Regions That Work How Cities And Suburbs Can Grow Together:

Regions That Work Manuel Pastor, 2000 **Working Regions** Jennifer Clark, 2013-05-29 Working Regions focuses on policy aimed at building sustainable and resilient regional economies in the wake of the global recession Using examples of four working regions regions where research and design functions and manufacturing still coexist in the same cities the book argues for a new approach to regional economic development It does this by highlighting policies that foster innovation and manufacturing in small firms focus research centers on pushing innovation down the supply chain and support dynamic design driven firm networks This book traces several key themes underlying the core proposition that for a region to work it has to link research and manufacturing activities namely innovation and production in the same place Among the topics discussed in this volume are the issues of how the location of research and development infrastructure produces a clear role of the state in innovation and production systems and how policy emphasis on pre production processes in the 1990s has obscured the financialization of intellectual property Throughout the book the author draws on examples from diverse industries including the medical devices industry and the US photonics industry in order to illustrate the different themes of working regions and the various institutional models operating in various countries and regions **Governance of**

Europe's City Regions Tassilo Herrschel, Peter Newman, 2003-08-27 Governance of Europe's City Regions considers the changing role of the European Union in regional issues explores how national governments have become increasingly involved at the regional scale and examines the constitutional and political contexts in which regional and local governments operate Detailed case studies of regionals in Germany and England illustrate contrasts in European approaches to the scale of government and the complex interactions of international national regional and local scales of policy intervention The book offers a unique perspective which links together an analysis of both regional Europe and the local economic and political factors that shape successful regions **Cities, State and Globalisation** Tassilo Herrschel, 2014-01-03 This book

investigates the ways in which city regions view themselves as single entities how they are governed what is meant by governance why the question of city regional governance matters and the extent to which the balance between internal and external factors is important for finding governance solutions Examples from North America and Europe are compared and contrasted to gain a better understanding of what matters on the ground to people and policy makers when seeking answers to the challenges of a globalised rapidly changing world In order to analyse the conditions involved in making local decisions the author looks at the impact of established policy making practices socio economic patterns among the population existing views of the local and the regional and their respective roles among the electorate and policy makers and the scope for building city regional governance under given statutory and fiscal provisions The complex interaction of these factors is shown to produce place specific forms and modi operandi for governing city regions as local regional constructs This book will be of interest to urban and regional policy makers and scholars working in the fields of economic geography and political

geography **Restructuring the Philadelphia Region** Carolyn Adams, David Bartelt, David Elesh, Ira Goldstein, 2008-08-06
Looking for regional solutions to local limitations of opportunity in education jobs and housing *Regional Equity* Victor Rubin, 2017-10-02 Regional equity as a field of scholarship as an arena of policy change and as a social movement has grown diversified and matured in important ways over the past decade The fruits of that growth and development can be seen in recent federal and state policies in the practices of many regional planning organizations and in the agendas and approaches of countless community based organizations and issue advocacy groups As the field has expanded a growing number of researchers have been tracking these phenomena explaining how and why concepts of metropolitan development are being reframed documenting the efforts to shape policies and diversify leadership assessing where and how equity and social justice concerns have been brought into regional planning for transportation land use housing public finances environmental quality smart growth sustainable development public health and other issue areas This volume brings together analyses and commentary by some of the leading scholarly observers these timely developments This book was published as a special issue of Community Development Equity, Growth, and Community Chris Benner, Manuel Pastor, 2015-10-09 A free ebook version of this title is available through Luminos University of California Press s new open access publishing program for monographs Visit www.luminosoa.org to learn more In the last several years much has been written about growing economic challenges increasing income inequality and political polarization in the United States This book argues that lessons for addressing these national challenges are emerging from a new set of realities in America s metropolitan regions first that inequity is in fact bad for economic growth second that bringing together the concerns of equity and growth requires concerted local action and third that the fundamental building block for doing this is the creation of diverse and dynamic epistemic or knowledge communities which help to overcome political polarization and help regions address the challenges of economic restructuring and social divides Coping with Adversity Harold Wolman, Howard Wial, Travis St. Clair, Edward Hill, 2017-11-15 Coping with Adversity addresses the question of why some metropolitan area regional economies are resilient in the face of economic shocks and chronic distress while others are not It is particularly concerned with what public policies make a difference in whether a region is resilient The authors employ a wide range of techniques to examine the experience of all metropolitan area economies from 1978 2014 They then look closely at six American metropolitan areas to determine what strategies were employed which of these contributed to regional economic resilience and which did not Charlotte North Carolina Seattle Washington and Grand Forks North Dakota are cases of economic resilience while Cleveland Ohio Hartford Connecticut and Detroit Michigan are cases of economic nonresilience The six case studies include hard data on employment production and demographics as well as material on public policies and actions The authors conclude that there is little that can be done in the short term to counter economic shocks most regions simply rebound naturally after a relatively short period of time However they do find that many regions have successfully emerged from

periods of prolonged economic distress and that there are policies that can be applied to help them do so Coping with Adversity will be important reading for all those concerned with local and regional economic development including public officials urban planners and economic developers

Demolition Means Progress Andrew R. Highsmith,2015-07-06 Tracks the fall of Flint Michigan once one of the nation s greatest industrial towns now one of its poorest cities compelling and powerful Kevin Boyle National Book Award winning author of Arc of Justice In 1997 after General Motors shuttered a massive complex of factories in the gritty industrial city of Flint Michigan signs were placed around the empty facility reading Demolition Means Progress suggesting that the struggling metropolis could not move forward to greatness until the old plants met the wrecking ball Much more than a trite corporate slogan the phrase encapsulates the operating ethos of the nation s metropolitan leadership from at least the 1930s to the present Again and again the leaders of Flint and other municipalities tried to revitalize their communities by demolishing outdated and inefficient structures and institutions and overseeing numerous urban renewal campaigns many of which yielded only more impoverished and more divided metropolises After decades of these efforts the dawn of the twenty first century found Flint one of the most racially segregated and economically polarized metropolitan areas in the nation In one of the most comprehensive works yet written on the history of inequality and metropolitan development in modern America Andrew R Highsmith uses the case of Flint to explain how the perennial quest for urban renewal even more than white flight corporate abandonment and other forces contributed to mass suburbanization racial and economic division deindustrialization and political fragmentation Challenging much of the conventional wisdom about structural inequality and the roots of the nation s urban crisis Demolition Means Progress shows in vivid detail how public policies and programs designed to revitalize the Flint area ultimately led to the hardening of social divisions Brilliantly narrates the entire arc of 20th century American industrialization at the scale of a single city Flint Michigan and its suburbs a remarkable book Robert Self author of American Babylon Race and the Struggle for Postwar Oakland

Governing Urban Regions Through Collaboration Joël Thibert, 2016-04-22 With the demise of the Old Regionalist project of achieving good regional governance through amalgamation voluntary collaboration has become the modus operandi of a large number of North American metropolitan regions Although many researchers have become interested in regional collaboration and its determinants few have specifically studied its outcomes This book contributes to filling this gap by critically re evaluating the fundamental premise of the New Regionalism which is that regional problems can be solved without regional higher government In particular this research asks to what extent does regional collaboration have a significant independent influence on the determinants of regional resilience Using a comparative Canada U S mixed method approach with detailed case studies of the San Francisco Bay Area the Greater Montreal and trans national Niagara Buffalo regions the book examines the direct and indirect impacts of inter local collaboration on policy and policy outcomes at the regional and State Provincial levels The book research concentrates on the effects of bottom up state mandated and functional collaboration and the moderating role of regional awareness higher governmental initiative and civic capital on three outcomes environmental preservation socio economic integration and economic competitiveness In short the book

seeks to highlight those conditions that favor collaboration and might help avoid the collaborative trap of collaboration for its own sake More specifically this research concentrates on the effect of bottom up state mandated and functional collaboration the moderating role of regional awareness governmental initiative and civic capital on environmental preservation socio economic integration and economic competitiveness In short the book seeks to understand whether and how urban regional collaboration contributes to regional resilience
