

THE POLITICS OF REGULATORY REFORM

MICHAEL D. REAGAN

University of California, Riverside

THE HISTORY of science abounds with examples of practical needs stimulating theoretical developments: navigational problems and gravity; schizophrenia and biomedical research; World War II and the harnessing of atomic power. In politics, President Nixon's mode of governance led to a rethinking of our discipline's long-time insistence that our system required a strong presidency and that the public interest was better served by the power of the presidency than by congressional logrolling. Now, legislative resurgence is celebrated.

In similar fashion, the attention to deregulation inaugurated under President Carter and pushed with rhetorical fervor by President Reagan may have as one of its more positive unintended consequences a resurgence of political science interest in the theory of regulation, a field largely dormant after what is known as "capture theory" was developed in the fifties. Some recent studies provide evidence that such reconsideration of the field of regulation may already be underway, although so far more in the writings of economists than of political scientists. It, therefore may be time for a state-of-the-art piece on the study of regulation, emphasizing *deregulation* as far as the literature permits. This will cover approaches and methods; substantive directions; the contributions of particular books for teaching and research; and, of course, further research needs and opportunities. The overall perspective taken is not economic, not legal, but political; the intent is to "see what's there," not to impose a thesis of the reviewer's devising.

DEREGULATION

Looking first at materials directly focused on deregulation, we find mostly an econo-legal literature. One of the latest broad-scope works is Robert W. Poole, Jr.'s *Instead of Regulation* (1982). An edited volume covering energy, transportation, securities markets, pollution, product safety and health, its contributors (economists, attorneys, and one public policy person teaching in a political science department) share a common theme and goal. The theme is that present directive (so-called "command and control") regulation can be greatly reduced by substituting more information for consumers and strengthened liability laws. The goal is to return substantial decision-making power to individuals, to recognize what Poole terms "the primacy of individual choice . . . and full responsibility for one's actions" (p. x). There is a strongly ideological tone to many of the essays, with market forces and consumer preferences given the benefit of the doubt generally whenever they are seen as in conflict with the alternative of governmental requirements. Clarkson and Muris, for example, in their chapter entitled "Letting competition serve consumers," argue against "coercing better quality" and contend that consumers

China's Quest for Political Legitimacy Baogang Guo, 2010-09-23 This book examines the new equity enhancing politics in China in the context of Chinese traditional cognitive patterns of political legitimacy and its implication for Chinese political development in the near future Based on an analysis of the new governing philosophy the generation of political elite and a new set of public policies the book reaffirms the emergence of a new Chinese polity that infuses one party rule with limited electoral and deliberative democracies Unlike many scholars who perceive the contemporary Chinese history as a constant search for democracy this book takes a very different approach It asserts that the enduring question in political development in China today is no different from what was sought after throughout Chinese history namely the constant search for political legitimacy Even though the quest for democracy is instrumental to that end it may not ultimately lead to the embrace of a full fledged liberal democracy The new politics is not only a rationalization of the efficiency based development but also a major paradigm shift in China's developmental strategy

The Politics of Regulatory Reform Stuart Shapiro, Debra Borie-Holtz, 2014-01-21 Regulation has become a front page topic recently often referenced by politicians in conjunction with the current state of the U S economy Yet despite regulation's increased presence in current politics and media The Politics of Regulatory Reform argues that the regulatory process and its influence on the economy is misunderstood by the general public as well as by many politicians In this book two experienced regulation scholars confront questions relevant to both academic scholars and those with a general interest in ascertaining the effects and importance of regulation How does regulation impact the economy What roles do politicians play in making regulatory decisions Why do politicians enact laws that require regulations and then try to hamper agencies abilities to issue those same regulations The authors answer these questions and untangle the misperceptions behind regulation by using an area of regulatory policy that has been underutilized until now Rather than focusing on the federal government Shapiro and Borie Holtz have gathered a unique dataset on the regulatory process and output in the United States They use state specific data from twenty eight states as well as a series of case studies on regulatory reform to question widespread impressions and ideas about the regulatory process The result is an incisive and comprehensive study of the relationship between politics and regulation that also

encompasses the effects of regulation and the reasons why regulatory reforms are enacted Money and Politics Program: Guide to Applying Lessons Learned ,2006 Proceedings of the International Conference on Emerging Challenges: Sustainable Strategies in the Data-Driven Economy (ICECH 2024) Dinh Nguyen Van,Nguyen Nguyen Danh,Ngoc Luu Thi Minh,Mai Nguyen Phuong,2025-04-30 This is an open access book International School Vietnam National University Hanoi Hanoi University of Science and Technology School of Economics and Management University of Economics and Business Vietnam National University Hanoi National Economics University Faculty of Business Management The University of Danang University of Economics University of Economics Ho Chi Minh City Foreign Trade University University of Economics Hue University University of Hertfordshire UK AVSE Global France PPM School of Management Indonesia EM Normandie Business School France will organize the 12th International Conference on Emerging Challenges Sustainable Strategies in the Data driven Economy in Thanh Hoa Vietnam on November 1 2 2024 We would like to invite you to be a part of the ICECH2024 and submit your research papers for presentation The details are as follows Thanks to the juggernaut technological development especially in the context of the Industrial Revolution 4 0 such as greater data availability and the increasing popularity of the Internet governments firms and people are utilizing data especially big data to improve their decision making boost productivity understand citizens and or customers needs and behaviours meet a greater variety of demands and many others benefits It is undeniable that the data driven economy features powerful economies of scale economies of scope network externalities in many sectors and pervasive information asymmetry Businesses globally are experiencing a significant increase in digitalization leading to a surge in data volumes and emphasizing the need for enterprises to prioritize data driven approaches Data is becoming a crucial company asset and its value relies on effectively utilizing it to produce actionable insights for strategic decision making In addition to the challenges that businesses are facing in the data driven economy over the past few years the world has been gripped with rising uncertainties and significant challenges such as the COVID 19 pandemic the Russia Ukraine or the Israel Hamas conflicts These issues coupled with current lingering problems such as climate change do pose significant threats to economies and companies around the world In response to these challenges governments and firms have adopted sustainability oriented approaches such as the digitalization and or digital transformation of business activities the pursuant of sustainable development goals SDGs or the adoption of Environmental Social and Governance ESG practices In the context of coupling challenges as mentioned above it is essential to discuss the solutions that businesses should take to be resilient in uncertain contexts and achieve sustainable development Thus ICECH2024 aims to provide a forum for academics and professionals to share research findings experiences and knowledge with respect to the craft implementation and effects of sustainable strategies in a data driven global economy The ICECH2024 Conference will focus on but not limited to Asia Pacific nations We welcome submissions in the following areas Economics Business Law Management Finance and Banking Innovation and Technology Accounting and

Auditing Obamacare Wars Daniel Béland, Philip Rocco, Alex Waddan, 2023-02-10 Not five minutes after the Affordable Care Act ACA was signed into law in March 2010 Virginia's attorney general was suing to stop it And yet the ACA rolled out in infamously bumpy fashion and rolled on fought and defended at every turn despite President Obama's claim in 2014 that its proponents and opponents could finally stop fighting old political battles that keep us gridlocked But not only would the battles not stop as Obamacare Wars makes acutely clear they spread from Washington DC to a variety of new arenas The first thorough account of the implementation of the ACA this book reveals the fissures the act exposed in the American federal system Obamacare Wars shows how the law's intergovernmental structure which entails the participation of both the federal government and the states has deeply shaped the politics of implementation Focusing on the creation of insurance exchanges the expansion of Medicaid and execution of regulatory reforms Daniel B land Philip Rocco and Alex Waddan examine how opponents of the ACA fought back against its implementation They also explain why opponents of the law were successful in some efforts and not in others and not necessarily in a seemingly predictable red vs blue pattern Their work identifies the role of policy legacies institutional fragmentation and public sentiments in each instance as states grappled with new institutions as in the case of the exchanges or existing structures in Medicaid and regulatory reform Looking broadly at national trends and specifically at the experience of individual states Obamacare Wars brings much needed clarity to highly controversial but little understood aspects of the Affordable Care Act's odyssey with implications for how we understand the future trajectory of health reform as well as the multiple forms of federalism in American politics

Reforming the Workplace Joseph Rees, 2016-11-11 Government regulatory agencies are too often tangled webs of bureaucracy fraught with internal politics and in conflict with both industries and individuals How to instigate and implement the needed reform is a timely issue that is currently being debated Reforming the Workplace is an account of a successful program that is now a model for nationwide improvements in various regulatory agencies Joseph Rees's focus is the Occupational Safety and Health Administration OSHA which in 1982 announced a major shift in policy from strict government regulation to self regulation by industries with proven safety records In California this resulted in the Cooperative Compliance Program CCP an arrangement among labor unions management and California OSHA that became responsible for overseeing safety regulations at seven large construction sites throughout the state In his detailed study of the CCP Joseph Rees provides important empirical data and assesses the reasons the program succeeded That success is so important he demonstrates because the CCP represents a different approach to reform self regulation that can be extended to and tailored for many troubled agencies Reforming the Workplace is a comprehensive study that will be a valuable resource for scholars and students of law and social policy in general and of federal regulation policies in particular

Environmental Policy in New Zealand Ton Bührs, Robert V. Bartlett, 1993 Since the mid 1980s environmental policy has had an especially high profile in New Zealand politics New Zealand has taken the initiative in promoting strong measures

that deal with global warming nuclear issues ozone depletion driftnet fishing and the protection of Antarctica This book provides the first systematic and critical analysis of environmental policy in New Zealand based on concepts and theories from the fields of environmental politics research and public policy studies It assesses the strengths and weaknesses of New Zealand's environmental policies with respect to four recurring themes the need for anticipatory policy making the need to change our ways the need for institutional reform to enhance policy performance and the need for more integrated and comprehensive policy Given that New Zealand is a widely perceived and self promoted clean and green country its environmental policies are of special international significance and interest

The Political Economy of Structural Reforms in Europe Nauro F. Campos, Paul De Grauwe, Yuemei Ji, 2018-07-04 Reforms in labour and product markets play a central role in government policies The Political Economy of Structural Reforms in Europe takes stock of current frontier work It brings together leading contributions from academia the central banks in Europe and the OECD to argue that structural reforms can make a fundamental contribution to improve economic performance across Europe The Political Economy of Structural Reforms in Europe brings together theoretical and empirical studies that address the potential role of structural reforms in restoring macroeconomic stability resuming economic growth addressing income inequality and grappling secular stagnation It throws new light on the determinants and effects of structural reforms and on how these shape the European integration experience

Bureaucratic Politics and Regulatory Reform Brian Cook, 1988-01-13 Based on interviews with key EPA decision makers and an analysis of the public record this informative case study demonstrates how the contemporary movement for regulatory reform has actually affected the internal organizational politics of a highly visible administrative agency The volume offers an in depth look at how a specific agency effort at regulatory reform can be drastically influenced by the machinations of bureaucratic politics Evidence is offered to support Cook's claim in contrast to conventional views that senior political and career leadership has considerable influence over the policy direction of an administrative agency
