

# Sexual Identities

- Despite recent binary constructions of hetero- homo- and bi- sexualities, sexuality is far more complex, fluid and socially, historically and contextually contingent
- Since Kinsey, there has been growing recognition of the overlap between the hetero- and the homo- and of sexual fluidity in individual lives.
- Sexuality is contested: behaviour, orientation (innate or acquired), a strategic identity, an actual identity, with/out a politicised component, a broader ethos....
- Sexuality is plural, gendered, socially, temporally and spatially contingent.
