## **Reinventing Media:**

**Re-Inventing the Media** Graeme Turner, 2015-08-27 Re Inventing the Media provides a highly original re thinking of media studies for the contemporary post broadcast post analogue and post mass media era While media and cultural studies has made much of the changes to the media landscape that have come from digital technologies these constitute only part of the transformations that have taken place in what amounts of a reinvention of the media over the last two decades Graeme Turner takes on the task of re thinking how media studies approaches the whole of the contemporary media scape by focusing on three large cross platform and transnational themes the decline of the mass media paradigm the ongoing restructuring of the relations between the media and the state and the structural and social consequences of celebrity culture By addressing the fact that the reinvention of the media is not simply a matter of globalising markets or the take up of technological change Turner is able to explore the more fundamental movements and widespread trends that have significantly influenced the character of what the contemporary media have become how it is structured and how it is used Re Inventing the Media is a must read for both students and scholars of media culture and communication studies

Communist World Eastern Europe's Tortured Path to Change edited by Peter Gross and Karol Jakubowicz is a collection of analyses of Eastern European media by some of the most distinguished scholars in the field. This in-depth exploration shows how despite positive changes after the fall of Communism the transformations of societal institutions including the mass media have turned out to be slow, uncertain and unsatisfying to many when measured against the admittedly ambiguous and overly Panglossian expectations. This collection offers readers a different view of post-Communist media by examining the mass media's evolution in the region from a more holistic perspective. The contributors to this volume respond to essential questions including: Is the post-Communist transition and transformation over? When can it be considered over? Each chapter contributes to our understanding of these questions by offering theoretical overviews and country-specific studies. This collection serves as an affirmation that the study of mass media is essential to understanding the nature and workings of democracy in the long-suffering nations of Central and Eastern Europe with international applications. *Media Transformations in the Post-Communist World* is an indispensable contribution to the study of Eastern Europe after Communism and the transformations of mass media in the region. **Media in Process** Sai Felicia

Krishna-Hensel, 2016-09-19. The post-communist development of media systems has been uneven in the countries of the region. Television and newspapers together with the emergence of social media have had great influence on the political debate in various countries. Ownership of the media has been a factor in many instances. The integration of traditionally isolated Central Eastern Europe into larger worldwide trends has fundamentally changed the way we look at the media in this region. This volume proposes to address the transition of the media and communication industries in the contemporary period. The contributions discuss among other things the obstacles that still remain for the media to play an effective watchdog role in the new democracies and whether the advent of the Internet and social media has helped or hindered the transformation to a powerful independent media. The discussion further examines whether advertising agencies have targeted post-communist citizens differently than those in Western European countries and if the media markets in the post-communist region are fundamentally different than in Western Europe and North America. A second focus of the volume is the media coverage of social issues like domestic violence which is intended to draw attention to these issues and influence policy in a more aware and open society. This establishes the trend of post-communist media following the example of western media practice. The implications of the Central European media transformation for the newly transforming media markets in the post-Soviet space suggest a new phase in the development of the medium. The impact of global influences on regional expression is an important aspect of the political and social changes that are underway. This volume makes an important interdisciplinary contribution in examining the development of the media. *Central and Eastern European Media in Comparative Perspective* John Downey, Sabina Mihelj, 2016-04-15. Appearing more than twenty years after the revolutions in Central and Eastern Europe, this book could not have come at a more appropriate time: a time to take stock not only of the

changes but also the continuities in media systems of the region since 1989 To what extent are media institutions still controlled by political forces To what extent are media markets operating in Central and Eastern Europe Do media systems in Central and Eastern Europe resemble media systems in other parts of Europe The answers to these questions are not the same for each country in the region Their experience is not homogeneous An international line up of distinguished experts and emerging scholars methodically examine the different economic political cultural and transnational factors affecting developments in media systems across Central and Eastern Europe Whereas earlier works in the media system tradition have in the main adopted the political framework of comparative politics the authors argue that media systems are also cultural and economic institutions and there are other critical variables that might explain certain outcomes better Topics discussed range from political economy to gender inequality to the study of ethno cultural diversity This unmatched volume gives you the unique opportunity to study the growing field of comparative media analysis across Eastern and Western Europe A valuable resource that goes beyond the field of media and cultural analysis which media scholars as well as to area specialists should not go without

**Hungary's Crisis of Democracy** Peter Wilkin, 2016-08-26 This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz

government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO

*Remaking Media* Robert Hackett, William Carroll, 2006-07-29 *Remaking Media* is a unique and timely reading of the contemporary struggle to democratize communication With a focus on activism directed towards challenging and changing media content practices and structures the book explores the burning question What is the political significance and potential of democratic media activism in the western world today Taking an innovative approach Robert Hackett and William Carroll pay attention to an emerging social movement that appears at the cutting edge of cultural and political contention and ground their work in three scholarly traditions that provide interpretive resources for the study of democratic media activism political theories of democracy critical media scholarship the sociology of social movements *Remaking Media* examines the democratization of the media and the efforts to transform the machinery of representation Such an examination will prove invaluable not only to media and communication studies students but also to students of political science

**The Impact of European Institutions on the Rule of Law and Democracy** Matej Avbelj, Jernej Letnar Cernic, 2020-04-30 Since 2010 the European Union has been plagued by crises of democracy and the rule of law which have been spreading from Central and Eastern Europe CEE catching many by surprise This book argues that the professed success of the 2004 big bang enlargement mirrored the Potemkin villages erected in the new Member States on their accession to Europe Slovenia is a prime example Since its independence and throughout the accession process Slovenia has been portrayed as the poster child of the New Europe This book claims that the widely shared narrative of the Slovenian EU dream is a myth In many ways Slovenia has fared even worse than its contemporary constitutionally backsliding CEE counterparts The book's discussion of the depth and breadth of the democratic crises in Slovenia should contribute to a critical intellectual awakening and better comprehension of the real causes of the present crises across the other CEE Member States which threaten the viability of the EU and Council of Europe projects It is only on the basis of this improved understanding that the crises can be appropriately addressed at national transnational and supranational levels
