Relative Deprivation Iain Walker, Heather J. Smith, 2002 The relative deprivation construct has been widely used in the social sciences to explain phenomena from experiencing psychosomatic stress to participating in urban riots It is currently a valuable tool in research being used especially to understand processes of social identity and responses to disadvantage by both disadvantaged minorities and privileged majorities Originally published in 2001 this book assembles chapters by leading relative deprivation researchers in order to present comprehensive synthesis of knowledge Featuring integrative theoretical and empirical work from social psychology sociology and psychology the book provides a highly detailed reference work It is relevant to researchers in intergroup relations prejudice racism social identity group processes social comparison collective behavior and social movements The book will be of value to anyone with an interest in the topic and its practical application *Social Justice In A Diverse Society* Tom Tyler, Robert J Boeckmann, Heather J Smith, Yuen J Huo, 2019-07-11 Issues of social justice have been an important part of social psychology since the explosion of psychological research that occurred during and after World War II At that time psychologists began to move away from earlier theories that paid little attention to people s subjective understanding of the world As increasing attention was paid to people s thoughts about their social experiences it was discovered that people are

strongly affected by their assessments of what is just or fair in their dealings with others This recognition has led to a broad range of studies exploring what people mean by justice and how it influences their thoughts feelings and behaviors

Justice in Social Relations Hans Werner Bierhoff,Ronald L. Cohen,Jerald Greenberg,2013-11-11 From July 16 through July 21 1984 a group of American and West German scholars met in Marburg West Germany to discuss their common work on the topic of justice in social relations For over 30 hours they presented papers raised questions about each other's work and in so doing plotted a course for future research and theory building on this topic The participants were asked to present work that represented their most recent state of the science contributions in the area The contributions to this volume represent refined versions of those presentations papers that have been improved by the authors consideration of the comments and reactions of their colleagues The result we believe is a work that represents the cutting edge of scholarly inquiry into the important matter of justice in social relations To give the participants the freedom to present their ideas in the most appropriate way we the conference organizers and the editors of this volume gave them complete control over the form and substance of their presentations The resulting diversity is reflected in this book where the reader will find critical integrative reviews of the literature reports of research investigations and statements of theoretical positions The chapters are organized with respect to the common themes that emerged in the way the authors addressed the issues of justice in social relations Each of these themes conflict and power theoretical perspectives norms and applications is represented by a part of this book
