Diocese of Hereford (England),1909 **Episcopal Visitation of Monasteries in the Thirteenth Century** Christopher Robert Cheney,1983 Officers and Accountability in Medieval England 1170--1300 John

Sabapathy,2019-09-13 The later twelfth and thirteenth centuries were a pivotal period for the development of European government and governance A mentality emerged that trusted to procedures of accountability as a means of controlling officers conduct The mentality was not inherently new but it became qualitatively more complex and quantitatively more widespread in this period across European countries and across different sorts of officer The officers exposed to these methods were not just state ones but also seignorial ecclesiastical and university college officers as well as urban communal ones This study surveys these officers and the practices used to regulate them in England It places them not only within a British context but also a wide European one and explores how administration law politics and norms tried to control the insolence of office The devices for institutionalising accountability analysed here reflected an extraordinarily creative response in England and beyond to the problem of complex government inquests audits accounts scrutiny panels syndication Many of them have shaped the way in which we think about accountability today Some remain with us So too do their practical problems How can one delegate control effectively How does accountability relate to responsibility What relationship does accountability have with justice This study offers answers for these questions in the Middle Ages and is the first of its kind dedicated to an examination of this important topic in this period **Bishops, Clerks, and Diocesan**

**Governance in Thirteenth-Century England** Michael Burger,2012-10-22 This book investigates how bishops deployed

reward and punishment to control their administrative subordinates in thirteenth century England Bishops had few effective avenues available to them for disciplining their clerks and rarely pursued them preferring to secure their service and loyalty through rewards The chief reward was the benefice often granted for life Episcopal administrators security of tenure in these benefices however made them free agents allowing them to transfer from diocese to diocese or even leave administration altogether they did not constitute a standing episcopal civil service This tenuous bureaucratic relationship made the personal relationship between bishop and clerk more important Ultimately many bishops communicated in terms of friendship with their administrators who responded with expressions of devotion Michael Burger's study brings together ecclesiastical social legal and cultural history producing the first synoptic study of thirteenth century English diocesan administration in decades His research provides an ecclesiastical counterpoint to numerous studies of bastard feudalism in secular contexts

**The Abbots and Priors of Late Medieval and Reformation England** Martin Heale, 2016 The importance of the medieval abbot needs no particular emphasis The monastic superiors of late medieval England ruled over thousands of monks and canons who swore to them vows of obedience they were prominent figures in royal and church government and collectively they controlled properties worth around double the Crown's annual ordinary income Moreover as guardians of regular observance and the primary interface between their monastery and the wider world abbots and priors were pivotal to the effective functioning and well being of the monastic order The Abbots and Priors of Late Medieval and Reformation England provides the first detailed study of English male monastic superiors exploring their evolving role and reputation between the fourteenth and sixteenth centuries Individual chapters examine the election and selection of late medieval monastic heads the internal functions of the superior as the father of the community the head of house as administrator abbatial living standards and modes of display monastic superiors public role in service of the Church and Crown their external relations and reputation the interaction between monastic heads and the government in Henry VIII's England the Dissolution of the monasteries and the afterlives of abbots and priors following the suppression of their houses This study of monastic leadership sheds much valuable light on the religious houses of late medieval and early Tudor England including their spiritual life administration spending priorities and their multi faceted relations with the outside world The Abbots and Priors of Late Medieval and Reformation England also elucidates the crucial part played by monastic superiors in the dramatic events of the 1530s when many heads surrendered their monasteries into the hands of Henry VIII
