The regulation of agricultural biotechnology Edith Douglas Meacham,1987 *Genes, Trade, and Regulation* Thomas Bernauer,2003 This book provides novel and thought provoking insights into the fundamental policy issues involved in agricultural biotechnology Thomas Bernauer explains global regulatory polarization and trade conflict in this area He then evaluates co operative and unilateral policy tools for coping with trade tensions Arguing that the tools used thus far have been and will continue to be ineffective he concludes that the risk of a full blown trade conflict is high and may lead to reduced investment and the decline of the technology Bernauer concludes with suggestions for policy reforms to halt this trajectory recommendations that strike a balance between public safety concerns and private economic freedom so that food biotechnology is given a fair chance to prove its environmental health humanitarian and economic benefits Review of Current and Proposed Agricultural Biotechnology Regulatory Authority and the Omnibus Biotechnology Act of 1990 United States. Congress. House. Committee on Agriculture. Subcommittee on Department Operations, Research, and Foreign Agriculture,1991 **Risk Regulation in the Internal Market** Maria Weimer,2019-03-19 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific

complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity
