Johnson, 2005-04-12 Ailish Johnson examines national welfare state regimes of EU Member States and the features of the European Union and the International Labour Organization that encourage cooperation and assure outcomes of supranational cooperation higher than theories of inter state bargaining or social dumping would predict By tracing the development of EU and global social policy from the 1950s to today she identifies policy leaders resisters and passive states She concludes with an analysis of the forms and outputs of supranational social policy and suggests limits of social policy in an enlarged European Union *Social Law and Policy in an Evolving European Union* Jo Shaw, Josephine Shaw, 2000-12-15 The analyses in this collection address important questions about social law and policy in the evolving European Union Economic Transition, Unemployment and Active Labour Market Policy Corinne Nativel, 2004-05-26 No Marketing Blurb **Political Competition and Economic Regulation** Peter Bernholz, Roland Vaubel, 2007-06-07 Organized readable technically sound and comprehensive from both theoretical and empirical standpoints this book summarizes a vast amount of institutional historical and descriptive detail Using case studies from the US Canada Germany and Switzerland as well as the European Union and the global economy this is the first book of its kind to e Towards a Liberal Utopia? A European Strategy for Jobs and Growth Great Britain: Parliament: House of Lords: European Union Committee,2006-03-16 This report by the European Union Committee examines the progress of the European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile Can the Celtic Tiger Cross the Irish Border? John Bradley,J. Esmond Birnie,2001 One of the Republic's outstanding economists John Bradley and the prominent Unionist politician and economist Esmond Birnie debate to what extent Northern Ireland can learn from the phenomenon of the Celtic Tiger Professor Bradley asks what lessons the North can take from the success of the Republic's economic planning and whether it makes sense for the island to trade and seek investment as one unit in a globalized economy Dr Birnie wonders whether the low level of trade and economic interchange between the two Irish economies is really abnormal in European terms and whether a successfully coordinated island economy is possible in two separate political jurisdictions *Regulating the Risk of Unemployment* Jochen Clasen,Daniel Clegg,2013-10-17 *Regulating the Risk of Unemployment* offers a systematic comparative analysis of the recent adaptation of European unemployment protection systems to increasingly post industrial labour markets These

systems were mainly designed and institutionalized in predominantly industrial economies characterized by relatively standardized employment relationships and stable career patterns as well as plentiful employment opportunities even for those with low skills. Over the past two to three decades they have faced the challenge of an accelerating shift to a primarily service based economy accompanied by demands for greater flexibility in wages and terms and conditions in low skill segments of the labour market as well as pressures to maximise labour force participation given the more limited potential for productivity led growth. The book develops an original framework for analysing adaptive reform in unemployment protection along three discrete dimensions of institutional change which are termed benefit homogenization risk re categorization and activation. This framework is then used to structure analysis of twenty years of unemployment protection reform in twelve European countries. In addition to mapping reforms along these dimensions the country studies analyse the political and institutional factors that have shaped national patterns of adaptation. Complementary comparative analyses explore the effects of benefit reforms on the operation of the labour market assess evolving patterns of working age benefit dependency and examine the changing role of active labour market policies in the regulation of the risk of unemployment.

Storrie,2003 Bergström and Storrie are to be praised for what stands as a highly readable engaging account of the development of temporary work and also one that breaks new ground The focus here is not just on profiling national trends but also on locating them in a broader regulatory context At a time when even the most passive regulation is derided for undermining flexibility and holding back growth the insights contained in this book are of considerable value In my view Contingent Employment in Europe and the United States should be essential reading both for academics and policymakers Ian Kirkpatrick Industrial Relations Journal Contingent Employment in Europe and the United States examines the developments in labour markets in advanced economies in the 21st century as regards contingent employment This is defined as employment relationships that can be terminated with minimal costs within a predetermined period of time This includes fixed term contracts temporary agency work and self employment

Contingent employment has been the subject of much legislative activity in the last decade at both the national and European level Temporary agency work in particular has recently been extensively deregulated in most European countries and currently we await the fate of a proposed EU directive on agency work The book is therefore highly topical
