Relevance Of International Adjudication:

The Relevance of International Adjudication Milton Katz, 1968 It has been an ancient and tenacious human hope that mankind could apply to the no man's land between states the experience of domestic law in curbing violence and settling disputes Within a society the use of law to resolve disputes and contain violence centers in the courts and the police Men anxious to restrain international aggression and settle international disputes peaceably have long sought to invoke international policing and adjudication under law Twice within the past half century they have undertaken to build worldwide organizations to keep the peace The United Nations system assigns a critical role to adjudication under the Charter and international law In this book one of America's foremost legal scholars who has extensive experience in foreign policy administration and international law explores whether and to what extent decisions by international tribunals have been significant or may yet be significant for the settlement of international disputes Mr Katz believes that adjudication as an institution ranks among the great creative achievements of mankind but it has its limitations limits both in current practice and in its potential scope In presenting his argument Mr Katz concentrates upon the period since the end of World War II and deals primarily with international conflict within the experience of the United Nations and the International Court of Justice He focuses on disputes resulting from the Cold War and on those between established industrial states and newly emerging states or peoples that have not yet attained a full measure of self government In examining what happened and appraising what might have happened Mr Katz keeps the reader constantly aware of the many meanings of law and of the need to sort out the different meanings in order to apply law effectively Without an understanding of the effective reach and the limits of adjudication he insists we will waste opportunities for settling international controversies We can waste opportunities by failing to use international tribunals where they can be effective we can dissipate the precious resource of adjudication in wishful misapplications and in misapplying adjudication we can divert our attention from other ways and means more pertinent to the settlement of particular international disputes

The Relevance of International Adjudication M. Katz, 1988 **Secondary Rules of Primary Importance in International Law** Gábor Kajtár, Basak Çali, Marko Milanovic, 2022 This volume emphasizes the consequential nature of secondary rules of international law such as attribution causality and the standard and burden of proof and argues that the outcome of litigation is fundamentally shaped by the exact standard of proof standard of review or attribution basis that is chosen by adjudicators *The Advisory Function of the International Court of Justice 1946 - 2005* Mahasen Mohammad Aljaghoub, 2007-06-21 I am pleased to write these words by way of a foreword to Dr Mahasen Aljaghoub's book *The Advisory Function of the International Court of Justice* I do so with a sense of pride in the achievement of a fellow countrywoman and metaphorically speaking a sister in law My pride is coupled with hope and a nascent optimism that she and a group of young Jordanian academics mostly recent graduates of universities in the United Kingdom will contribute further and significantly to the teaching and dissemination of international

law in Jordan and if I do not strain hope by hoping too much in a region in which notwithstanding its past glory the culture of law has for too long been superseded by the logic of power politics and unbridled *raison d'état*. My only hesitation in writing this foreword is that a particularly heavy Court schedule has permitted me only a chance at a perusal of the contents of the book. A perusal which whilst more than casual falls short of the serious study that it deserves. Yet I can unhesitatingly concur with the verdict of the internal and external examiners who praised Dr Aljaghoub's thesis as it then was for its thoroughness, detail and authoritativeness on this important area of international law.

The Philosophy of International Law

Samantha Besson, John Tasioulas, 2010-04 This text contains 29 cutting edge essays by philosophers and lawyers which address the central philosophical questions about international law. Its overarching theme is the moral and political values that should guide and shape the assessment and development of international law and institutions.

Constructive

Interventions Lars Kirchhoff, 2008-01-01 In the contemporary discipline of conflict resolution adjudication and alternative dispute resolution (ADR) are often seen as antagonistic trends. This important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice. With great insight and passion built firmly on a vast knowledge of the field, Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution, defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play. The work starts by defining the challenges, potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors, topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way. In the course of its investigation the book accomplishes the following: illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work; discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically; conveys the nature and consequences of intervention through mediation focusing on the method's critical challenges and clarifies the particular model of international mediation under development through UN initiatives. In approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the United Nations. He explores such diverse scenarios as conflicts between States, conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals, clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication. It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice. Although some of the reasons for this phenomenon are beyond the influence of scholarly debate, in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature. It is the

great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace
