Relating Ranges And Airspace To Air Combat Command Mission And Training:

Relating Ranges and Airspace to Air Combat Command Mission and Training Requirements Albert A. Robbert, 2001 This volume presents an analytical structure developed by RAND and the Air Combat Command in order to help the US Air Force articulate its aggregate needs for ranges and airspace assess the adequacy of its existing assets and justify new of existing assets

Relating Ranges and Airspace to Air Combat Command Missions and Training, 2001 Training aircrews for combat requires access to ranges suitable for actual or simulated weapon delivery and to dedicated airspace suitable for air to air and air to ground tactics To enhance this access Air Combat Command ACC needs a comprehensive objective statement of its range and airspace requirements linked to national interests and a means to compare existing infrastructure with these requirements Project AIR FORCE PAF and ACC working in concert met this need by developing an analytic structure containing the following elements Operational requirements that aircrews and other combatants must be trained to support Training tasks required to prepare aircrews for their assigned operational tasks Range and airspace characteristics needed for effective support of each training task Minimum durations of training events on ranges or airspace with specified characteristics Dimensions location equipment operating hours and other characteristics of current ranges and airspace Relational links among operational requirements training requirements infrastructure requirements and available assets

A Decision Support System for Evaluating Ranges and Airspace Albert A. Robbert, 2001 Ranges and airspace for Air Force training purposes are national resources for which the Air Force must present a credible claim To help the Air Force articulate its aggregate needs assess the adequacy of its existing assets and justify new or existing assets RAND and the Air Combat Command developed an analytic structure containing a joint mission framework training requirements infrastructure requirements and the current infrastructure RAND also constructed a relational database containing several embedded models that complete parts of the assessment process for range and airspace infrastructure A graphical user interface GUI facilitates user access to the database These elements collectively a relational database combined with embedded decision models and GUI constitute a decision support system for range and airspace To realize the power and potential of the decision support system a continuing investment must be made in the human capital needed to maintain and operate it The decision support system could be expanded to include other range and airspace management information efficient calculation of other training resource requirements and requirements and infrastructure from non Air Combat Command range and airspace users
