Neutralization for Food Allergy  
and Other Illnesses

*By*

**JOSEPH B. MILLER, M.D.**

Neutralization therapy, a remarkably effective treatment for patients suffering from food sensitivities, inhalant allergies, and diseases of inflammatory, hormonal, and viral origin, is defined and described in this easy-to-read, factual book. The author discusses immunology, hidden food sensitivity and its symptoms, the detection of hidden food sensitivity, common illnesses frequently relieved by neutralization therapy, and neutralization for sensitivities other than foods. A variety of self-help methods and preventative measures are also discussed, including environmental control of inhaled substances in the home and avoidance of chill and other stresses on the body's protective mechanisms. To help the food-sensitive person enjoy a wider variety of foods and maintain a more healthful diet, appendices detail diet charts, food family classifications, individual simple foods, a diet diary, and a food tolerance ledger.

announces to the reader that allergens are molecules That's right You are not allergic to the entire ragweed plant the entire dust mite or the whole cow just one or more types of allergic molecule within each of those organisms If you are allergic to a molecule in a dust mite for example you might be allergic to shrimp or even tropical fish food If you are allergic to some pollens you could also be allergic to nuts fruits and some vegetables because they may share those pesky allergenic molecules Some of these shared allergenic molecules have been identified by scientists and the reader will benefit by learning where they hide The reader's unexplained reactions could be caused by these cross reactive molecules This is a situation where a little bit of knowledge is dangerous because cross reactivity as it is often briefly mentioned in magazines could create fear of foods Alternatively knowledge about cross reactive molecules could uncover these specific allergens Patients could easily avoid these cross reactive pollen molecules if they knew they were in their foods thereby eliminating much suffering from allergy Why would a patient who tested positive to a pollen eat the same allergens in a food If they knew about cross reactivity they would not This book explains the allergic response and the many chemicals the body produces in response to an allergic reaction Allergy is a serious medical condition and a patient can unintentionally make their allergic reaction much worse by exposure to a similar cross reactive allergen Alternatively in addition to the patient's chosen medical treatment knowing about cross reactivity can provide the patient with additional self help      *The Downhill Syndrome* Pavel Yutis,Morton Walker,1996-12-31 The Downhill Syndrome presents Dr Yutis's complementary approach to successfully
