Reinventing Electric Utility Regulation Gregory B. Enholm, John Robert Malko, 1995 Learn from this collection of thought provoking commentary on change and electric regulatory reform from executives state regulators and federal commissioners in the regulatory community Plus perspectives from other players the utilities governed by these regulators the financial community rating agencies independent power producers and public power Obtaining the best from Regulation and Competition Michael A. Crew, Menahem Spiegel, 2006-02-20 Deregulation has introduced competition into traditionally monopolistic markets particularly telecommunications and electric utilities This book brings together ten essays that were presented at the Center for Research in Regulated Industries at Rutgers University and funded by several regulated companies The authors who include young scholars as well as established and highly regarded consultants and researchers address some of the major issues now facing network industries and regulators deregulation competition stranded assets diversification pricing and mergers and acquisitions The Federal Energy Regulatory Commission's Proposed Rules Affecting the Electricity Industry United States. Legislature. House of Representatives. Committee on Utilities and Telecommunications, 1996 *Soul of the Grid* Arthur O'Donnell, 2003 I felt like we had failed said director of grid operations Jim Detmers in a pained voice In my mind I pictured people stranded in elevators I pictured people stranded in

stores and checkout lines All I could think of was the Inconvenience and I m sitting here thinking thinking what rock did we not look under to maybe prevent this As the focal point of an unprecedented power crisis that has tarnished the Golden State the California Independent System Operator California ISO carries the mixed burden of being a disaster survivor Established to maintain electrical system reliability for the world s fifth largest economy California ISO has been both praised and vilified for its efforts amidst the chaos of blackouts price volatility political backlash and market manipulations by Enron and other ruthless competitors This book chronicles how the California ISO came to be and what happened during its first five years More importantly though this is the story of the people who make up California ISO and give it an identifiable character and culture its soul The result is a very human drama that is otherwise unavailable from the regulatory record or media accounts of California s unparalleled power emergency *Searching the Law, 3d Edition* Frank Bae,Edward Bander,Francis Doyle,Joel Fishman,Paul Richert,2021-12-13 **Reinventing Fire** Amory Lovins,2013-10 Oil and coal have built our civilisation created our wealth and enriched the lives of billions Yet their rising costs to our security economy health and environment are starting to outweigh their benefits Moreover the tipping point where alternatives work better and compete purely on cost is not decades in the future it is here and now And that tipping point has become the fulcrum of economic transformation In *Reinventing Fire* Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race not forced by public policy but led by business for long term advantage This independent and rigorous account offers market based solutions integrating transportation buildings industry and electricity It maps pathways for running a 158% bigger US economy in 2050 but needing no oil no coal no nuclear energy one third less natural gas and no new inventions This transition would cost 5 trillion less than business as usual without counting fossil fuels huge hidden costs Whether you care most about profits and jobs or national security or environmental stewardship climate and health *Reinventing Fire* makes sense It s a story of astounding opportunities for creating the new energy era Publisher description *Electric Power Industry* United States. Congress. Senate. Committee on Energy and Natural Resources,1996 **Moniz, Sullivan, Gee, Reicher, Angell, and Telson Nominations** United States. Congress. Senate. Committee on Energy and Natural Resources,1998 *Statehouse and Greenhouse* Barry G. Rabe,2004-02-17 No environmental issue triggers such feelings of hopelessness as global climate change Many areas of the world including regions of the United States have experienced a wide range of unusually dramatic weather events recently Much climate change analysis forecasts horrors of biblical proportions such as massive floods habitat loss species loss and epidemics related to warmer weather Such accounts of impending disaster have helped trigger extreme reactions wherein some observers simply dismiss global climate change as at the very worst a minor inconvenience requiring modest adaptation It is perhaps no surprise therefore that an American federal government known for institutional gridlock has accomplished virtually nothing in this area in the last decade Policy inertia is not the story of this book however Statehouse and

Greenhouse examines the surprising evolution of state level government policies on global climate change Environmental policy analyst Barry Rabe details a diverse set of innovative cases offering detailed analysis of state level policies designed to combat global warming The book explains why state innovation in global climate change has been relatively vigorous and why it has drawn so little attention thus far Rabe draws larger potential lessons from this recent flurry of American experience Statehouse and Greenhouse helps to move debate over global climate change from bombast to the realm of what is politically and technically feasible

Switching to Solar Bob Johnstone, 2011-11-29 The looming threat of global warming may be the greatest challenge of the present generation Confronted by the potential of such a massive worldwide calamity the average citizen often wonders what he or she can do In this inspiring and optimistic story of a green revolution in the making veteran science and technology journalist Bob Johnstone shows how the unrelenting efforts of a small band of grassroots activists have discovered ways to make solar a practical retail energy solution The crucial driver for the adoption of solar energy has not been technology but policy Focusing on initiatives in Germany he describes the use of the feed in tariff as the most successful policy mechanism yet invented to spur on widespread deployment of solar energy Turning to California Johnstone reviews the efforts of policy wonks to create new schemes to make solar affordable at the municipal level Pioneers in both tree hugging Berkeley and golf playing Palm Desert have united in common cause and other towns and cities are planning to follow suit As with other emerging trends as California goes so goes the rest of the country Concluding with a positive view of the future Johnstone describes the creativity of many startups fueled by venture capital Innovation is being applied to every part of the process from silicon production to financing and installation The details may still be uncertain but there s no doubt that the solar revolution is underway Bob Johnstone Melbourne Australia is the author of Brilliant Shuji Nakamura and the Revolution in Lighting Technology We Were Burning Japanese Entrepreneurs and the Forging of the Electronic Age and Never Mind the Laptops Kids Computers and the Transformation of Learning He has also contributed numerous articles on technology to Forbes Nature New Scientist MIT Technology Review Wired and the Far Eastern Economic Review

River City and Valley Life Christopher J. Castaneda, Lee M.A. Simpson, 2013-12-09 Often referred to as the Big Tomato Sacramento is a city whose makeup is significantly more complex than its agriculture based sobriquet implies In *River City and Valley Life* seventeen contributors reveal the major transformations to the natural and built environment that have shaped Sacramento and its suburbs residents politics and economics throughout its history The site that would become Sacramento was settled in 1839 when Johann Augustus Sutter attempted to convert his Mexican land grant into New Helvetia or New Switzerland It was at Sutter s sawmill fifty miles to the east that gold was first discovered leading to the California Gold Rush of 1849 Nearly overnight Sacramento became a boomtown and cityhood followed in 1850

Ideally situated at the confluence of the American and Sacramento Rivers the city was connected by waterway to San Francisco and the surrounding region Combined with the area s warm and sunny climate the rivers provided the necessary water supply for agriculture to flourish The devastation wrought by floods and cholera however took a huge toll on early populations and led to the construction of an extensive levee system that raised the downtown street level to combat flooding Great fortune came when local entrepreneurs built the Central Pacific Railroad and in 1869 it connected with the Union Pacific Railroad to form the first transcontinental passage Sacramento soon became an industrial hub and major food processing center By 1879 it was named the state capital and seat of government In the twentieth century the Sacramento area benefitted from the federal government s major investment in the construction and operation of three military bases and other regional public works projects Rapid suburbanization followed along with the building of highways bridges schools parks hydroelectric dams and the Rancho Seco nuclear power plant which activists would later shut down Today several tribal gaming resorts attract patrons to the area while Old Sacramento revitalizes the original downtown as it celebrates Sacramento s pioneering past This environmental history of Sacramento provides a compelling case study of urban and suburban development in California and the American West As the contributors show Sacramento has seen its landscape both ravaged and reborn As blighted areas rail yards and riverfronts have been reclaimed and parks and green spaces created and expanded Sacramento s identity continues to evolve As it moves beyond its Gold Rush Transcontinental Railroad and government town heritage Sacramento remains a city and region deeply rooted in its natural environment
