Schoolteachers in the News Kathryn Shine,Tom O'Donoghue,2013-02-28 Research examining how schoolteachers have been represented in the news is scarce This is noteworthy given the recognition that the news media has an influential agenda setting function plays a pivotal role in shaping public opinion and can influence educational policy Indeed there is a view amongst some authorities that education policy and news media coverage are irrevocably interconnected Specifically in relation to newspapers research indicates that their coverage can be particularly influential in informing and influencing public debate and policy about a variety of educational issues Research has also been conducted on the reactions of teachers reporting that they perceive news media coverage as important in shaping public opinion and education policy as well as affecting their relationships with families friends and the community Teachers in various countries have also expressed frustration at what they have perceived as a negative focus in coverage Furthermore news media coverage has been seen to play a role to the decline in the status of teaching that has been documented by researchers from many developed countries over the past three decades It has been claimed that contemporary news media coverage has led to greater scrutiny and criticism of the teaching profession than ever before with educators increasingly having to explain and justify their work In addition to the widespread concern about the decline in the status of teaching many countries are experiencing ongoing teacher recruitment and retention problems Despite this very few studies have considered how schoolteachers and teaching as a profession are depicted in the news media Particularly scarce are investigations with a historical dimension This book helps fill the gap by examining the reporting in The West Australian newspaper one of the oldest newspapers in Australia and a daily publication since 1885 It is offered as a contribution towards rectifying the deficit in the corpus of work on how

newspapers have depicted teachers and points the way towards one of a number of avenues of research that other scholars in the field could take for various contexts including different countries and time periods The specific aim of the study is to provide a historical analysis of The West Australian newspaper's representation of teachers over two decades To that end it examines the portrayal of teachers in its reporting of five major educational developments in the state of Western Australia that were the subject of sustained coverage at various times between 1987 and 2007 unit curriculum 1987 1989 industrial dispute 1995 standardised testing 1997 2001 teacher shortage 1997 2007 and outcomes based education 2005 2007 Although the study focused on The West Australian newspaper the topics chosen reflect the international trends and universal issues in education Each of the topics in the study is located within the broader context of related developments internationally and especially in the United States the United Kingdom and Australia Three key representations of teachers are identified negative representations sympathetic representations and positive representations The negative representations refer to coverage which is overtly critical of teachers such as reporting which condemns teachers for taking industrial action the sympathetic representations relate to reporting which typically presents teachers as stressed overburdened and powerless and the positive representations show teachers as valued by the community and devoted to their students and work The central argument of the study is that The West Australian's coverage was dominated by both negative and sympathetic representations of schoolteachers while positive representations were relatively rare Overall the coverage presented a less flattering image of teachers than that which emerges from the educational research literature yet it provided a more balanced presentation of teachers than the extremes of hero and villain which tend to dominate popular culture Its portrayal of teachers was generally consistent with that of other news media with a movement towards a more sympathetic treatment in recent reporting reflecting a trend also identified in contemporary British newspaper coverage Although the sympathetic coverage did recognize the challenges faced by teachers it consistently presented teaching as a profession in a negative light Across the coverage there was almost a total absence of voices defending teaching or presenting it as an attractive career option In addition comments of any type from individual teachers were rare Overall the book highlights the need for key media spokespeople in education politicians union representatives bureaucrats and academics to consider carefully the messages they want to send regarding teachers and teaching It also points to implications for journalism education and journalism practice This book should be read by those working in the fields of educational policy journalism education media studies and history of education internationally particularly those working in these fields in the United States Canada the United Kingdom Australia and New Zealand
