Regions In Recession And Resurgence

Eric Van Young

Regions In Recession And Resurgence:

Regions in Recession and Resurgence Michael Chisholm, 2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

Regions in Recession & Resurgence Michael Chisholm, 1990-12-01 Dynamics of Regional Growth in Europe Andres Rodriguez-Pose, 1998-11-19

In a period of deep economic social and political transformation regional disparities seem to be particularly resistant to change The emergence of a global economy the shift in production methods and the greater mobility of capital labour and raw materials have not brought about a radical reshuffling of the prevailing regional disparities There is a greater concentration of economic activity in core areas and very few peripheral regions are taking advantage of the process of global restructuring The Dynamics of Regional Growth in Europe looks for the reasons behind this persistence in the social political and institutional arrangements of a large set of European regions by trying to relate two scientific approaches concerned with regional economic performance which share very little in common the literature on socio economic restructuring and structural change and neoclassical and endogenous growth theories OXFORD GEOGRAPHICAL AND ENVIRONMENTAL STUDIES AIMS TO PUBLISH THE BEST ORIGINAL RESEARCH STUDIES IN THE RELATED FIELDS OF GEOGRAPHY AND ENVIRONMENTAL STUDIES IT S SCOPE IS INTERNATIONAL PRESENTING A BROAD AND DIVERSE RANGE OF SCHOLARLY APPROACHES FROM ACROSS THE WORLD SERIES EDITORS GORDON CLARK ANDREW

GOUDIE AND CERI PEACH **Routledge Library Editions: Economic Geography** Various, 2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization *Institutional Change in Transition Economies* Michael Cuddy, 2019-01-15 This title was first published in 2002 The importance of institutions for transition economies has so far been overlooked Michael Cuddy and

Rubin Gekker bring together leading experts in the field to fill this crucial void in the literature. The contributors concentrate on an ongoing tension between informal constraints and mechanisms and the new formal rules and mechanisms that have gradually evolved through the transition period. Experiences are primarily drawn from Russia. The book consists of three parts: the first comprising an analysis, synthesis and generalizations of the institutional adaptations as a market economy slowly emerges from a fog of shifting rules and varying interpretations. This is followed by the study of business and taxation authorities' behavior as they try to minimize or maximize the taxation take. The volume also analyzes the challenges facing central and regional governments in delivering equitable levels of public services across regions of vastly different development levels while at the same time trying to stimulate regional economic growth. *Regional and Local Economic Development in South Africa* Etienne Louis Nel, 2019-07-23. First published in 1999, this volume responds to the recent application of Local Economic Development around the world and examines its impact in South Africa in the wake of the nation's recent political transition. Etienne Louis Nel observes how the initiative is taking on a dual form of community-led and authority-led initiatives. Nel explores the issue through areas including South Africa's space economy, a case study of Stellenbosch and local economic development in East London. *Collapse and Revival* Mr. Ayhan Kose, Mr. Marco E. Terrones, 2015-12-16. As the debates about the recent global recession and the subsequent recovery have clearly shown, our understanding of these questions has been very limited. This comprehensive text puts the latest global recession and ongoing recovery in perspective. With the support of a companion website and DVD, we have created several multimedia tools to help understand the basics. *Stormy Passage* Eric Van Young, 2022-05-11. In this engaging book, Eric Van Young traces the political, economic and social development of Mexico through the crucial one hundred years of its remarkable transition from a relatively prosperous Spanish colony to a violently unstable republic marked by economic stagnation, political confrontation and burgeoning efforts at modernization. Featuring primary sources from figures of the period, Van Young discusses the political instability of the period, internal warfare, military uprisings, intermittent dictatorships, sharp conflicts among political groupings and attributes them to a belief by political actors in the fundamental lack of legitimacy in central government institutions after the sweeping away of the Bourbon imperial structure and its replacement first with a very short-lived Mexican empire followed by a series of increasingly authoritarian aspirational republican constitutions. **Bulletin of the United States Bureau of Labor Statistics**, 1913. **New England Labor and Labor Problems** United States. Bureau of Labor Statistics, 1957. Ice Cream Field, 1927. Vol. 32 no. 10 constitutes Souvenir edition and year book for 1939. *Aging and Economic Growth in the Pacific Region* Akira Kohsaka, 2013. First Published in 2013, Routledge is an imprint of Taylor Francis, an informal company. Area Redevelopment United States. Congress. Senate. Committee on Banking and Currency, 1957. *Governance and Planning of Mega-City Regions* Jiang Xu, Anthony Yeh, 2010-09-13. Neoliberalism's market revolution has had a tremendous effect on contemporary mega-city regions. The negative consequences of market-oriented

politics for territorial growth have been recognized While a lot of attention has been given to how planners and policy makers are fighting back political fragmentation through innovative governance and planning little has been done to reveal such practices through an international comparative perspective Governance and Planning of Mega City Regions provides a comparative treatment and examination of how new approaches in governance and planning are reshaping mega city regions around the world The contributors highlight how European mega city regions are evolving and how strategic intervention is being redefined to enable the integration of urban qualities in a multi level governance environment how traditional federal countries in North America and Australia see the promise of major policies and development initiatives finally moving ahead to herald a more strategic intervention at national and regional scales and how transitional economies in China witness the rise of state strategies to control the articulation of scales and to reassert the functional importance of state in a growing diffused power context This book offers case studies written from a variety of theoretical and political perspectives by world leading scholars It will appeal to upper level undergraduates postgraduates researchers and policymakers interested in urban and regional planning geography sociology public administrations and development studies *Monthly Labor Review*, 1957 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews *Economic Policy-making in the Asia-Pacific Region* Institute for Research on Public Policy, 1990 These series of workshop papers are the second volume to be released by the Institute The first was held in Victoria 1987 This second one was co hosted with the Thailand Development Research Institute TDRC A third one is scheduled for May 1990 in Kuala Lumpur The workshop series is intended to link senior public policy researchers and practitioners from around the region Papers presented address economic policy making in Australia Canada New Zealand the Philippines Japan Thailand South Korea China Hong Kong Malaysia Singapore and Indonesia **Western Europe 2003** Europa Publications, 2002-11-30 This edition brings together analyses statistics and directory data on the countries and territories of Western Europe

Vladimir Putin and Russia's Imperial Revival David E. McNabb, 2017-07-05 Discerning the early stages of the rebirth of a new Russian empire from the ashes of the Soviet Union Vladimir Putin and Russia's Imperial Revival argues that Russia's recent overtly aggressive actions and foreign policy doctrines have signaled a renewal of the Cold War At the least Russia's actions represent the potential for renewal This book explains these developments in a historical context The book begins by describing Russia's initial policy of rapprochement after the collapse of the Soviet Union and its development into a foreign policy of threatened or actual armed aggression It identifies today's Russia as a nation determined to re-establish itself as a political and military force As a prominent figure in the development and continuation of its current foreign policy Vladimir Putin plays a central role in the topics covered Previous literature often treats Putin as an individual phenomenon examining his connections to corruption or the secret police but here David E McNabb examines him as the latest in a long history of Russian despots who followed similar expansionist policies He details some of the tactics Putin uses to instill fear and

dominate political policies of republics newly independent from Russia These tactics include the use of energy as a weapon cyber terrorism and military support for ethnic Russian separatists in other sovereign nations most recently exemplified by Russia s annexation of Crimea from Ukraine via armed invasion In an attempt to demystify Russia s re emergence as an international political force Vladimir Putin and Russia s Imperial Revival grounds its analyses in history It explores as far back as the establishment of the first Russian empire and regards Putin as a leader determined to establish a fifth imperial incarnation It provides a nuanced understanding of how Russia arrived at its current position through recent and distant internal and international events

Governing Metropolitan Areas David K. Hamilton, 2014-04-24 Interest and research on regionalism has soared in the last decade Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance Governing Metropolitan Areas describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance

The New England Economy and Its Effect on the Region's Small Businesses United States. Congress. Senate. Committee on Small Business, 1991
