

Reinvent the Wheel

To reinvent the wheel means to do something again, or try to improve something, that is already perfected and cannot be improved...

“The new company isn’t so much reinventing the wheel as finding ways to make it much too expensive.”

Bronwen Percival, Francis Percival, 2017-09-05 Reinventing the Wheel is equal parts popular science history and muckraking Over the past hundred and fifty years dairy farming and cheesemaking have been transformed and this book explores what has been lost along the way Today using cutting edge technologies like high throughput DNA sequencing scientists are beginning to understand the techniques of our great grandparents The authors describe how geneticists are helping conservationists rescue rare dairy cow breeds on the brink of extinction microbiologists are teaching cheesemakers to nurture the naturally occurring microbes in their raw milk rather than destroying them and communities of cheesemakers are producing real cheeses that reunite farming and flavor rewarding diversity and sustainability at every level Provided by publisher [Let's Not Reinvent the Wheel](#) Ian E. McNett, 1983 *Hit the Ground Kneeling* Stephen Cottrell, 2021-08-31 When someone hits the ground running there is all the superficial attraction of movement and progress But there is no guarantee that they are going in the right direction In *Hit The Ground Kneeling* Stephen Cottrell takes common statements about leadership statements that we often take for granted and challenges them in the light of the Christian faith and Christian perspectives on leadership Wherever you exercise leadership at work organizing a home or doing something like coaching a local football team the author playfully suggests some models of leadership that can help you whether or not you reckon you re a Christian *The Wall Street Journal*, 2007 [EBOOK: Enhancing Learning, Teaching, Assessment and Curriculum in Higher Education](#) Veronica Bamber, Paul Trowler, Murray Saunders, Peter Knight, 2009-03-16 Higher education is a particularly complex site for enhancement initiatives This book offers those involved in change a coherent conceptual overview of enhancement approaches of the change context and of the probable interactions between them The book sets enhancement within a particular type of change dynamic which focuses on social practices The aim is to base innovation and change on the probabilities of desired outcomes materializing rather than on the romanticism of policies that underestimate the sheer difficulty of making a difference Following a theoretical introduction to these ideas there are case studies from the UK Australia New Zealand South Africa and Norway at the national institutional departmental and individual levels illustrating the argument that enhancement is best achieved when it works with social practices in real institutional and organizational settings In a final section the authors link the case examples and theoretical frameworks inviting readers to consider their own enhancement situations and apply the frameworks for action offered in earlier sections of the book The book doesn't offer quick fix solutions but aims to support change with practical examples conceptual tools and reflexive questions for those involved in change at all levels It is key reading for higher education lecturers managers educational developers and policy makers *Katsoulis V. Betty Cannon, 1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre's work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud's psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud's work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self's ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post-Freudians like Melanie Klein Otto Kernber Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy

Johnston, 1995 Pitirim A Sorokin 1889 1968 was one of the most original important and controversial figures in American sociology His spectacular rise from a peasant childhood in Czarist Russia to the Olympian heights of Harvard University provides an unlikely and fascinating lens for examining the history of an entire discipline And as Barry Johnston shows his equally dramatic fall from favor and unexpected resurrection illuminate both Sorokin's life and the tempestuous world of academic politics An outspoken revolutionary and secretary to Alexander Kerensky Sorokin was imprisoned and ordered executed by Lenin then reprieved and exiled During the 1920s he flourished as a teacher and scholar at the University of Minnesota where he published several pioneering books on the Russian Revolution social mobility sociological theory and rural sociology Harvard president A Lawrence Lowell was so impressed that he recruited Sorokin to chair the university's first department of sociology From 1930 to 1944 the department prospered under Sorokin's leadership attracting an entire generation of young scholars who in their own right would have a profound impact on the discipline In this period Sorokin published several volumes of his magnum opus *Social and Cultural Dynamics* and became embroiled in a bitter battle with rival Talcott Parsons for control of the department Parsons ultimately deposed Sorokin and transformed

sociology into the Department of Social Relations Sorokin nevertheless stayed on at Harvard where he established the Center for Creative Altruism but otherwise continued to work in relative obscurity Finally in 1963 after years in eclipse Sorokin was recognized for his accomplishments when he was elected president of the American Sociological Association During a long and distinguished career Sorokin amassed an amazingly diverse and substantial body of work much of which set the standard for the field At the same time he broke with the conventions of sociology frequently ridiculing and taunting his less adventurous colleagues For his heresy the flamboyant Sorokin was condemned and driven to the periphery of a profession anxious for legitimacy as a science As a result Sorokin's ideas have been consistently ignored and misunderstood for more than a quarter century Based on exhaustive research in Sorokin's papers and the Harvard archives as well as interviews with Sorokin's surviving family members former students and colleagues this biography restores Sorokin to his rightful place in the pantheon of American intellectuals

America's First Battles, 1776-1965 Charles E. Heller, William A. Stofft, 1986 This volume a collection of eleven original essays by many of the foremost U S military historians focuses on the transition of the Army from parade ground to battleground in each of nine wars the United States has fought Through careful analysis of organization training and tactical doctrine each essay seeks to explain the strengths and weaknesses evidenced by the outcome of the first significant engagement or campaign of the war The concluding essay sets out to synthesize the findings and to discover whether or not American first battles manifest a characteristic rhythm America's First Battles provides a novel and intellectually challenging view of how America has prepared for war and how operations and tactics have changed over time The thrust of the book the emphasis on operational history is at the forefront of scholarly activity in military history
