Regions Local Power Economic:

Energy Economics Yi-Ming Wei, Qiao-Mei Liang, Gang Wu, Hua Liao, 2019-09-23 This book sets out a systematic piece of research which attempts to assess the level of energy security in China investigate how national energy supply security might be improved and consider how energy trade risks might be reduced **WIND POWER DEPLOYMENT IN URBANISED**

REGIONS Pia Nabielek, 2020 Delivering sustainable energy solutions has become a fundamental task of spatial planning This dissertation considers the field of tension between higher tier energy schemes and local level implementation practices by analysing regional planning policies regarding wind power from an institutional perspective Institutional challenges in spatial planning are closely related in particular to the flexibility and adaptability of those planning practices that are needed to supply acceptable locations Similar trends can be detected at a European level targeted energy values are combined with administratively defined spaces by putting the zoning of wind energy generation on regional spatial planning agendas The outlining of wind power zones is not merely a technical act that determines the territorial spread of wind turbines Rather it configures social organisational entities in which regionally varying sets of actors interact and in the best case join forces

The Rise of the English Regions? Irene Hardill, Paul Benneworth, Mark Baker, Leslie Budd, 2006-10-03 This book analyzes devolution as it affects the English Regions working from the perspective of uneven development and drawing on the rich tradition of regional geography Currently London is the power centre ruling over the other English regions The first part of the book looks at how this regional structure has arisen and the theories that can be used to analyze it The contributors discuss the nature of regional problems and governance the institutions involved in regional governance and regional approaches to economic development The second part of the book devotes a chapter to each English region examining each region's unique characteristics and the opportunities created for it by devolution By looking carefully at the regions this part of the book sheds light on the question of whether Regional governance benefits the regions or simply rescales governance to introduce another layer of bureaucracy Russia's Regions and Comparative Subnational Politics William Mark

Reisinger, 2013 Subnational political units are growing in influence in national and international affairs drawing increasing scholarly attention to politics beyond national capitals In this book leading Russian and Western political scientists contribute to debates in comparative politics by examining Russia's subnational politics Beginning with a chapter that reviews major debates in theory and method this book continues to examine Russia's 83 regions exploring a wide range of topics including the nature and stability of authoritarian regimes federal politics political parties ethnic conflict governance and inequality in a comparative perspective Providing both qualitative and quantitative data from 20 years of original research the book draws on elite interaction public opinion and the role of institutions regionally in the post Soviet years The regions vary on a number of theoretically interesting dimensions while their federal membership provides control for other dimensions that are challenging for globally comparative studies The authors demonstrate the utility of subnational analyses and show how

regional research can help answer a variety of political questions providing evidence from Russia that can be used by specialists on other large countries or world regions in cross national scholarship Situated within broader theoretical and methodological political science debates this book will be of interest to students and scholars of Russian politics comparative politics regionalism and subnational politics The Regions and the European Community Robert Leonardi,1993 The contributions to this volume analyse the role of sub national institutions in the regional economic development process in the Community s less developed countries Greece Ireland Portugal Spain and Italy They are structured on the basis of individual country reports providing background to the debate on decentralization in each national context and the regional role in economic development The volume also contains an extensive analysis of the impact of European Community sectoral policies on the alleviation of regional disparities and an in depth analysis of the EC s Integrated Mediterranean Programmes on the basis of a systematic content analysis of the programmes and field research conducted on six IMP programmes in Greece Italy and France **Kings and Usurpers in the Seleukid Empire** Boris Chrubasik,2016-10-13 Kings and Usurpers in the Seleukid Empire The Men who would be King focuses on ideas of kingship and power in the Seleukid empire the largest of the successor states of Alexander the Great Exploring the question of how a man becomes a king it specifically examines the role of usurpers in this particular kingdom those who attempted to become king and who were labelled as rebels by ancient authors after their demise by placing these individuals in their appropriate historical contexts through careful analysis of the literary numismatic and epigraphic material By writing about kings and rebels literary accounts make a clear statement about who had the right to rule and who did not and the Seleukid kings actively fostered their own images of this right throughout the third and second centuries BCE However what emerges from the documentary evidence is a revelatory picture of a political landscape in which kings and those who would be kings were in constant competition to persuade whole cities and armies that they were the only plausible monarch and of a right to rule that advanced and refuted on so many sides simply did not exist Through careful analysis this volume advances a new political history of the Seleukid empire that is predicated on social power redefining the role of the king as only one of several players within the social world and offering new approaches to the interpretation of the relationship between these individuals themselves and with the empire they sought to rule In doing so it both questions the current consensus on the Seleukid state arguing instead that despite its many strong rulers the empire was structurally weak and offers a new approach to writing political history of the ancient world **Micro Perspectives for Decentralized Energy Supply** Martina Schäfer,2011 Routledge Library Editions: Business and Economics in Asia Various,2021-07-14 This set examines a vast range of topics covering all experiences of business and economics from across Asia Dealing with early banking systems in China the industrialisation of Korea and Taiwan the evolution of Japanese business practices economic development protectionist policies industrial investment trade tourism and a host of other topics the books collected here form a vital reference resource across a wide

Regions for Stronger Economies OECD,2011-12-05 The OECD Regional Outlook 2011 provides an overview of the main developments in performance among OECD regions and the challenges for regional policy after the crisis Challenges for Russian Economic Reform Alan Smith,2010-12-01 The transition to a market economy proves to be far more difficult in Russia than in the former centrally planned economies of eastern Europe The Russian economy continues to face serious problems including substantial inflationary pressures falling output and capital flight The most positive aspect of the transition has been the relatively fast pace of privatization Challenges for Russian Economic Reform contains papers

published by the post Soviet Business Forum at the Royal Institute of International Affairs that have been revised for this volume. The contributors, specialists in Russian economic affairs, examine the principal economic and institutional factors that have hindered transformation in Russia. The sheer size of the country has complicated the problem of exposing domestic producers to foreign competition and has weakened the ability of central authorities to control the regions. Economic stabilization has been hampered by the difficulties in establishing sound economic relations with the former Soviet republics. David Dyker and Michael Barrow analyze the problems of monopoly and competition policy in Russia. Philip Hanson assesses the obstacles to economic stabilization posed by regional economic interests and examines regional diversity in reform implementation. Michael Kaser examines the problems of privatization by regions and sectors in Russia and the CIS and the institutional obstacles encountered by foreign investors. Alan Smith explores the problems created by the breakup of traditional trade and payment relations with the non-Russian republics of the former Soviet Union and bilateral trade links with Eastern Europe. He also provides an overall assessment of Russian economic performance since the collapse of communism.
