Reassessing the Moral Economy Tanja Skambraks, Martin Lutz, 2023-10-06 This book examines the concept of moral economy originally established by E P Thompson focusing on the impact of religious norms on economic practice With each chapter discussing a different empirical case study the interrelations of the economy and religion are explored from antiquity through to the 20th century The long term trajectory and comparative perspective allows for moral economy to be seen in relation to ancient Greek commerce medieval pawn broking Christian and Jewish economic ethics urban social politics during the Plague the Jesuit mission in Paraguay the Ottoman Empire religion in modern American capitalism and Catholic attitudes toward taxation This book aims to provide insight into how moral thinking about the economy and economic practice has evolved from a long historic perspective It will be relevant to students and researchers interested in economic history and cultural economics

Economics, Ethics and Religion R. Wilson, 1997-02-24 There is a revival of interest by economists in ethical issues and beliefs and by moral philosophers and theologians in economics This book is intended to make a contribution to this cross fertilisation of ideas Rodney Wilson has undertaken an extensive survey of Jewish Christian and Muslim views on economics and reviewed the rapidly expanding business ethics literature from a religious perspective The juxtaposition of the work of theologians and moral philosophers with that of economists results in some interesting comparisons

Religion and Economic Ethics Joseph F. Gower, 1990-01-01 It remains the case that economic ethics is still an underdeveloped specialization within the discipline of religious ethics Contemporary commentators have lamented the still emergent status of economic ethics and recently some have begun to point out new directions for this area of moral reflection Part of the problem has been the historical fact that not many religious ethicists have taken the time to acquire the required specialization competence in economics economic theory and history Religion and Economic Ethics presents nineteen readings that illuminate the economic side of religious ethics Contributions include Economic Justice and the Common wealth of Peoples by Douglas Sturm Economic Systems and the Sacramental Imagination by Joseph La Barge Common Moral and Religious Grounds for Uncommon Economic Times by James F Smurl Liberation Theology and the Vatican by Arthur F McGovern Co published with the College Theology Society

Economic Ethics & the Black Church Wylin D. Wilson, 2017-09-07 This book examines the relationship between race religion and economics within the black church The book features unheard voices of individuals experiencing economic deprivation and the faith communities who serve as their refuge Thus this project examines the economic ethics of black churches in the rural South whose congregants and broader communities have long struggled amidst persistent poverty Through a case study of communities in Alabama s Black Belt this book argues that if the economic ethic of the Black Church remains accommodationist it will continue to become increasingly irrelevant to communities that experience persistent poverty Despite its historic role in combatting racial oppression and social injustice the Church has also perpetuated ideologies that uncritically justify unjust social structures Wilson shows how the Church can shift the conversation and reality of poverty by moving from a legacy of accommodationism and toward a legacy of empowering liberating economic ethics

Theology and Economics Jeremy Kidwell, 2015-12-27 This volume brings together a prominent group of Christian economists and theologians to provide an interdisciplinary look at how we might use the tools of economic and theological reasoning to cultivate more just and moral economies for the 21st century Max Weber's Economic Ethic of the World

Religions Thomas Ertman, 2017-03-24 This book identifies what is living and what is dead in Max Weber s analyses of China India and Ancient Israel **"Are Economists Basically Immoral?"** Paul T. Heyne, 2008 A well trained theologian a gifted and dedicated teacher of economics for over forty years and the author of a highly regarded and widely used textbook The

Economic Way of Thinking Paul Heyne influenced generations of students of economics Many of the essays in this volume are published here for the first time The editors Geoffrey Brennan and A M C Waterman have divided Heyne s essays thematically to cover three general areas the ethical foundations of free markets the connection between those ethical foundations and Christian thought and the teaching of economics both method and substance Heyne s writings are unique in that he takes the critics of the free market order seriously and addresses their arguments directly showing how they are defective in their understanding of economics and in their ethical and theological underpinnings The engaging style of Heyne s essays makes them accessible to students as well as to scholars Even in discussions of topics well beyond the fundamental level Heyne still succeeds in providing students with an appreciation of basic economic principles *The Economic Order and Religion* Frank H. Knight, Thornton Ward Merriam, 2015-09-15 2015 Reprint of 1945 Edition Full facsimile of the original edition not reproduced with Optical Recognition Software Knight wrote about religion and social ethics throughout his career The Economic Order and Religion was a collaborative project with Thornton W Merriam The book was intended to bring the differences among Americans approaches to economic ethics into high relief by presenting two contrasting viewpoints and

allowing the authors to comment on each other's perspective Prior to collaborating with Merriam Knight had begun work on a book on religion economics and social ethics When the collaborative project emerged in the early 1940s as a realistic opportunity the material already written was re worked into the chapter essay Liberalism and Christianity included in this monograph

The Economic Ethics of World Religions and Their Laws Andreas E. Buss, 2015 Based on analyses of the essays written by Max Weber on China India ancient Judaism and also on the dispersed material about Islam Eastern Christianity and Occidental Christianity this book examines the economic ethics of Asian and Christian traditions and their corresponding legal systems Drawing also on Weber's methodology particularly the concept of adequate causation the author reveals that the nature of Asian religions as well as the nature of customary and other not formally rational laws in Asian cultures could not lead to modern capitalism out of their own sources although capitalism could be adopted from the outside The culture of the Occident upon which capitalism is based is revealed to consist of a double rationalisation the formal rationality of the exterior circumstances of life administrative and legal and the innerworldly practical rationality of the inner motivations of the Protestants supported by a goal oriented rational technology
