Regulation And The Informal Economy Microenterprises In Chile Ecuador And Jamaica:

Regulation and the Informal Economy Emilio Klein, Victor E. Tokman, 2023 Explores the extent to which the regulatory environment in developing countries influences the urban informal sector and particularly microenterprises drawing on the cases of Chile Ecuador and Jamaica *Informal Work in Developed Nations* Enrico Marcelli, Colin C. Williams, Pascale Joassart, 2009-09-11 The authors of this volume take the orthodox view of informal work and dismantle it piece by piece presenting an analysis of the extent to which this phenomenon plays a significant role in developing countries across the world **Informal Markets, Livelihood and Politics** Debdulal Saha, 2016-07-15 Low industrial growth declining agricultural sector and limited expansion of formal sector employment in India have increasingly forced the poor to take recourse to informal sources of livelihoods Street vending is one such thriving source of self employment across cities This book delves into the sustenance and survival strategies of street vendors across 17 cities in India and assesses the issues revolving around self created markets livelihood and politics that are contested in public space It also presents a conceptual and theoretical understanding of different socio economic and policy concerns pertaining to street vending in the country The study shows how despite the absence of legal frameworks and institutional support these urban self employed informal workers subsist by arranging ad hoc alternatives creating informal institutions and negotiating with formal and informal actors in the market It also discusses the Street Vendors Protection of Livelihood and Regulation of Street Vending Act 2014 and examines how inclusive the legal recognition is for these workers of informal economy Drawing on exhaustive research and a wealth of primary data this book will be useful to scholars and researchers in development studies labour studies economics sociology and those in public policy and urban planning International Perspectives on Household Wealth Edward N. Wolff, 2006-01-01 Editor Wolff is a leading authority on income wealth and inequality in the US and contributing authors are well respected experts in their field Overall the research is high quality and most papers include a substantial list of references A plethora of data is considered and much statistical evidence is presented A useful contribution to the literature on income distribution and wealth inequality Recommended E Kacapyr Choice The contributors to this comprehensive book compile and analyse the latest data available on household wealth using as case studies the United States Canada Germany Italy Sweden and Finland during the 1990s and into the twenty first century The authors show that in the US trends are highlighted in terms of wealth holdings among the low income population along with changes in wealth polarization racial differences in wealth holdings and the dynamics of portfolio choices The consensus between the authors is that wealth inequality has generally risen among these OECD countries since the early 1980s although Germany stands out as an exception In the case of the US it is also noted that wealth holdings have generally failed to improve among low income families and that the racial wealth gap widened during the late 1980s *International Perspectives on Household Wealth* also contains new results on a number of topics including measures and changes of wealth polarization in the US measurement

and changes of portfolio span in the US asset holdings of low income households in the US and the effects of parental resources on asset holdings in Chile Academic government and public policy economists in OECD countries as well as those in so called middle income countries around the world will find much to engage them within this book It will also appeal to academics and researchers of international and welfare economics and other social scientists interested in the issue of inequality

Policies for Small Enterprises Gerhard Reinecke, Simon White, International Labour Office, 2004 Many governments in developing countries are making efforts to support the development of micro and small enterprises MSEs as they recognise their important role in employment creation and poverty reduction However millions of people who work in MSEs are paid low incomes have little or no social protection and are exposed to dangerous working conditions This paradox stems from a policy and regulatory environment that should help the development of MSEs and improve the quality of jobs provided by them but in practice often establishes biases and stifles growth Based on studies carried out in Chile Guinea Pakistan Peru South Africa Tanzania and Vietnam this book looks beyond MSE promotion initiatives to analyse the overall policy and regulatory environment It examines the impact of national business laws and taxation labour regulations trade and finance policies identifies common problems and presents major principles for reform More than simply helping to create more jobs this approach aims to help to create more jobs of better quality

Globalization in Rural Mexico Frances Abrahamer Rothstein, 2009-06-03 Winner Society of the Anthropology of Work Book Prize 2010 When the ever intensifying global marketplace modernizes rural communities who stands to gain Can local

residents most impacted by changes to their social fabric ever recover or even identify what has been lost Frances Abrahamer Rothstein uses thirty years of sustained anthropological fieldwork in the rural Mexican community of San Cosme Mazatecochco to showcase globalization's complexities and contradictions Rothstein's lucid work chronicles the changes in production consumption and social relations during three distinct periods the Mexican miracle when economic development fueled mobility for a large segment of the population including San Cosme's worker peasants the lost decade of the 1980s when much of what had been gained was lost and the recent period of trade liberalization and globalization considered by many in Mexico and beyond as a panacea and a disaster at the same time After Mexico's textile industry decline in the late 1980s some families of former textile workers in San Cosme opened home workshops talleres and a small scale textile based economy took root These families who managed to prosper through their own trade and industry demonstrate that those who rely on consumer demand for their livelihood need not always follow the dictate of the marketplace but rather can position themselves assertively to influence alternative economic possibilities held close to their culture Employing rich ethnography and broad analysis Rothstein focuses on how everyday life has been transformed by these processes but shows also how important continuities with the past persist She strikes a delicate balance between firmly grounded scientific study and a deep compassion for the subjects of her work while challenging contemporary views of globalization and consumption

Immigrant Businesses J. Rath,2000-02-01 In the past few years a considerable number of immigrants have established their own businesses In doing so they have contributed in many ways to the economic development of American and European metropolitan areas Some businesses have been incorporated into the mainstream while others have stayed on the economic fringes and got engaged in the informal economy The starting point of this book is that a proper understanding of these businesses is served by focusing on the embeddedness of immigrant businesses in their economic politico institutional and social environments from a multi disciplinary perspective rather than confining the attention to ethnic cultural or economic sociological aspects only
