Religion and Culture in Medieval Islam Richard G. Hovannisian, Georges Sabagh, 1999 Seven distinguished scholars explore the religion and culture of medieval Islam

Medieval Islam Gustave E. von Grunebaum, 2010-01-15 From the Preface This book has grown out of a series of public lectures delivered in the spring of 1945 in the Division of the Humanities of the University of Chicago It proposes to outline the cultural orientation of the Muslim Middle Ages with eastern Islam as the center of attention It attempts to characterize the medieval Muslim's view of himself and his peculiarly defined universe the fundamental intellectual and emotional attitudes that governed his works and the mood in which he lived his life It strives to explain the structure of his universe in terms of inherited borrowed and original elements the institutional framework within which it functioned and its place in relation to the contemporary Christian world A consideration of the various fields of cultural activity requires an analysis of the dominant interest the intentions and to some extent the methods of reasoning with which the Muslim approached his special subjects and to which achievement and limitations of achievement are due Achievements referred to or personalities discussed will never be introduced for their own sake let alone for the sake of listing the sum total of this civilization's major contributions They are dealt with rather to evidence the peculiar ways in which the Muslim essayed to understand and to organize his world The plan of the book thus rules out the narration of political history beyond the barest skeleton but it requires the ascertaining of the exact position of Islam in the medieval world and its significance This plan also excludes a study of Muslim economy but it leads to an interpretation of the social structure as molded by the prime loyalties cherished by the Muslim

Islam Between Culture and Politics Bassam Tibi,2005-08-31 Bassam Tibi offers a radical solution to the problems faced by Islam in a rapidly changing and globalizing world He proposes a depoliticization of the faith and the introduction of reforms to embrace secular democracy pluralism civil society and individual human rights The alternative to this is the impasse of fundamentalism The pivotal argument is that Islam is being torn between the pressure for cultural innovation and a defensive move towards the politicization of its symbols for non-religious ends

of Islamic civilization It is of use in understanding the roots of Islamic society as well to explore the culture of medieval civilization *Islam Between Culture and Politics* B. Tibi, 2001-11-07 Bassam Tibi offers a radical solution to the problems faced by Islam in a rapidly changing and globalizing world He proposes a depoliticization of the faith and the introduction of reforms to embrace secular democracy pluralism civil society and individual human rights The alternative to this is the impasse of fundamentalism The pivotal argument is that Islam is being torn between the pressure for cultural innovation and a defensive move towards the politicization of its symbols for non religious ends *The Oxford Handbook of the Abrahamic Religions* Adam J. Silverstein, Guy G. Stroumsa, Moshe Blidstein, 2015 The Oxford Handbook of the Abrahamic Religions includes authoritative yet accessible studies on a wide variety of topics dealing comparatively with Judaism Christianity and Islam as well as with the interactions between the adherents of these religions throughout history The comparative study of the Abrahamic Religions has been undertaken for many centuries More often than not these studies reflected a polemical rather than an ecumenical approach to the topic Since the nineteenth century the comparative study of the Abrahamic Religions has not been pursued either intensively or systematically and it is only recently that the comparative study of Judaism Christianity and Islam has received more serious attention This volume contributes to the emergence and development of the comparative study of the Abrahamic religions a discipline which is now in its formative stages This Handbook includes both critical and supportive perspectives on the very concept of the Abrahamic religions and discussions on the role of the figure of Abraham in these religions It features 32 essays by the foremost scholars in the field on the historical interactions between Abrahamic communities on Holy Scriptures and their interpretation on conceptions of religious history on various topics and strands of religious thought such as monotheism and mysticism on rituals of prayer purity and sainthood on love in the three religions and on fundamentalism The volume concludes with three epilogues written by three influential figures in the Christian Jewish and Muslim communities to provide a broader perspective on the comparative study of the Abrahamic religions This ground breaking work introduces readers to the challenges and rewards of studying these three religions together **The Mathematics of Egypt, Mesopotamia, China, India, and Islam** Victor J. Katz, Annette Imhausen, 2007-08-05 In recent decades it has become obvious that mathematics has always been a worldwide activity But this is the first book to provide a substantial collection of English translations of key mathematical texts from the five most important ancient and medieval non Western mathematical cultures and to put them into full historical and mathematical context The Mathematics of Egypt Mesopotamia China India and Islam gives English readers a firsthand understanding and appreciation of these cultures important contributions to world mathematics The five section authors Annette Imhausen Egypt Eleanor Robson Mesopotamia Joseph Dauben China Kim Plofker India and J Lennart Berggren Islam are experts in their fields Each author has selected key texts and in many cases provided new translations The authors have also written substantial section introductions that give an overview of each mathematical culture and

explanatory notes that put each selection into context This authoritative commentary allows readers to understand the sometimes unfamiliar mathematics of these civilizations and the purpose and significance of each text Addressing a critical gap in the mathematics literature in English this book is an essential resource for anyone with at least an undergraduate degree in mathematics who wants to learn about non Western mathematical developments and how they helped shape and enrich world mathematics The book is also an indispensable guide for mathematics teachers who want to use non Western mathematical ideas in the classroom
