Religion, Globalization, and Culture Peter Beyer, Lori G. Beaman, 2007-10-30 This volume brings together over 25 articles by many of the most important authors who

have worked on issues directly related to the theme of religion and globalization. An additional emphasis on culture flags the inclusion of the relation of religion to its wider social context and also permits questioning the boundaries of religion so as to avoid a strong bias in favour of the analysis of institutionalized religion. The key emphasis of the book however is the focus specifically on religion, a topic that is still largely ignored in the burgeoning literature on globalization. The articles are divided into five subthemes: theoretical issues, historical approaches to religion and globalization, forms and boundaries of religion, key issues such as ecology and gender, and regional perspectives.

The remarkable growth in religious tourism across the world has generated considerable interest in the impacts of this type of tourism. Focusing here on environmental issues, this book moves beyond the documentation of environmental impacts to examine in greater depth the intersections between religious tourism and the environment. Beginning with an in-depth introduction that highlights the intersections between religion, tourism, and the environment, the book then focuses on the environment as a resource or generator for religious tourism and as a recipient of the impacts of religious tourism. Chapters included discuss such important areas as theological views, environmental responsibility, and host perspectives.
