight into the stated and unstated objectives of Mexico's recent activism in defending migrants rights and engaging the diaspora the continuing linkage between Mexican migration policies and shifts in the US Mexico relationship and the limits and possibilities for expanding shared mechanisms for the management of migration within the NAFTA framework

Constructed Movements Ragini Shah, 2024-12-03 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more At once theoretically sophisticated and poignantly written *Constructed Movements* centers stories from communities in Mexico profoundly affected by emigration to the United States to show how migration extracts resources along racial lines Ragini Shah chronicles how three interrelated dynamics the maldistribution of public resources the exploitation of migrant labor and the US immigration enforcement regime entrench the necessity of migration as a strategy for survival in Mexico She also highlights the alternative visions elaborated by migrant community organizations that seek to end the conditions that force migration Recognizing that reform without recompense will never right an unjust migratory system Shah concludes with a forceful call for the US and Mexican governments to make abolitionist investments and reparative compensation to directly counteract this legacy of extraction

Mexico Daniel C. Levy, Kathleen Bruhn, 2006-01-26 This engaging book provides a broad and accessible analysis of Mexico's contemporary struggle for democratic development Now completely revised it brings up to date issues ranging from electoral reform and accountability

to drug trafficking migration and NAFTA It also considers the rapidly changing role of Mexico's mass and elite groups and its national institutions including the media the military and the Church *Ambivalent Journey* Richard C. Jones, 2022-09-13

The changing political and economic relationships between Mexico and the United States and the concurrent U S debate over immigration policy and practice demand new data on migration and its economic effects In this innovative study Richard C Jones analyzes migration patterns from two subregions of north central Mexico Coahuila and Zacatecas to the United States He analyzes and contrasts the characteristics of the two migrant populations and interprets the economic impacts of migration upon both home of migration upon both home areas Jones's findings refute some common assumptions about Mexican migration while providing a strong model for further research Jones's study focuses on the ways in which U S migration affects the lives of families in these two subregions Migrants from Zacatecas have traditionally come from rural areas and have gone to California and Illinois Migrants from Coahuila on the other hand usually come from urban areas and have almost exclusively preferred locations in nearby Texas The different motivations of both groups for migrating and the different economic and social effects upon their home areas realized by migrating form the core of this book The comparison also lends the book its uniqueness since no other study has made such an in depth comparison of two areas Jones addresses the basic dichotomy of structuralists who maintain that dependency and disinvestment are the rule for families and communities in sending areas and functionalists who believe that autonomy and reinvestment are the case of migrants and their families in home regions Jones finds that much of the primary literature is based on uneven and largely outdated data that leans heavily on two sending states Jalisco and Michoacan His fresh analysis shows that communities and regions of Mexico rather than families only account for differing migration patterns and differing social and economic results of these patterns Jones's study will be of value not only to scholars and practitioners working in the field of Mexican migration but also for its innovative methodology to anthropologists sociologists political scientists and historians whose interests include human migration patterns in any part of the world Parenting from Afar and the Reconfiguration of Family Across Distance Maria Rosario T. De Guzman, Jill Rena Brown, Carolyn P. Edwards, 2018 An increasing number of families around the world are now living apart from one another subsequently causing the defining and redefining of their relationships roles within the family unit and how to effectively maintain a sense of familial cohesion through distance Edited by Maria Rosario T de Guzman Jill Brown and Carolyn Pope Edwards *Parenting From Afar and the Reconfiguration of Family Across Distance* uniquely highlights how families both in times of crisis and within normative cultural practices organize and configure themselves and their parenting through physical separation In this volume readers are given a unique look into the lives of families around the world that are affected by separation due to a wide range of circumstances including economic migration fosterage divorce military deployment education and orphanhood Contributing authors from the fields of psychology anthropology sociology education and geography all delve deep into the daily realities of these families and share insight on

why they live apart from one another how families are redefined across long distances and the impact absence has on various members within the unit An especially timely volume Parenting From Afar and the Reconfiguration of Family Across Distance offers readers an important understanding and examination of family life in response to social change and shifts in the caregiving context The Politics of Technology in Latin America Maria Ines Bastos, 2003-09-02 This collection sets out to explore technology policy in Latin America during the 1970s and 1980s It is based on country studies and industry studies in the main Latin American economies and examines the political turmoil surrounding protected industrialisation in these countries **Special Report**, 1992 Small Country Development And International Labor Flows Anthony Maingot, 2019-06-26 This book examines policies that nations of emigration and immigration can use to maximize the flow of resources from the emigrants to the home country It explores interaction of factors such as migration trade and foreign investment on local and economic development in Mexico and the Caribbean **The Employment Effects of the North American Free Trade Agreement** United States. National Commission for Employment Policy, 1992 Scottish psychiatrist R D Laing gained a reputation in the late 60 s for his radical objection to conventional psychiatry After 35 years of professional practice he agreed to be videotaped in public lectures and private conversations *The Health of Aging Hispanics* Jacqueline L. Angel, Keith E. Whitfield, 2007-08-06 The emergence of the Hispanic population in the United States and the increasing profile of Latin America on the North and South American continents have raised the profile of Latino issues in the American consciousness Much of this attention however has revolved around trends in culture art food and music or pathological concerns about poverty crime drugs and immigration At best the scholarly and policy assessments of the implications of the impact of Latinos in the United States revolve around Mexican Americans Puerto Ricans and Central Americans as well as the children of an older Cuban population and their struggles to achieve a measure of education healthcare employment and civil rights What have not been adequately addressed are the demographic trends affecting Latinos in the United States Mexico and Latin America particularly the aging of the Hispanic population and its resultant health and long term care needs That Latinos are living longer and shifting from a youthful population to an increasingly older cohort is little known except among the small cadre of Hispanic gerontologists Ironically this invisibility of aging Hispanics is juxtaposed to the almost picked response of the U S media and public toward the aging of the general U S population and the social and political controversies over Social Security Medicare and health care costs The policy debates of an aging U S population as a whole arise from substantial research and policy analysis a level of attention not seen with regard to the aging of the Hispanic population *Employment Effects of the North American Free Trade Agreement (NAFTA)* DIANE Publishing Company, 1994 Examines worker dislocation and immigration effects of NAFTA Includes recommendations on worker adjustment assistance programs that address the adverse employment effects of NAFTA and migrant and seasonal farmworker programs that address the short term increases in Mexican immigration that are likely to result from NAFTA Charts tables and graphs

The Making of Citizens Bryan Roberts, 2020-11-25 Originally published as *Cities of Peasants* this highly acclaimed account of the expansion of capitalism in the developing world has now been extensively rewritten and updated Focusing on Latin America Bryan Roberts traces the evolution of developing societies and their economies to the present Taking account of the move towards more open economies a shrinking of the state and various transitions towards democracies he shows how urban growth has produced new patterns of social stratification creating opportunities for social mobility but doing little to decrease income inequality or political and social pressures Underlying social changes have broadened the practice of citizenship in developing countries limiting authoritarian rule but within a context of entrenched social inequalities and persisting political instability This book conveys both the flavour of life in the cities of the third world and the immediacy of their problems
