ABSTRACT

Problematic social media use (PSMU) is a societal problem, which impacts adolescents' well-being. Fear of missing out (FoMO) has been suggested as a core risk factor predicting both PSMU and adolescents' well-being. However, longitudinal research on the directionality of these relationships is scarce. The present study aims to fill this knowledge gap by testing the bidirectional relationships between FoMO, PSMU and adolescents' life satisfaction in the total sample, as well as for girls and boys separately. This study used four-waves annual longitudinal data collected from 2015 to 2019 among Dutch adolescents aged 11–15 years ($n = 1439$, $M_{age} = 12.5 \pm 0.60$, 45.9% girls). We applied random intercept cross-lagged panel model(s) to separate within-person level effects from between-person level effects. On the within-person level, findings suggested a unidirectional relationship whereby FoMO increased PSMU during mid-adolescence, but not vice versa. Moreover, low life satisfaction predicted an increase in FoMO during early adolescence. These findings underline that FoMO can be considered a risk factor of PSMU, and that low life satisfaction may be a risk factor for developing FoMO. These insights should be considered in intervention programs developed to effectively prevent unhealthy internet use in adolescents.

1. Introduction

Social media platforms such as Facebook, Instagram, and Snapchat have become an integral aspect of adolescents' daily lives worldwide (Okeke et al., 2019). However, concerns have been raised by families and schools when adolescents use social media problematically. Problematic social media use (PSMU) can be defined as uncontrollable, addictive-like social media use that persists over a longer period of time (van den Eijnden et al., 2016). This behavior always comes at the expense of important life domains for adolescents (Banyai et al., 2017; Paakkari et al., 2021; Shannon et al., 2022). There is a growing body of empirical evidence indicating that adolescents who have developed PSMU subsequently report lower levels of well-being (Boer, Stevens, Finkenauer, de Loone, & van den Eijnden, 2021; Chang et al., 2022; Li et al., 2018; Marentla et al., 2021; Raudsepp, 2019; van den Eijnden et al., 2021), for instance life satisfaction (Boer, Stevens, Finkenauer, & van den Eijnden,

2021; Marentla et al., 2021; van den Eijnden et al., 2018).

Meanwhile, scholars have suggested that fear of missing out (FoMO) may be a core risk factor that is associated with both higher levels of PSMU (Poniraventi et al., 2023; Gul et al., 2023; Çelik et al., 2022) and lower levels of life satisfaction among adolescents (Demir, 2021; Çelik et al., 2022). Yet, there is a scarcity of empirical studies investigating the interrelationships between FoMO, PSMU, and life satisfaction. The Differential Susceptibility to Media Effects Model (DSMEM; Valkenburg & Peter, 2013) provides a comprehensive theoretical framework elucidating that media use factors predict media response states (i.e., state variables originating from media use), which in turn predict media effects (i.e., cognitive, emotional, attitudinal, and behavioral effects of media on individuals), whereby it is assumed that preexisting individual and social context factors may predict media use, but may also influence the relationships between media use and media response states/media effects. When applying the DSMEM, PSMU can be considered a media use

Relationships Discovering The Missing Links:

The Missing Link Edward Dyson, 2019-12-17 Edward Dyson's *The Missing Link* intricately weaves the narrative of scientific exploration and human curiosity through a blend of rich vivid prose and a contemplative exploration of themes surrounding evolution and the interconnectedness of all life. Set against the backdrop of the early 20th century, Dyson employs a modernist literary style creatively oscillating between philosophical musing and gripping storytelling, engaging with the contemporary debates of his time regarding natural selection and the origins of humanity. The book expertly navigates the tension between science and religion, creating a textured dialogue that resonates deeply with readers both then and now. Edward Dyson, an acclaimed Australian author known for his focus on the struggle between tradition and modernity, experienced firsthand the impact of the burgeoning scientific discourse surrounding Darwinism. His diverse background as a poet and journalist provided him with unique insights into both the literary form and the pressing social questions of his era, which manifest in the thematic depth of *The Missing Link*. Dyson's work often reflects his commitment to social justice and public enlightenment, adding layers of significance to his exploration of human origins. For readers intrigued by the convergence of science and literature, *The Missing Link* presents an essential reading experience. Dyson's nuanced examination of evolutionary theory, set against a rich narrative landscape, invites discussion on the fundamental questions of existence. This novel is not just for those who revel in scientific debate but for anyone who appreciates a well-crafted story rich in moral and intellectual inquiry.

Missing Link Jeffery Donaldson, 2015-04-01 We look for missing links in the sciences and humanities but the essential missing link metaphor is always in front of us. In *Missing Link*, Jeffery Donaldson unites literary criticism and evolutionary and cognitive science to show how metaphor has been with us since the beginning of time as a seed in the nature of things. With examples from centuries of poets, critics, philosophers, and scientists, he details how metaphor is a chemistry, an exchange of energies forming and dissolving, and an openness in the spaces between things. He considers the ways in which DNA learns how to liken things that have been how mutation makes errors and then tries them on and how evolution is hypothesis, nature's way of thinking more. The mind is a matrix of relations; neural synapses cascade into ever-changing pathways and patterns. Metaphor is the substance of things hoped for, the evidence of things not seen. It is the unbroken thread between matter and spirit. Whether offering analysis of a turn of phrase or chemical reaction, *Missing Link* presents a vision of literature that is also a vision of the cosmos and vice versa. It enters the debate between evolution and religion and challenges scientists, literary theorists, and religious advocates to rethink the relations between their disciplines.

Focusing on what led to chaos resentment and hostility from abuse and neglect during my childhood guides my journey to a testimony of hope and healing During my search for healing I discovered its not the details in my story but the outcome from my journey that holds great substance Clarifying what this means to me has come after repeatedly processing the pain from past memories and attempting to make sense of the whats and whys I now realize its more critical to endure the pain of emotional surgery and rid myself of what polluted my heart rather than allowing my mind to be consumed with a past that lead to no positive outcome A simple approach Ive embraced is gracefully vomiting up the painful details that became my souls disease since the solution to being free of most diseases requires major surgery To be set free from the weight of my past I had to purge all destructive coping patterns leading to my disease and replace them with something else I had a choice remain stuck in these details at a great cost to my well being or remove what caused my souls disease to interfere with everything I desired to be relationally linked to my marriage children and even my worship with God Theres nothing pleasant about regurgitating however the effort of doing so brought me great freedom and forgiveness as the replacement of this weight led to a positively beautiful outcome You too can find hope Be still and know that I am God Psalm 46 10

Jantke,Ayumi Shinohara,2003-06-30 These are the conference proceedings of the 4th International Conference on Discovery Science DS 2001 Although discovery is naturally ubiquitous in science and scientific discovery itself has been subject to scientific investigation for centuries the term Discovery Science is comparably new It came up in connection with the Japanese Discovery Science project of Arikawa s invited lecture on The Discovery Science Project in Japan in the present volume some time during the last few years Setsuo Arikawa is the father in spirit of the Discovery Science conference series He led the

above mentioned project and he is currently serving as the chairman of the international steering committee for the Discovery Science conference series. The other members of this board are currently in alphabetical order: Klaus P Jantke, Masahiko Sato, Ayumi Shinohara, Carl H Smith and Thomas Zeugmann. Colleagues and friends from all over the world took the opportunity of me going for this conference to celebrate Arikawa's 60th birthday and to pay tribute to his manifold contributions to science in general and to Learning Theory and Discovery Science in particular. Algorithmic Learning Theory (ALT) for short is another conference series initiated by Setsuo Arikawa in Japan in 1990. In 1994 it amalgamated with the conference series on Analogical and Inductive Inference (AII) when ALT was held outside of Japan for the first time.

Between the Empires Patrick Olivelle, 2006-07-13. This volume is the result of an international conference organized by the South Asia Institute at the University of Texas. Patrick Olivelle has collected and edited the best papers to emerge from the conference. Part I of the book looks at what can be construed from archeological evidence. Part II concerns itself with the textual evidence for the period. Taken together, these essays offer an unprecedented look at Indian culture and society in this distant epoch.

Missing Links Robert Allen Martin, 2004. This book introduces newcomers to the field of evolutionary science with an accessible discussion of basic scientific practices, rock and fossil dating techniques and schools of classification.

Dynamical Systems with Applications using Python Stephen Lynch, 2018-10-09. This textbook provides a broad introduction to continuous and discrete dynamical systems. With its hands-on approach, the text leads the reader from basic theory to recently published research material in nonlinear ordinary differential equations, nonlinear optics, multifractals, neural networks and binary oscillator computing. **Dynamical Systems with Applications Using Python** takes advantage of Python's extensive visualization, simulation and algorithmic tools to study those topics in nonlinear dynamical systems through numerical algorithms and generated diagrams. After a tutorial introduction to Python, the first part of the book deals with continuous systems using differential equations, including both ordinary and delay differential equations. The second part of the book deals with discrete dynamical systems and progresses to the study of both continuous and discrete systems in contexts like chaos control and synchronization, neural networks and binary oscillator computing. These later sections are useful reference material for undergraduate student projects. The book is rounded off with example coursework to challenge students' programming abilities and Python-based exam questions. This book will appeal to advanced undergraduate and graduate students, applied mathematicians, engineers and researchers in a range of disciplines such as biology, chemistry, computing, economics and physics. Since it provides a survey of dynamical systems, a familiarity with linear algebra, real and complex analysis, calculus and ordinary differential equations is necessary, and knowledge of a programming language like C or Java is beneficial but not essential.
