Rehabilitation Of The Physically Handicapped Adolescent:

Rehabilitation of the Physically Handicapped Adolescent Hilda K. Waldhorn, 1973
Handicapped, 1972
Disability in Adolescence Elizabeth M. Anderson, Lynda Clarke, 2022-12-29
For all the work on disability in previous years there had been surprisingly little done on a subject of central importance the social and psychological needs of teenagers with disabilities Originally published in 1982 the purpose of this timely book was both to review the literature and to report an extensive study of the nature of the psychological problems the quality of social life and the adequacy of the services available to a substantial group of teenagers with disabilities in the last years at school with a follow up study of half their number a year later The authors show that many of these teenagers including those with a mild disability are often unhappy worried and isolated from their peers While the majority of the teenagers with disabilities whether in ordinary or special schools made friends at school these friendships were rarely sustained outside After leaving school the degree of social isolation is as great and often worse Among these teenagers the incidence of psychological problems was three to four times higher than for a control group the most common being worry depression misery fearfulness and lack of self confidence and self esteem For the most part the teenagers with disabilities were likely to be immature and ill prepared to cope with adult life These findings underline the need for a counselling service while the teenagers are still at school and supporting services when they have left Like other teenagers those in this study were unprepared for the possibility of not having a job and had not thought how to organize their lives if a job was not available or feasible The authors draw attention to the large proportion of people with disabilities without occupation after leaving school and the high dissatisfaction with day centres Perhaps their most important finding is the need to rationalize the piecemeal and overlapping provision of help for school leavers with disabilities In the meantime their book provides a wealth of information of direct use to those concerned with teenagers with disabilities and their families whether in school provision careers advice work placement and alternatives to work social services counselling medical services and further education This book is a re issue originally published in 1982 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication
Occupational Experiences for Handicapped Adolescents in Day Schools Elise Henrietta Martens, 1938
Integrated Programmes for Handicapped Adolescents and Adults Roy I. Brown, 2021-04-27
First published in 1984 Integrated Programmes for Handicapped Adolescents and Adults explores the need to develop integrated programmes for adolescents and adults with developmental disabilities Whilst the training models and concepts examined largely relate to formal areas of education such as reading mathematics and writing the book also pays close attention to social education skills including home management budgeting meal preparation and the development of positive familial relationships Integrated Programmes for Handicapped Adolescents and Adults presents a number of projects from different parts of the world with an emphasis on linking research and practice
