Doppelt, Ellen Shearer, 1999-09 This book addresses the issue of why 51 2% of the population of the USA failed to vote in the November 1996 presidential election Through polls and studies conducted in the spring and summer of 1996 the contributors set out to answer the following questions what were the 51 2 percent doing that day Who are they Why didn t they vote The results are summarized into five types of nonvoters doers unplugged irritable don t knows and alienated *Literature After Globalization* Philip Leonard, 2013-04-14 Explores the interplay between themes of globalization technology and the nation state in contemporary literature and cultural theory *Mobilizing the Information Society* Robin Mansell, W. Edward Steinmueller, 2000-10-26 Mobilizing the Information Society comprehensively and critically examines the interaction between social regulatory and market developments underlying the growing use of new technologies such as the personal computer and the Internet Based upon empirical research by an international team it offers insights needed to understand public policy corporate strategy and individual choices taken in response to the deluge of new technological opportunities A principal theme of Mobilizing the Information Society is that changes are governed by public decisions that establish the institutional framework in which the private sector operates The quality and value of the information society for the citizen is not the inevitable consequence of market and technological forces Policy choices however that fail to take market and technical influences into account will prove ineffective The authors lay the foundation

for improved theories of the process of change more appropriate strategies to achieve desired aims and more effective policies for mitigating the effects of dislocation and exclusion from the information society Mobilizing the Information Society offers unique insights into the social economic and political forces that are structuring the pathway to the information society and their consequences for businesses and citizens in their everyday lives [The Digital Sublime](#) Vincent Mosco,2005-09-23 Interpreting the myths of the digital age why we believed in the power of cyberspace to open up a new world The digital era promises as did many other technological developments before it the transformation of society with the computer we can transcend time space and politics as usual In [The Digital Sublime](#) Vincent Mosco goes beyond the usual stories of technological breakthrough and economic meltdown to explore the myths constructed around the new digital technology and why we feel compelled to believe in them He tells us that what kept enthusiastic investors in the dotcom era bidding up stocks even after the crash had begun was not willful ignorance of the laws of economics but belief in the myth that cyberspace was opening up a new world Myths are not just falsehoods that can be disproved Mosco points out but stories that lift us out of the banality of everyday life into the possibility of the sublime He argues that if we take what we know about cyberspace and situate it within what we know about culture specifically the central post Cold War myths of the end of history geography and politics we will add to our knowledge about the digital world we need to see it with both eyes that is to understand it both culturally and materially After examining the myths of cyberspace and going back in history to look at the similar mythic pronouncements prompted by past technological advances the telephone the radio and television among others Mosco takes us to Ground Zero In the final chapter he considers the twin towers of the World Trade Center our icons of communication information and trade and their part in the politics economics and myths of cyberspace [Vanity Fair](#) ,1997-10 **The Body and the Screen** Michele White,2006 White shows that despite the onscreen promise of empowerment and coherence through depictions of materiality that structure the experience fragmentation and confusion are constant aspects of Internet spectatorship BOOK JACKET **The Monochrome Society** Amitai Etzioni,2021-02-09 Amitai Etzioni is one of the most influential social and political thinkers of our day a man synonymous with the ideas of communitarianism In this book Etzioni challenges those who argue that diversity or multiculturalism is about to become the governing American creed On the surface America may seem like a fractured mosaic but the country is in reality far more socially monochromatic and united than most observers have claimed In the first chapter Etzioni presents a great deal of evidence that Americans whites and African Americans Hispanics and Asian Americans new immigrants and decedents of the Pilgrims continue to share the same core of basic American values and aspirations He goes on to show that we need not merely a civil but also a good society one that nurtures virtues He assesses key social institutions that can serve such a society ranging from revived holidays to greater reliance on public shaming The most effective sources of bonding and of shared ideas about virtue he insists throughout come from the community not from the state Etzioni also challenges moral

relativists who argue that we have no right to impose our moral values on other societies He responds to those who fear that a cohesive community must also be one that is oppressive authoritarian and exclusive And he explores and assesses possible new sources and definitions of community including computer mediated communities and stakeholding in corporations By turns provocative and reassuring the chapters here cut to the heart of several of our most pressing social and political issues The book is further evidence of Etzioni's enduring place in contemporary thought

Misunderstanding the Internet James Curran, Natalie Fenton, Des Freedman, 2012-03-12 The growth of the internet has been spectacular There are now more 1 5

billion internet users across the globe about one quarter of the world's population. This is certainly a new phenomenon that is of enormous significance for the economic, political and social life of contemporary societies. However, much popular and academic writing about the internet takes a technologically deterministic view, assuming that the internet's potential will be realised in essentially transformative ways. This was especially true in the euphoric moment of the mid 1990s when many commentators wrote about the internet with awe and wonderment. While this moment may be over, its underlying technocentrism, the belief that technology determines outcomes, lingers on, and with it a failure to understand the internet in its social, economic and political context.

Misunderstanding the Internet is a short introduction encompassing the history, sociology, politics and economics of the internet and its impact on society. The book has a simple three-part structure. Part 1 looks at the history of the internet and offers an overview of the internet's place in society. Part 2 focuses on the control and economics of the internet. Part 3 examines the internet's political and cultural influence.

Misunderstanding the Internet is a polemical, sociologically and historically informed textbook that aims to challenge both popular myths and existing academic orthodoxies around the internet.

21st Century Technologies: Promises and Perils of a Dynamic Future OECD, 1998-09-25

This book reviews the extraordinary promise of technological advances over the next twenty years or so and assesses some of the key issues—economic, social, environmental, ethical—that decision makers in government, business and society will face in the decades ahead.

The Future of Privacy: Private life and public policy Perri, 1998

The Internet Joan Nordquist, 2000

Each bibliography includes a comprehensive list of the theorist's works and critical studies of these works in English. Each bibliography contains approximately 600 to 900 entries. Books, journal articles, essays, within edited books, in the manner of Essay and General Literature, and dissertations are included. References are provided from a wide variety of disciplines and bibliographic sources. The primary purpose of each bibliography is to provide access to the widely reprinted primary works in English and the critical literature in a great variety of books and journals. The topical bibliographies include the authoritative works on the subject and are arranged in useful categories. The lively part of the modern/post-modern debate is generally taking place in alternative and left journals, journals always included in the literature search in the compiling of the bibliographies.

The extended self Chris Abel, 2016-10-28

In this wide-ranging study of architecture and cultural evolution, the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology-based culture and its energy-hungry products. The book traces the roots of that culture to the coevolution of *Homo sapiens* and technology from the first use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled effects are changing the planet itself. Advancing a new concept of the meme called the technical meme as the primary agent of cognitive extension and technical embodiment, the author proposes a theory of the extended self encompassing material and spatial as well as psychological and social elements. Drawing upon research from philosophy, psychology and the neurosciences, the book presents a new

approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis
