Rehabilitation Of Partially Disabled People:

Rehabilitation of Partially Disabled People S. Klose, 1998 Handicapped and partly disabled workers constitute a major problem from a labour market policy point of view In many European countries governments are puzzled by the question how to favour rehabilitation of these workers Their physical or mental condition does not allow them to enter just every possible job available So this group needs additional attention compared to long term unemployed ethnic minority workers and other groups with an unfavourable labour market position Different countries and within countries different industries and firms seem to be more succesful when it comes to reintegration than others This book discusses rehabilitation policies in different European countries and tries to answer the question why some are more and others are less succesful In some countries rules and regulations are mostly preventive by nature elsewhere reintegration is the principle goal Countries also differ with respect to the responsibilities of national and local authorities and private companies respectively As the authors do not limit themselves to specific measures but discuss these measures within the broader framework of legal and policy measures regarding disability the study offers interesting insights in what kind of measures are and can be taken in this field Moreover the authors all of them national and international experts with respect to disability arrangements discuss the limits and possibilities of the measures taken in the countries under study

Rehabilitation for the Unwanted

Elizabeth Eddy, 2017-09-29 This book is a study detailing what happens to people and what life is like in a rehabilitation program The program discussed is embedded in an institution called Farewell Hospital by the authors that was designed to fill a demand for facilities for those judged unable to live on their own Due to physical or mental handicaps and no family friends or other social agents who are willing to make a home for them outside of a public institution these patients were placed in a rehabilitation unit Most patients were placed with the rehabilitation unit as a brief interlude before their permanent placement in the custodial unit of the vast institution where they would live out their lives This work deals with the question of what happens to patients once they are rehabilitated and the non therapeutic rules and practices of the health and welfare structure of which they are a part In this case the rehabilitation specialists and ward workers set themselves the task of improving the life chances of their clients by treating their ailments when possible and by improving their physical functioning so that they were better able to care for their own needs The authors examine the effects of the organizational relationships on rehabilitation outcomes and on the lives of the people who make hospitals their home The text attempts to sustain feeling for the historical context of their study the problem of larger numbers of disabled poverty stricken persons who are no longer wanted by anyone and asserts that a solution must be found
