Howell, Jenell Williams Paris, 2010-12 This concise introductory cultural anthropology textbook gives special attention to issues of concern to Christians and features plentiful maps photos and sidebars Defining the Sacred Nicola Laneri, 2015-05-08 Religion is a

phenomenon that is inseparable from human society. It brings about a set of emotional, ideological, and practical elements that are pervasive in the social fabric of any society and characterizable by a number of features. These include the establishment of intermediaries in the relationship between humans and the divine, the construction of ceremonial places for worshipping the gods, and practicing ritual performances and the creation of ritual paraphernalia. Investigating the religious dimensions of ancient societies encounters problems in defining such elements, especially with regard to societies that lack textual evidences, and has tended to lead towards the identification of a differentiation between the mental dimension related to religious beliefs and the material one associated with religious practices, resulting in a separation between scholars able to investigate and possibly reconstruct ritual practices (i.e. archaeologists) and those interested in defining the realm of ancient beliefs (i.e. philologists and religious historians). The aim of this collection of papers is to attempt to bridge these two dimensions by breaking down existing boundaries in order to form a more comprehensive vision of religion among ancient Near Eastern societies. This approach requires that a higher consideration be given to those elements, either artificial (buildings, objects, texts, etc.) or natural (landscapes, animals, trees, etc.) that are created through a materialization of religious beliefs and practices enacted by members of communities. These issues are addressed in a series of specific case studies covering a broad chronological framework that from the Pre-pottery Neolithic to the Iron Age. Features self-contained chapters, each with its own comprehensive bibliography, so that they can be approached in any order. Contains an additional chapter on mythology and a number of new illustrations. Incorporates coverage of the following topics in the existing structure: pilgrimage, spirit possession, and cargo cults. Includes a list of ethnographic films and videos that can be used to illustrate and extend discussion of particular issues.

Anthropological Studies of Religion Brian Morris, 1987-02-27. A lucid outline of explanations of religious phenomena offered by such great thinkers as Hegel, Marx, and Weber.

The Routledge Companion to the Study of Religion, **Anthropology and Religion** Robert L. Winzeler, 2012-04-12. Drawing from ethnographic examples found throughout the world, this revised and updated text offers an introduction to what anthropologists know or think about religion, how they have studied it, and how they have interpreted or explained it since the late nineteenth century. Robert Winzeler's balanced consideration of classic topics, basic concepts, and new developments in the anthropological study of religion moves beyond cultural anthropology and ethnography to gather information from physical anthropology, prehistory, and archaeology. Written as a sophisticated but accessible treatment of the issues, *Anthropology and Religion* is a key text for upper division courses.
