Economic Development and Consumption Patterns in Asian Countries Shashika D. Rathnayaka,Saroja Selvanathan,Eliyathamby A. Selvanathan,2024-07-05 This book analyzes consumption patterns in Asian countries that are at different stages of economic development and highlights the similarities and disparities of consumption patterns across countries using a system wide framework In a departure from previous studies in the literature which mainly present only single country analysis this book aims to provide a comprehensive analysis of cross country consumption patterns considering several Asian countries using the most recent consumption expenditure data for aggregate commodity groups In comparing consumption patterns across countries the book use unit free measurements such as budget shares and changes in logarithms of price and quantities thus avoiding problems associated with exchange rate conversions The book also analyses the dynamic behaviour in the consumption patterns of the Asian consumers The findings of this book will be invaluable to researchers in development economics as well as policymakers in the formulation of fiscal policy or other types of economic control

A System-Wide Analysis of International Consumption Patterns S. Selvanathan,2012-12-06 The modern system wide approach to applied demand analysis emphasizes a unity between theory and applications Its firm foundations in economic theory make it one of the most impressive areas of applied econometrics This book presents a large number of applications of recent innovations in the area The database used consist of about 18 annual observations for 10 commodities in 18 OECO countries more than 3 100 data points Such a large body of data should provide convincing evidence one way or the other about the validity of consumption theory

PREVIEW OF THE BOOK The overall importance of the analysis presented in the book can be seen from the following table which shows the significant contribution of the OECO to the world economy As can be seen the 24 member countries account for about 50 percent of world GOP in 1975 In this book we present an extensive analysis of the consumption patterns of the OECO countries

International Consumption

Comparisons: Oecd Versus Ldc Saroja Selvanathan,E Anthony Selvanathan,2003-04-24 This book presents an analysis of consumption patterns in the OECD rich and LDC poor countries using recent data 1950 1998 and econometric methodology for a number of broadly aggregated consumer goods The income elasticity estimates for the 46 countries and 9 commodity groups are tabulated The reliability of these elasticity estimates and also the demand theory hypotheses are investigated using simulation techniques

The Demand for Alcohol, Tobacco and Marijuana Saroja Selvanathan,Eliyathamby A. Selvanathan,2017-11-30 This book is the first to present an extensive analysis of the international evidence for the similarities of the consumption patterns of such controversial commodities as alcohol tobacco and marijuana using recent data from a number of developed and less developed countries over a number of years The book also presents analysis of the

consumption patterns of food in general and soft drinks in particular In addition the book provides a detailed analysis of the consumption restrictions and regulations in place in various countries in relation to issues associated with taxation availability and marketing of these products The book s focus is on rigorous empirical analysis and presents the estimates of demand elasticities of these five commodities across different countries Such estimates are key inputs for government economic models that are used for the purpose of social policy analysis Furthermore the book presents hypothesis testing results on various demand theory hypotheses such as demand homogeneity and Slutsky symmetry

Index Numbers D.S. Prasada

Rao,E.A. Selvanathan,2016-07-27 An authoritative survey with exciting new insights of special interest to economists and econometricians who analyse intertemporal and interspatial price relationships Professor Angus Maddison Groningen

University This book presents a comprehensive review of recent developments in the theory and construction of index numbers using the stochastic approach demonstrating the versatility of this approach in handling various index number problems within a single conceptual framework It also contains a brief but complete review of the existing approaches to index numbers with illustrative numerical examples The stochastic approach considers the index number problem as a signal extraction problem The strength and reliability of the signal extracted from price and quantity changes for different commodities depends upon the messages received and the information content of the messages The most important applications of the new approach are to be found in the context of measuring rate of inflation fixed and chain base index numbers for temporal comparisons and for spatial intercountry comparisons the latter generally require special index number formulae that result in transitive and base invariant comparisons
