Religion An Anthropological View:

Religion Anthony Wallace, 2013-02-13 The classic anthropological analysis of religion from a pioneer in the field From the preface Scientific efforts to learn just what are the forms and functions of religion have not been few it is the purpose of this book to review some of them and to synthesize the suggestions and findings My own personal feeling is that sociological viewpoints including much of social anthropology tend to focus on the scaffolding and milieu of religion rather than on religion itself and that religion can be best understood from a combination of psychological and cultural points of view This book is not I think motivated by a need to destroy by dissection a way of thinking and acting that many educated people feel is of little use or is even disadvantageous in a world increasingly committed to the search for scientific and technological solutions of human problems Rather I aim to preserve a friendly detachment in the asking of fundamental scientific questions about religion

Religion Anthony Francis Clarke Wallace, 1966 **Religion** Pierre R. Crosson, 1966 **What is Religion?** Idinopulos, Brian C. Wilson, 2018-09-24 What is Religion consists of fourteen essays written by a selection of scholars who represent a wide spectrum of approaches to the academic study of religion Each of the essays is an effort not only to take stock of the present controversy concerning appropriate methodologies for the study of religion but also to take one giant step beyond that to formulate a precise definition of religion Given the considerable confusion today about what it is exactly that religious studies scholars take to be their subject matter when they presume to professionally teach about religion this volume provides a much needed forum for leading scholars to debate and clarify what professors of religious studies understand as the central object or objects under their scrutiny

Religion in Human Life: Anthropological Views Edward Norbeck, 1974 Religion in human life certainly qualifies as a basic topic for this series It is not an easy subject to treat effectively in brief compass Edward Norbeck has done so gracefully and informatively He develops two themes the description of religious events rituals and states of mind and the nature of anthropological aims views procedures and interpretations The interweaving of these two themes provides a view of religion as an anthropological subject and of religion as a process in human life that is unexpected in this short book Instructors of anthropology familiar with anthropological writing on religion will find that the author has not only touched upon many standard topics included in the study of religion but has also included treatments of material not ordinarily covered in standard anthropological works such as etiquette and religion religion and human play rites of reversal and certain aspects of religious transcendence

Religion Anthony F. C. Wallace, 1966 **Religion** Anthony Francis Clarke Wallace, 1966 *Religion in Mind* Jensine Andresen, 2001-06-28 Religion in Mind is a 2001 text which summarizes and extends the advances in the cognitive study of religion throughout the 1990s It uses empirical research from psychology and anthropology to illuminate various components of religious belief ritual and experience The book examines cognitive dimensions of religion within a naturalistic view of culture while respecting the phenomenology of religion and drawing together teachers of religion psychologists of religion and cognitive scientists Expert

contributors focus on phenomena such as belief fixation and transmission attributions of agency anthropomorphizing counterintuitive religious representations the well formedness of religious rituals links between religious representations and emotions and the development of god concepts The work encourages greater interdisciplinary linkages between scholars from different fields and will be of interest to researchers in anthropology psychology sociology history philosophy and cognitive science It also will interest more general readers in religion and science Introducing Anthropology of Religion Jack David Eller,2021-12-27 This clear and engaging guide introduces students to key areas of the field and shows how to apply an anthropological approach to the study of religion in the contemporary world Written by an experienced teacher it covers major traditional topics including definitions theories and beliefs as well as symbols myth and ritual The book also explores important but often overlooked issues such as morality violence fundamentalism secularization and new religious movements The chapters all contain lively case studies of religions practiced around the world The third edition of Introducing Anthropology of Religion is fully updated and contains additional content on material religion visual religion and affect theory and a new chapter takes a closer look at medical and health topics The author encourages the reader to engage throughout with the unifying themes of race gender and power and how these themes are intertwined with anthropology of religion Images a glossary and questions for discussion are included and additional resources are provided via a companion website **Theory and Method in the Study of Religion** ,2013-09-26 Theory and Method are two words that cause considerable consternation in the academic study of religion Although everyone claims to be aware of and to engage them the fact of the matter is that they remain poorly understood Some see the terms as irritants that get in the way of data interpretation and translation Others may invoke them sporadically to appear in vogue but then return quickly and myopically to their material and with little concern for the larger issues that such terms raise To contribute to these debates the present volume reproduces select articles from Method and Theory in the Study of Religion MTSR from the first 25 volumes of the journal and allows a group of younger scholars to introduce and review them asking if the issues raised are still relevant to the field Contributors include Matt Sheedy Robert A Segal James B Apple Neil McMullin Rebekka King Russell McCutcheon Craig Martin Donal Wiebe Emma Cohen Robert N McCauley E Thomas Lawson Steven Engler Mark Q Gardiner Bruce Lincoln Sarah E Rollens Burton Mack Yasmin Merchant Herb Bergh Jennifer Hall Darlene Juschka Ella Paldam and Armin Geertz Religion Seth Daniel Kunin,2003 Over the course of the twentieth century the way we understand the religious experience has been transformed Various thinkers and intellectual approaches have shaped the ways in which scholars examine rituals symbols and belief systems In **Conceptualizing Religion** Benson Saler,2000 How might we transform a folk category in this case religion into a analytical category suitable for cross cultural research In this volume the author addresses that question He critically explores various approaches to the problem of conceptualizing religion particularly with respect to certain disciplinary interests of anthropologists He argues that the concept of family

resemblances as that concept has been refined and extended in prototype theory in the contemporary cognitive sciences is the most plausible analytical strategy for resolving the central problem of the book In the solution proposed religion is conceptualized as an affair of more or less rather than a matter of yes or no and no sharp line is drawn between religion and non religion

The Cognitive Science of Religion D. Jason Slone, William W. McCorkle Jr., 2019-01-10 The Cognitive Science of Religion introduces students to key empirical studies conducted over the past 25 years in this new and rapidly expanding field In these studies cognitive scientists of religion have applied the theories findings and research tools of the cognitive sciences to understanding religious thought behaviour and social dynamics Each chapter is written by a leading international scholar and summarizes in non technical language the original empirical study conducted by the scholar No prior or statistical knowledge is presumed and studies included range from the classic to the more recent and innovative cases Students will learn about the theories that cognitive scientists have employed to explain recurrent features of religiosity across cultures and historical eras how scholars have tested those theories and what the results of those tests have revealed and suggest Written to be accessible to undergraduates this provides a much needed survey of empirical studies in the cognitive science of religion

Speaking of Religion . . . Roy Hammerling, 2022-03-21 Of late speaking about religion has become a problem Whether we are in our homes at worship on the street in college classrooms or anywhere that conversations happen speaking about religion often can turn into a heated exchange As our political and religious divisions widen so does our inability to cross over to meet others halfway with compassionate convicted and civil dialogue Speaking of Religion not only offers ways in which we might open ourselves to hearing and caring about others but also seeks to help us understand our own convictions more fully Such dialogue is not

often easy but it is essential if we ever hope to find our way into a future where fear hatred and cruelty can be set aside As Plato is reputed to have said We can easily forgive a child who is afraid of the dark The real tragedy of life is when adults are afraid of the light Speaking of Religion seeks to look for light in a world that all too readily gets lost in the night of religious ignorance

The Science of Religion: A Defence Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion

Theory in Social and Cultural Anthropology R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader's Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader's Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at
