The Whispers of Cities John-Paul A. Ghobrial, 2013-12-12 In recent years global historians have painted an impressionistic picture of what they call the connected world of the seventeenth century Inspired perhaps by the globalised world in which they write scholars have emphasised how the circulation of people objects and ideas linked the distant reaches of the early modern world Yet for all the advocates of such a connected history we are only beginning to make sense of what global connectedness meant in practice in the lives of ordinary people To this end The Whispers of Cities explores interactions between early modern Europe and the Ottoman Empire through the kaleidoscope of communication It does so by focusing on how information flows linked Istanbul London and Paris in the late seventeenth century Because individuals were at the heart of communication the book offers a micro historical reading of the experiences of Sir William Trumbull English ambassador to Istanbul from 1687 to 1692 It follows Trumbull as he was transformed from a civil lawyer and state official in London to a European notable at the heart of Ottoman social networks in Istanbul In this way The Whispers of Cities reveals how information flows between Istanbul London and Paris were rooted in the personal encounters that took place between Ottomans and Europeans in everyday communication At the intersection of global history and the history of communication therefore the author argues that worlds of information tied Europeans to their Ottoman counterparts long before the age of modernisation as news stories and even fictions transcended linguistic and confessional boundaries and connected people across Europe and the Mediterranean world What emerges here is a picture of globalization that is as much about networks flows and circulation as it is about the imperfections asymmetries and unevenness of connectedness in the early modern world
